

Excellence.
NO EXCUSES!

68 Ways to Launch Your Journey.
NOW.

Tom Peters

27 March 2014

To

John Hetrick

Inventor of the auto air bag, 1952

*This plea for **Excellence** is a product of Twitter, where I hang out. A lot. Usually, my practice is a comment here and a comment there—driven by ire or whimsy or something I’ve read or observed. But a while back—and for a while—I adopted the habit of going off on a subject for a semi-extended period of time. Many rejoinders and amendments and (oft brilliant) extensions were added by colleagues from all over the globe.*

*So far, some **68** “tweetstreams” (or their equivalent from some related environments) have passed (my) muster—and are included herein.*

*There is a lot of bold type and a lot of **RED** ink and a lot of (red) exclamation marks (!) in what follows. First, because I believe this is important stuff. And second, because I am certain there are no excuses for not cherrypicking one or two items for your T.T.D.N. list. (Things To Do NOW.)*

Excellence.

No Excuses.

Now.

Epigraph: The **ACCELERATING** Rate of Change

*“The greatest
shortcoming of the
human race is our
inability to
understand the
exponential
function.”* —Albert A. Bartlett*

*from Erik Brynjolfsson and Andrew McAfee, *The Second Machine Age*,

“Moore’s Law and the Second Half of the Chessboard”/“Change” is **not** the issue—change has always been with us. But “this time” may truly be different. The ACCELERATION of change is unprecedented—hence, the time for requisite action is severely compressed.

Excellence 68. **NO EXCUSES.**

1. **Change.** Focus/obsess on allies. And allies and allies. And MORE allies. Don't allow yourself to be distracted or sidetracked by foes.
2. **Do good work.** You'll spend most of your waking hours at work. Make the best of it—or you will have thrown away your life. (Strong words. Warranted.)
3. **Start the day on a high/ Close the week with a bang.** Bring a SMILE to work. IMMEDIATELY get out and about (MBWA). Etc. Call it “the little BIG things starter kit.” First TEN MINUTES determine the flow of the day. Day's end: More MBWA. Offer thanks for a job well done—“little stuff” more than big stuff. Call three customers. Thank two people in other functions who lent a hand.
4. **Time spent on relationships/network building.** It's the ... ULTIMATE CAPITAL INVESTMENT.
5. **Training.** Training must go from “second best” to the very top of the heap. The training boss should sit next door to the CEO. Training courses should unfailingly make you gasp at their quality.
6. **People development.** Priority #1 is no less than a ... MORAL OBLIGATION ... to let nothing get in the way of helping our people—each and every one—grow and prosper and achieve beyond their wildest dreams. (Hint: You'll make a lot of money along the way.)
7. **Joy.** Damn it. (Why not?)
8. **WOW-ification.** Ugly word. Magnificent aspiration. (Necessary, too, in a hyper-competitive world.)
9. **First-line LEADERSHIP matters—a lot!** The #1 variable determining enterprise productivity is the quality of the full cadre of 1st-line leaders. (Recruit 'em and train 'em accordingly.)
10. **Get aboard the “S-train” or else.** SM/Social Media. SX/Social eXecutive/SE/Social Employees. SO/Social Organization. (ALL HANDS.) SB/Social Business. Cacophonous engagement of one—AND ALL!—with every aspect of the enterprise, inside and out, is determining the difference between winners and losers.
11. **XFX/Cross-Functional EXCELLENCE.** Strategic Opportunity #1.
12. **The “sharing economy.”** Sharing pays! Sharing (more) pays (more)!
13. **The “hang out factor.”** Little or nothing is more important than MANAGING your “Hang Out Portfolio”! We are indeed what we eat—and who we spend time with.
14. **Calendar supremacy.** You ARE how you spend your time. PERIOD.
15. **Civility.** Civility allows you to sleep at night. Civility is (also) a STUNNING competitive advantage.

16. **Politics.** IMPLEMENTATION is ... politics. (Get over it.) (Master it.)
17. **“EXCELLENT” Meetings.** Meetings are what bosses “do.” Meetings are de facto Leadership Opportunity #1. Act accordingly. (Few do.)
18. **Email EXCELLENCE.** Why not?
19. **The Reaction is more important than the action.** The problem is rarely the problem. The RESPONSE to the problem is invariably the problem.
20. **Thank you!** “Acknowledge” and “Appreciate” are perhaps the two most powerful words in the leader’s language.
21. **ACKNOWLEDGEMENT Power.** (Continued. Why? Said power is AWESOME.)
22. **Listen up!** Make 2014: The Year of the EAR. Listening = Skill #1.
23. **INTROVERT POWER!** The Quiet Ones are more than worth their weight in gold!
24. **“Have you ...”** The 50 “Have Yous.”
25. **2013–14/New Year’s Week.** BEGINNINGS and ENDINGS matter. A LOT.
26. **The delicacy of the helping process.** We suck at giving criticism. (It matters. A LOT.)
27. **EXCELLENCE.** The 5-minute Rule. (PLUS more.)
28. **Organizations exist to SERVE.** PERIOD.
29. **Shareholder value MYTH.** Shareholders need not come first among corporate priorities.
30. **Putting People REALLY First.** (REALLY.)
31. **Limits to “strategy.”** Winners focus on EXECUTION.
32. **“Only one can be the cheapest.”** DESIGN as D.I.C./Differentiator-In-Chief.
33. **Boomer Market: Where the BIG \$\$\$ Are.** Most are winging it—Nutty!
34. **RADICAL Personal Development.** It’s the only survival strategy amidst the economic/tech tsunami. Start ASAP.
35. **100% of us ... ENTREPRENEURS.** We are ready! (It turns out.)
36. **Benchmarking.** Effective “benchmarking” is NOT about copying—it IS about learning and adapting to circumstances.

37. **B-I-G? Over-rated!**
38. **Judgment.** OUR JUDGMENT STINKS. PERIOD. (C.f., tons of research prove it.)
39. **Culture comes FIRST.** If (hyper-hardnosed) former IBM CEO Lou Gerstner says it, it must be so!
40. **“This will be the women’s century.”** Women BUY. Women RULE.
41. **The THREE Rules.** Taking the high road to success.
42. **The “PI6.”** Or: Personal Impact SIX. Short and (I hope) sweet.
43. **BIGGEST Life Decision.** Your call ... ONE DAY AT A TIME.
44. **Read! Read! Read some more!** One of the premier investment bankers in the world declares CEOs’ #1 problem to be a failure to read enough.
45. **The Middle Class Is Toast.** (Ye gads.) (And then an antidote!)
46. **WOW. NOW.** The Project 50. The Brand You 50. The Professional Service Firm 50.
47. **Full STEAM Ahead.** Call for an Education Revolution. ASAP.
48. **Some REALLY WEIRD Stuff ... That’s REAL NOW.** Wow!
49. **Kiwi EXCELLENCE.** Suggestions for New Zealand Excellence ... High Universality.
50. **47 questions for newly anointed CEOs.** Do you leave 50% of your time unscheduled? (And 46 others.)
51. **Ready. Fire. Aim.** The ACTION Imperative—now more than ever.
52. **RADICAL Nudger!** The Little BIG Things.
53. **The LAST word.** (For now.)
54. **The LAST word (Version TWO).** People REALLY First—or else.
55. **The LAST word (Version THREE).** Do the right thing re people ... maximize financial performance.
56. **The LAST word (Version FOUR).** Leaders Role #1: Create ... MORE LEADERS.
57. **The LAST word (Version FIVE).** Do (NOW) or Die.
58. **The LAST word (Version SIX).** Implementation: The “last 99%.”

- 59. The LAST word (Version SEVEN).** The only thing we have to fear is the absence of fear.
- 60. The LAST word (Version EIGHT).** We ALL have what it takes to be entrepreneurial.
- 61. The LAST word (Version NINE).** Becoming a (full-fledged) PSF/PROFESSIONAL SERVICE FIRM.
- 62. The LAST word (Version TEN).** Nothing half way! Use your last ounce of energy!
- 63. The LAST word (Version ELEVEN).** Humble accomplishments doth make a (full) day.
- 64. The LAST word (Version TWELVE).** *In Search of Excellence*/127 characters.
- 65. The LAST word (Version THIRTEEN).** Small courtesies = ENORMOUS IMPACT.
- 66. The LAST word (Version FOURTEEN).** Aim HIGH HIGHER HIGHEST.
- 67. The LAST word (Version FIFTEEN).** Nobody knows anything. Hmmmmm
- 68. The LAST word (Version SIXTEEN).** Fasten your ... BACK-SEAT SEATBELTS!
- Appendix: Systems Have Their Place: SECOND Place.**

I. Change/Change Agents

The A-squared Approach: Allies & Action

Not sure what triggered it, but I went on a Twitter rampage this morning (Thursday, 11/21/13) on the topic of change. Herewith, FYI:

Change agency: Forget the word “enemies.” Focus on/obsess on ...

ALLIES.

Big change is not about fighting the bad guys. It’s about surrounding them with your continuously recruited allies.

Success at change: Building a stable of allies. Failure: Pissing and moaning and picking fights.

Change agent time distribution: 50% recruiting Allies. 40% tending Allies.

10% other. **0%** fighting enemies.

Change: Allies do not automatically remain allies. Tend them and do NOT NOT NOT neglect them—the latter is a common sin.

Change the 4F Way: **F**ind a **F**ellow **F**reak **F**araway.

(Change agents *need* playmates and *distant* playpens.)

Elliott Masie*, on desirable eLearning vendors: ***“I want a ‘sandbox partner,’ someone who will openly say, ‘This is not the last word; we don’t know exactly where we’re going.’”***

*Masie is the “uber-guru” of eLearning.

Change you want: **“It”** (your thing) **is**

**already
happening
somewhere.**

FIND IT!

Change the Bob Stone way*: *“Some people look for things that went wrong and try to fix them. I look for things that went right, and try to build off them.”*

(*Stone ran the surprisingly successful “re-inventing government” program for VP Al Gore in the ’90s.)

“Somewhere in your organization, groups of people are already doing things differently and better. To create lasting change, find these areas of positive deviance and fan the flames.”

—Richard Pascale & Jerry Sternin, “Your Company’s Secret Change Agents,” *Harvard Business Review* (The late Mr. Sternin was an incredibly successful change agent in developing countries.) (The authors’ key contribution is the idea of **“positive deviance”**—i.e., ferreting out good stuff already underway.)

“In foreign aid, Planners announce good intentions but don’t motivate anyone to carry them out.

Searchers find things that work and build on them.

Planners apply global blueprints. Searchers adapt to local conditions. A Planner thinks he already knows the answers; he thinks of poverty as a technical engineering

*problem that his answers will solve. **A***

Searcher admits he doesn’t know the answers in advance; he hopes to find answers to individual problems only by trial and error experimentation.”

*—William Easterly, *White Man’s Burden: Why the West’s Efforts to Aid the Rest Have Done So Much Ill and So Little Good**

Losses as critical as wins: *Dotcom movement worked big time. Astonishing amount of experimentation in brief period. “Ls” as/more important than “Ws.”*

Change is about end runs—not a smash-mouth plunge down the middle.

Allies: Recruit the quiet ones as much or more than the noisy ones.

If you can't find allies, you're probably perceived as too far out. Find the sweet spot: Exciting/edgy w/o scaring the shit outta people.

A rigid stance nearly always generates an equally rigid response.

Change: Making loud noises is usually a loser's strategy.

If you are really passionate, you tend to confront. Confrontation **NEVER** results in victory; it just entrenches your opponents and increases their determination to stop you. You play into the bad guys' hands: “I knew he was a jackass. Never put him on the agenda again.”

Action Rules! 1 Thing (Only) I've Learned in 48 Years!

A Bias for Action. (No. 1/"Basics of Excellence"/*In Search of Excellence*/1982)

"Ready. Fire. Aim."

(H. Ross Perot on EDS; as compared to GM's "Ready. Aim. Aim. Aim. Aim. Aim. ...")

Just do it! (Nike)

Move fast, break things. (Facebook)

Experiment fearlessly. (Trait #1/Great innovator companies/*Bloomberg Businessweek*)

Relentless trial and error. (Corporate Survival Trait #1 in crazy times/*Wall Street Journal*)

"You miss 100% of the shots you never take." (Wayne Gretzky)

"Fail. Forward. Fast." (Tech exec/Philadelphia)

CAN YOUR BUSINESS FAIL FAST ENOUGH TO SUCCEED? (*Economist* conf. title)

"Fail faster, succeed sooner." (David Kelley/IDEO)

"No matter. Try again. Fail again. Fail better." (Samuel Beckett)

"Reward excellent failures. Punish mediocre successes." (Phil Daniels/Australian businessman)

Whoever Makes the Most Mistakes Wins. (Richard Farson/book title)

"The Silicon Valley of today is built less atop the spires of earlier triumphs than upon the rubble of earlier debacles." (Paul Saffo/tech futurist/Palo Alto)

"The secret of fast progress is *inefficiency*: fast/furious/numerous failures." (K. Kelly)

S.A.V./Screw Around Vigorously (TP: only possible success strategy for crazy times)

Demo or die. (MIT Media Lab credo)

"Don't 'plan.' Do stuff." (David Kelley/IDEO)

"Effective prototyping may be the most valuable core competence an innovative organization can hope to have."/"Minimize 'mean time to prototype.'" (M. Schrage/MIT)

"This is so simple it sounds stupid. You only find oil if you drill wells." (J. Masters/wildcatter)

"We have a 'strategic plan.' It's called 'doing things.'" (Herb Kelleher/Southwest Airlines)

"Can do!" (Motto/U.S. Navy Seabees/my starting point in 1966 in Vietnam)

"Execution is strategy." (Fred Malek)

WD40 (Water Displacement, 40 tries to get it right)

BLAME NO ONE. EXPECT NOTHING. DO

SOMETHING. (NFL coach Bill Parcells/locker-room poster)

"Quality is a probabilistic function of quantity." (M. Gladwell/"Creation Myth"/re J.S. Bach)

"Ever notice that 'What the hell' is always the right decision?" (Anon. screenwriter)

W.T.T.M.S.W. /Whoever Tries The Most Stuff Wins.

WTTMSASTMSUW/Whoever Tries The Most Stuff And Screws The Most Stuff Up Wins.

WTTMSASTMSUTFW/Whoever Tries The Most Stuff And Screws The Most Stuff Up
The Fastest Wins.

WTTMSW:

Whoever

Tries

The

Most

Stuff

Wins.

Change: **Rack up and log (and**

advertise !) ... “*small*

***wins*” ... like a ...**

maniac.

*(“Trying a lotta stuff”/WTTMSW writ large: Trial and error, many many many trials and many many many errors very very very rapidly will be the rule—think dotcom boom and bust and the incredibly valuable residual in terms of entrepreneurial training and ideas surfaced and approaches rejected. Tolerance for rapid learning—and unlearning—will be a, even **THE**, most valued skill. FYI: “Gamers” instinctively “get” this—lots of trials, lots of errors as fast as possible—in ways their error-avoiding elders can only imagine; hence, for this reason among many, “the revolution” is/will be to a very significant degree led by youth.)*

Change: Recruit allies 2 or 3 levels “down” ... the magicians who reside where the real work is done and the place from which the system can be indirectly manipulated. I.e., “Suck down” for success/Make friends in “low” places.

Change: **ALLIES. ALLIES. ALLIES. ALLIES.**
ALLIES. ALLIES. (Then more **ALLIES.**)

Change agents: Commit no minor sins. Don’t let the bad guys find a narrow opening and bring you down for trivial reasons.

Change agents: Keep a civil tongue at all costs.

Winners: Recruit/nurture allies; try lotsa stuff; stay under the radar. Losers: Go toe to toe with the establishment; seek the spotlight.

Change agents: *Speak not ill of
thine enemies.* Even to pals in private. All
the walls have keen ears—circa 2014.

Change agents: No: Charts and graphs. Instead: Demos. Demos. Then more demos.

Change: *Success is more about momentum and
growing excitement around a portfolio of small wins
than it is about big wins.*

Change: Engage your allies in the design process—even if it introduces impurities. They must FEEL true ownership.

100% of change-that-works is NON-linear. (A wonderful saying: Winners are the ones who are “good at Plan B.” Or, I’d say, Plan Z.)

*Suck “down”
for success!*

*Make friends
in “low”
places!**

*It’s simple, really. “Down” is where the work is done! An Army of Fans “down below” is the greatest group of allies imaginable. If you are, say, making a sales pitch for a complex systems product, it’s true that the “VP” will eventually need to sign off. BUT ... the analysis that wins or loses the battle will be done two levels “down” by a trio of young, invisible, unloved engineers. They are the ones you want on your side—find *them* and nurture *them*. (FYI: This is a ... **GUARANTEED** ... winning formula.)

Change: *Joyfully let/encourage your allies to take*

100% *credit for the small wins they're involved in.*

Serious change includes bad days, bad weeks, bad months, perhaps bad years.

Change agents: Re-read all emails **THREE** times before sending.

Social Media is a marvel. But do **NOT** shortchange face-to-face with Allies.

Change agents: *Successful “small wins” with outsiders provide enormous street cred.** (*And, increasingly, “Co-invention” is “EVERYTHING.”)

Change agents: Preaching to the choir is just fine. More than fine: It produces a “multiplier effect”: *If the members of the choir preach to their choirs, it becomes a ... **MOVEMENT!***

Greatest waste of time? Trying to “convert” non-believers. Instead, surround 'em. That is, you don't “convert.” “They” “discover”—come to appreciate what you're doing because a couple of *their* pals have joined up.

*#1 role of
allies?*

*Recruit more
allies!**

*Hence allies' perceived **“ownership”** is all-important—allies have to “do it their way” to abet that sense of ownership. Give 'em space: No doctrinal rigidity, please!

Aiming for An Ally's "Ownership"

The following are simplistic, but give a flavor of "the approach" to prospective allies. I repeat: They are not "helpers." They are stakeholders with as much ownership/skin-in-the-game as you.

Herewith:

"Hey, I've been working on this idea; actually we've both talked about the issue before. Want to add your \$2.22 [not \$0.02] and help me develop it? Who knows, could be fun."

"We ran a little two-bit trial on part of this new program. Results look pretty good. Any chance you'd tweak it and try it with your team?"

"I've gotten these great results from this system tweak. But your group is very different from mine. If you like the data, would you consider doing something akin to it, using your parameters, at your place?"

"I tested this idea and had some pretty good results. Then Nancy James redesigned it big time for her department—and had promising results. Your department is more like hers than mine. If you're interested, I'm sure she'd be delighted to go through it with you."

Etc.

Etc.

*All alliances are social—
regardless of the role of self-
interest. Tend to the social
part—or perish.*

*“Allied commands depend
on mutual confidence, and
this confidence is gained,
above all, through the
development of friendships.”*

—General D.D. Eisenhower,
on managing the impossible—the D-Day alliance

Change I: **ALLIES.**
ALLIES. ALLIES.
ALLIES. ALLIES.
ALLIES. (Then
***more* ALLIES.)**

Change II: **“Suck DOWN**
for success.”

Change III: **Demo. NOW.**

ONE More/LAST Time:

Allies, Not Adversaries

“Overcoming resistance to change” is the quintessential B.S./misguided/stupid/ignorant approach to getting (important) things done.

Let me set you straight in precisely ... **SEVENTEEN** words:

Implementing desired change is not about “vanquishing” “enemies.”

Implementing desired change is about recruiting and nurturing allies.

That is the difference between ... **Negative & Positive.**

That is the difference between ... **Enemies & Friends.**

That is the difference between ... **Fear & Fun.**

That is the difference between ... **Night & Day.**

That is the difference between ... **Hell & Heaven.**

That is the difference between ... **Failure & Success.**

Q.E.D.

ALLIES/Addendum: **C(I) > C(E)**

Suppose you are in sales. *Your most important customers are your ...*
INTERNAL CUSTOMERS.

I call them: C(I). That is, if you want to give the best service possible to your external customers—C(E)—then you need your entire organization—logistics, finance, etc.—going out of their way to aid and abet your efforts regarding C(E). As to the topic of this section:

Making ... ALLIES “AT HOME” ... is Task #1 for a salesperson bent on being (& *remaining!*) a top performer.

II. Do Good Work

I admit I've tired of Garrison Keillor, but I do like his tag line:

“Be well. Do good work. Keep in touch.” My comments follow:

Garrison Keillor: **“Do good
work.”**

That is a powerful sentiment: How does today for you stack up on that “metric”?

Good work: Of service to our *clients*. Of service to our *peers*. Of service to our *community*. Committed to personal growth. Pushing the limits.

By definition “do good work” revolves around the phrase ...

“of service.”

Good work: Help others grow. Infectious enthusiasm. Always approachable. A ready smile. Keeping promises. Learning. Learning. Learning.

Good work: The quality of the experience of producing the product is as important as the product itself.

Not sure why “do good work” struck me so hard. I guess I realize what a monumental challenge it is to live up to day in and day out.

Good work: *Most of our
conscious life will be
at work. Like it or
not. Waste your work
life and you have
effectively wasted
your life.*

III. “Must Do” Top-of-the-Morning Rituals

I launched the day with a few quick starter-to-dos for bosses. They were vigorously retweeted, so I decided to post them here. FYI:

MBWA. (Managing By Wandering Around.)

NOW.

PLEASE.

Take someone in another function to lunch. TODAY. DAMN IT.

Thank someone for bringing a **SMILE**

to work today. Do it in the next ... 30 MINUTES.

Boss: Observe yourself closely over the next 60 MINUTES. Did you LISTEN more than you talked?

At the beginning of your next meeting THANK two people for ... *SOMETHING.*

THANK YOU for reading these tweets. Have a great day.

Monday/Tomorrow/Courtesy NFL/National Football

League: “Script”

your first 5-10

“plays.”

**(I.e., carefully launch
the day/week in a *purposeful* fashion.)**

Every Day: To Your Health!

I've been studying back/neck pain (after a car crash). There are millions w/ major chronic pain. Can be fabulous workers ... but don't be surprised if they're not always smiling.

Software/etc. folks with lots of already stooped 26-yr-olds:

(1) Get the ergonomics right.

(2) Insist on hourly breaks.

You see supple/26—but may well be cripple/46.

Hypothesis: **Demand hourly break/2 minutes: Lose 3% productivity. Offset by PLUS 15% productivity/creativity/collaboration the other 58 minutes.**

Close-the-Week/Friday Rituals

Have you prepped for your first meeting with your team today with the same care you'd put into a presentation to your boss? THIS is MORE important!

Bosses: *The first ten minutes set the tone for the day. PERIOD.*

Bosses/Repeat: MBWA for the first 15-30 minutes after arrival at the office.
Bosses: MBWA, last 15-30 minutes of the day/Friday. Thank a minimum of THREE people for something they did this week.

Bosses: Take someone new and different to lunch today.

Bosses: Re MBWA, saying thanks a couple of times, etc., how about a “daily rituals” list carried in your pocket to remind you of this stuff?

Bosses: How about a promise to yourself not to email/text/etc. any of your team this weekend?

Bosses: Like my old White House boss, set aside a half hour this afternoon to

CALL 3-5 “outsider” folks who gave your team a hand this week.

(WH boss) was the busiest guy I ever met, yet he did his (late-in-the-day)

“Thank you” ritual EVERY day. And most calls were “down” to someone who'd offered a helping hand.

Lot of (my WH boss's) calls (this was the old days) were to secretaries/PAs of those above him: *His secretaries network was his secret weapon.*

Bosses/FACT: projects succeed/fail because of cooperation from OTHER functions. Find 2-3 of those “other function” folks to thank today.

Bosses/REMEMBER: *Suck DOWN for success!*
(It's the efforts/energy of the network
“below” you that makes you a hero ... or a
goat!)

I wrote *In Search of Excellence* about ONE thing: **MBWA.**

MBWA: *Being in touch,
being human,
emphasizing
so-called “soft”
factors, which are in
fact true “hard”
factors that drive
success/growth/
profitability.*

MBWA **25**

“I’m always stopping by our stores ...

*at least **25** a week.*

*I’m also in other places: Home Depot,
Whole Foods, Crate & Barrel. I try to be a
sponge to pick up as much as I can.”*

—Howard Schultz, Starbucks

MBWA 4-8-12

MBWA 4: The four most important words in any organization are ...

“WHAT DO YOU THINK?”

Source: Dave Wheeler, posted at tompeters.com

MBWA 8: Change the World With 8 Words ...

**What do you think?
How can I help?***

*Boss as CHRO/Chief Hurdle Removal Officer

MBWA 12: Change the World With 12 Words ...

**What do you think?
How can I help?
What have you learned?***

*What (new thing) have you learned (in the last 24 hours)?

IV. It's All About **RELATIONSHIPS**
It's All About the **NETWORK**

R.O.I.R. (Return On Investment in
Relationships) **> R.O.I.**

Investment in one's network is the ultimate ...

CAPITAL investment!

Investment in one's network should
be thoughtful, consistent ... the
opposite of "catch as catch can."

Lisa Radin: "Would you call that: 'Human Capital'?"

Call it **CAPITAL**. Period. Call it "human
capital" & accountants [damn them] will
call it "soft dollars."

Lisa Radin: "You are right."

**Is anything MORE
important than
methodical
investment in one's
Network?**

**Supremely
stupid
question.
Of course not!**

V. My Training/Development ...

Obsession

I just scored Birthday #71. I am more determined than ever to shout/scream about CEOs (and other bosses at all levels) finally “Putting People First”—as their mission statements say, but which is contradicted by their actions. As tech change accelerates, this becomes more important with each passing day.

At an event in Milan (11/05), I passed out one item to the several thousand

attendees. I labeled it my “**#1** Belief.” To wit:

Your principal moral obligation as a leader is to develop the skillset, “soft” and “hard,” of every one of the people in your charge (temporary as well as semi-permanent) to the maximum extent of your abilities. The good news: This is also the #1 mid- to long-term ... profit maximization strategy!

Related to the statement-of-principle above, I fired off (right term) on Sunday (11/03) a series of tweets on training. Herewith:

Is your CTO/Chief Training Officer your top paid “C-level” job (other than CEO/COO)?

If not, why not?

Are your top trainers paid as much as your top marketers?

If not, why not?

**Are your training courses
so good they make you
giggle?**

If not, why not?

Randomly stop an employee in the hall: Can she/he describe her/his development plan for the next 12 months?

If not, why not?

Sunday/NFL game day (as this was written): “Players are our most important asset.” “No shit, Sherlock.” Football is a competitive BUSINESS.

If “people first” is obvious for them, why not you?

Study/inhale Matthew Kelly’s book *The Dream Manager*. It’s about a fictional sanitary services company. But it’s not fictional. I met the company’s CEO.

If them, why not you?

Check out a Marine E-6 (senior sergeant): Ask him/her about training and development objectives, and the intensity of the approach thereto.

If him, why not you?

Want to understand training in a super high-tech business? Talk to the commanding officer (effectively CTO) of a “boomer”/U.S. Navy nuclear sub patrolling the sea with nuclear-armed missiles on board.

If them, why not you?

*Is your **CTO/Chief Training Officer** your top paid “C-level” job (other than CEO/COO)?*

Are your top trainers paid/cherished as much as your top marketers/engineers?

(I would guess that most CEOs see IT investments as a “strategic necessity,” but see training expenses as “a necessary evil.”—TP)

(“In a connected economy, an employee investment is also a company brand investment.”—Vala Afshar)

Addendum: Training Is **Not** a “Do To”:

The-Prep-Is-**The-Thing!**

Sochi Olympics should remind us that extensive training is

not something bosses “do to” people.

Training = Success.

Junior/senior. Age 17 (young Olympian) or 71 (me).

(My take: Many [most?] organizations training treated de facto penalty administered “to” rather than a ... **magnificent** Growth **opportunity**.)

You do **not** achieve mastery during the game or the

speech or the concert. **Mastery is**
achieved (only) **in the** (invisible)
preparation stage.

*(It often seems to me that the attitude toward training is, “another damn cost item,” or “How bloody much do we have to do?” On the receiving end, given the half-assed attention to the product (the training itself), the attitude is, “How much of this shit do we have to go through?” Instead I imagine—and I think everyone should imagine—training as ... **THE COOLEST THING EVER**. The matchless opportunity to help people Grow—and to help our organization achieve Excellence, which in turn can be translated into Ecstatic Customers—and, then, Ecstatic Shareholders. This whole topic, as ordinarily approached ... **PISSES ME OFF SOOOOOO MUCH I QUAKE & SHAKE.**)*

If there is no **joy** and
exhilaration
in preparing, success odds ... **Z-E-R-O.**

**Training should be
the highlight. Event
an afterthought.** (Event
basically decided before you step in the field/stage.)

Hall of fame football coach Bill Walsh on prep: *“The score takes care of itself.”*

Basketball coach John Wooden, perhaps best coach of anything, ever:

“I was never much of a game coach, but I was a pretty good practice coach.”

Training
tippy top mgt
job: military,
cops, firemen,
arts. Corps:
mid-level
middle mgr.

For me, the pleasure is in increasing, at **1A.M.** before a 9 A.M. speech, the font size of a single word I've decided to emphasize on PowerPoint slide #39.

**My speech is effectively
over before I step on stage.**

Trevor Gay: Would rather hear ***“You clearly
prepared for that”*** than ***“That
was great!”***

Any idiot can be “psyched” & “up” when he steps on the field on game day. **Key is being “psyched” &**

**“up” & 1st on the practice
field.**

Twitter comment by org development group: *“We can help by integrating learning into work and ditching the term ‘training.’”*

NO! NO! NO!

NO cover-ups!

Training **WONDERFUL** thing!

Training **WONDERFUL** word!

Make it so **GREAT** people **BEG** for it!

I **LOVE** to train.

I **LOVE** to improve. (Age 71.)

VI. Leadership2014: Job **#1**

“Employee development” is decidedly **NOT** an HR term; it is a reason for being, along with service to one’s customers:

Your principal moral obligation as a leader is to develop the skillset, “soft” and “hard,” of every one of the people in your charge (temporary as well as semi-permanent) to the maximum extent of your abilities. The good news: This is also the #1 mid- to long-term .. profit maximization strategy!

Developing People: The Memories That Matter

“I shall tell you a great secret, my friend. Do not wait for the last judgment; it takes place every day.” —Albert Camus

In a month, as I write, I’ll be 68. No matter how hard one tries to be forward focused, at that age there is a frequent urge to “sum things up.” As one does look back, there is a certain class of memories that stand out. I know my own story—and I’ve talked to many others. When you look back at “what really matters”—it’s rarely “the numbers.” Make no mistake, as you soldier on your tiny or huge enterprise must be profitable to survive. Wanna do great things? Well, check the “cash flow” statement first. True, but still “the summing up statement” is far more about the basics of human behavior and character than about the angle of incline of a market share graph. What follows is, then, in a fashion, “the memories that matter”—or will matter. Why point this out? Because to get the tally right on this one at age 68, the sorts of things enumerated here must have been “top of mind” throughout your career—i.e., today, tomorrow, this week, this month, this year.

The “memories that matter”/that will matter:

The people you developed who went on to stellar accomplishments inside or outside the company. (A reputation as “a peerless people developer.”)

The (no more than) two or three people you developed who went on to *create* stellar institutions of their own.

The longshots (people with “a certain something”) you bet on who surprised themselves—and your peers.

Selection of General Officers in the Indian (or Any Other) Army

It occurred during a seminar in Mumbai. I was having an exchange with a senior general officer in the Indian Army. In particular, we were talking about promotions to senior rank. I said that I thought the principal criterion was not “excellence at concocting strategy” or the like. Instead, I suggested that the “one question”/the first and most important query of candidates for a senior promotion:

“In the last year [or 3 years, duration of current job], name the ... three people ... whose growth you’ve most contributed to. Please explain where they were at the beginning of the year, where they are today, and where they are heading in the next 12 months. Please explain ... in painstaking detail ... your development strategy in each case. Please tell me your biggest development disappointment—looking back, could you or would you have done anything differently? Please tell me about your greatest development triumph—and disaster—in the last five years. What are the ‘three big things’ you’ve learned about helping people grow along the way?”

“Bottom line”/Accomplishment #1 = *The people we develop who execute and carry the torch for the things we care about—and then take the organization up, up and far beyond what we or they had imagined possible.*

The sort of/character of people you hired in general. (And the bad apples you chucked out despite some stellar traits.)

The people of all stripes who 5/10/20 years later say, “You made a difference in my life,” “Your belief in me changed everything.”

A handful of projects (a half dozen at most) you doggedly pursued that still make you smile and which fundamentally changed the way things are done inside or outside the company/industry.

The supercharged camaraderie of a handful of Great Teams aiming to “change the world.”

Belly laughs at some of the stupid-insane things you and your mates tried.

Less than a closet full of “I should have ...”

A frighteningly consistent record of having invariably said, **“Go for it!”**

Not intervening in the face of considerable loss—*recognizing that to develop top talent means tolerating failures and allowing the person who screwed up to work her or his own way through and out of a self-created mess.*

A stoic unwillingness to badmouth others—even in private.

Dealing with one or more crises with particular/memorable aplomb.

Demanding ... **CIVILITY** ... regardless of circumstances.

Turning around one or two or so truly dreadful situations—and watching almost everyone involved rise to the occasion (often to their own surprise) and acquire a renewed sense of purpose in the process.

Leaving something behind of demonstrable-lasting worth. (On short as well as long assignments.)

“Unremarkable” Except For ...

I was talking with a friend about another friend. We marveled at his results—frankly, he wasn’t a very impressive fellow in the traditional “boss-like” sense. But then my friend said, **“You know, I’ve seen him working with people. He has what you’ve got to call a ‘magic touch.’ His quiet dialogues seem to leave the other person energized and confident.”**

Impressive in conventional terms?

Perhaps not.

Impressive/awesome at “people development”?

Absolutely!

And that, in the end is the “name of the Great Results Game.”

“Bottom line”: **“Unremarkable”**
except for RESULTS. A
superb people developer—
her/his folks invariably
amazed at what they’ve
been able to accomplish.

Having almost always (99% of the time) put “Quality” and “Excellence” ahead of “Quantity.” (At times an unpopular approach.)

A few “critical” instances where you stopped short and could have “done more”—but to have done so would have compromised your and your team’s character and integrity.

**A sense of time well and honorably spent.
The expression of “simple” human kindness and consideration—no matter how harried you may be/may have been.**

Understood that your demeanor/expression of character always sets the tone—especially in difficult situations.

Have never (rarely) let your external expression of enthusiasm/determination flag—the rougher the times, the more your expressed energy and bedrock optimism and sense of humor shows.

The respect of your peers.

A stoic unwillingness to badmouth others—even in private.

***An invariant creed: When something goes amiss,
“The buck stops with me;” when something goes
right, “It was their doing, not mine.”***

A Mandela-like “naïve” belief that others *will* rise to the occasion if given the opportunity.

An abiding appreciation that “tough times make the woman/man.” Expressions of character—and the moment seized—when the yogurt hits the fan and others slink into their closets or exhibit a nasty streak is the Ultimate Performance Measure.

A reputation for eschewing the “trappings of power.” (Strong self-management of tendencies toward arrogance or dismissiveness.)

Intense, even “driven” ... but not to the point of being careless of others in the process of forging ahead.

***“Life is not a journey to the grave with the intention
of arriving safely in one pretty and well preserved
piece, but to skid across the line broadside,
thoroughly used up, worn out, leaking oil, shouting
‘GERONIMO!’”***—Bill McKenna, professional motorcycle racer

Willing time and again to be surprised by ways of doing things that are inconsistent with your “certain hypotheses.”

Humility in the face of others, at every level, who know more than you about “the way things *really* are.”

Having bitten your tongue on a thousand occasions—and *listened*, really really *listened*. (And been constantly delighted when, as a result, you *invariably* learned something new and *invariably* increased your connection with the speaker.)

Unalloyed pleasure in being informed of the fallacy of your beliefs by someone 15 years your junior and several rungs below you on the hierarchical ladder.

Selflessness. (A sterling reputation as “a guy always willing to help out with alacrity despite personal cost and with no desire whatsoever to get “points” for your effort.”)

As thoughtful and respectful, or more so, toward thine “enemies” as toward friends and supporters.

Always and relentlessly put at the top of your list/any list being first and foremost ...

***“of service”* ... to your internal and external constituents. (Employees/Peers/Customers/Vendors/Community.)**

Treated the term “servant leadership” as wholly writ. (And “preached” “servant leadership” to others—new “non-managerial” hire, age 18, or old pro, age 48.)

Created the sort of workplaces you’d like your kids to inhabit. (Explicitly conscious of this “Would I want my kids to work here?” litmus test.)

A “certifiable” “nut” about quality and safety and integrity. (More or less regardless of any costs.)

A notable few circumstances where you resigned rather than compromise your bedrock beliefs.

Perfectionism just short of the paralyzing variety.

A self- and relentlessly enforced group-standard of “EXCELLENCE-in-all-we-do”/“EXCELLENCE in our behavior toward one another.”

Bon chance!

Remember: today, tomorrow, this week, this month ...

“In a way, the world is a great liar.

“It shows you it worships and admires money, but at the end of the day it doesn’t. It says it adores fame and celebrity, but it doesn’t, not really. The world admires, and wants to hold on to, and not lose, goodness. It admires virtue. At the end it gives its greatest tributes to generosity, honesty, courage, mercy, talents well used, talents that, brought into the world, make it better. That’s what it really admires. That’s what we talk about in eulogies, because that’s what’s important. We don’t say, ‘The thing about Joe was he was rich!’

“We say, if we can ...

‘The thing about Joe was he took good care of people.’”

—Peggy Noonan, “A Life’s Lesson,” on the astounding response to the passing of Tim Russert, the *Wall Street Journal*, June 21–22, 2008

VIA. Time to Revamp Leadership Training?! Start With a Quick Self-Assessment Test

Leaders should develop a vision for their enterprise, or the part thereof for which they are responsible.

Fine.

Leaders should get people excited about their work.

Fine.

Leaders should be masterful problem solvers.

Fine.

Leaders should have the highest integrity.

Fine.

Yes, all fine.

But, I contend, that's not close to being enough. In fact, I'd go so far as to say that those items, collectively, miss the boat. In fact, they're not even at the right dock.

What do leaders ... **DO?**

First and foremost they assemble and then develop a topflight team of people.

Here's the way I like to put it, which I label "Seven Steps to Sustaining Success":

You take care of the people.

The people take care of the service.

The service takes care of the customer.

The customer takes care of the profit.

The profit takes care of the re-investment.

The re-investment takes care of the re-invention.

The re-invention takes care of the future.

(And at every step the only measure is EXCELLENCE.)

The obvious point: Developing people comes first. It is the "That without which there is nothing ..."

The leader's job?

Leaders “do” people.*

(*I have a slide that says: Leaders do people. PERIOD.)

I'd been doing some serious thinking (re-thinking) about leadership when I came across *Practice Perfect: 42 Rules for Getting Better at Getting Better*, by Doug Lemov, Erica Woolway, and Katie Yezzi. It changed my life. I'm not actually sure about that, but I'm sure that it made me change my perspective. (I'd strongly urge you to read the book.)

In short, in excruciating detail, the authors make the case for directing almost all training toward the bits—not the whole. Integration must take place—but integrative training is actually wasted or even counterproductive if the pieces have not been mastered. I was already starting to head down this path, but *Practice Perfect* iced the argument.

So the story here will be simple in outline—challenging as all get out in implementation. I'm arguing—not exactly original—that leading, like football or music or theater, can be largely broken down into activities. And until those activities are trained in and practiced and more or less mastered, it's premature to deal with the high falutin' stuff like vision and values and energy and enthusiasm. (Vitaly important as these characteristics are!)

As you wade into what follows (if you choose to do so), I want to make one point clear. *Every* item below can be subject to study *and* training *and* practice *and* evaluation—e.g., re item #1, I don't want you to “get better” at listening. I want you to:

Study listening—book or video learning or some such.

Subject yourself to intense training in listening.

Practice listening ceaselessly—with effective feedback.

Then practice some more. Then take refresher training with some degree of regularity.

(Slippage for bosses, assuming they get there in the first place, is the norm, not the exception.)

The goal: Become a full-fledged “professional listener.”

Hey, God alone knows how many hours you spent learning accounting and finance, marketing, etc. I want you to direct the same abundant energy on becoming, yes, a notable professional listener.

To get at this topic in short form, I'd ask you to take a quiz and to score yourself on a scale of 10, where 1 is awful and 10 is masterful. What follows are the essence-of-leadership activities (or a rough stab at them) I'd like you to self-evaluate:

_____ I am what some call an “aggressive listener,” giving, without fail, intense, undivided attention to the speaker and very rarely interrupting; I am a visibly aggressive listener, attempting to be an implacable role model for aggressive listening.

_____ Listening is Item #1 in our set of Core Cultural Values.

_____ *I believe in “aggressive listening” so much that it is part of everyone’s evaluation and everyone must take annual refresher training in aggressive listening per se.*

_____ I am a full-fledged student of listening, aiming for the same level of “professional excellence” that I’d aim for in a specialty like marketing or finance.

_____ I am exceedingly meticulous about the exact construction of the questions I ask, always mannerly, always probing, always giving the person questioned space/time to formulate a thoughtful answer; my follow-up is not “soft” but is “supportive” to a fault. The questioning process is near the heart of effective leadership practice and I approach it with the gravity it deserves.

_____ I understand the complexity of and the power of excellent questioning skill. I am a formal student of the art and science of asking questions.

_____ I view meetings, which absorb an extraordinary amount of my time (and which always will), to be, by definition, my premier leadership opportunity; I do intense preparation for the most brief of meetings, and make it clear, beginning with body language, that I view the/any meeting as an opportunity, not an annoyance or distraction. I understand if I give off “another-damn-meeting” vibes, I will infect every participant in a flash.

_____ In meetings and every other interaction, I make it clear that we are all part of a civil society; vigorous debate is essential, but good manners, regardless of the passion for a particular position, matter a great deal.

_____ “Helping” sounds innocent/obvious, but it’s anything but; giving help must be meticulously tailored to each individual and her/his momentary circumstance. I have studied in depth the complex process of helping per se and I am able to help in a way that is useful and psychologically sound.

_____ Conversations—obviously—are the meat & potatoes, the hors d’oeuvres, main course & dessert of life. I have studied the science of conversations per se, learning and practicing the tools associated with making every communication/conversation count.

_____ *I believe in the Iron Law of Communication: Regardless of circumstances, if there is a miscommunication ... it’s my fault.*

_____ I believe in effective & extensive training with passion to the point of fanaticism. The quality of each of our training courses is routinely “breathtaking.” (And is evaluated remorselessly.) Our Chief Training Officer receives compensation and acknowledgement on a par with, say, the CFO; line trainers are chosen with the same care and rigor one would apply to hiring a research scientist.

_____ Appreciation and acknowledgement may be the most powerful forces in the universe, and I go out of my way hour by hour to connect with everyone I so much as pass in a corridor, and make them feel, by, at the very least, eye contact, that I “get” their importance to our enterprise. I have ...

studied ... appreciation/acknowledgement per se and understand analytically its stunning power.

_____ “Thank you”; I thank people for their contributions—small even more than large. Though “thank you” fits under acknowledgement, the TY words per se are “power words,” and I keep at least casual track of my daily “Thank you” score.

_____ “I’m sorry”: Effective apology, as research as well as common sense demonstrates, transforms (“transform,” strong but appropriate word) customer relationships and relationships among peers; I go out of my way to take rapid and visible responsibility for and the initiative in addressing the slightest of real or perceived screw-ups. Moreover, I have instilled recognition of the astounding power of this “tactic” throughout our group/workforce.

_____ I am always on the prowl for people who, unbidden, are routinely helpful to others, who will drop their own precious task in a flash to give a helping hand to someone who needs a hand at a critical moment. I make it clear that mutual helpfulness is a core “cultural” trait, which will be routinely acknowledged and formally taken into account in all evaluations.

I believe in effective & extensive training with passion to the point of fanaticism. The quality of each of our training courses is routinely “breathtaking.” (And is evaluated remorselessly.) Our Chief Training Officer receives compensation and acknowledgement on a par with, say, the CFO; line trainers are chosen with the same care and rigor one would apply to hiring a research scientist.

_____ **Presentation excellence. Those of us who do not do manual work “listen” and “talk” for a living; together, talking and listening constitute our profession as leaders. Intense “professional” training in both is imperative—there is nothing in the least automatic about these skills. I visibly support and require presentation training and development; and practice ceaselessly to improve my own presentation skills.**

_____ **Body language is said to account for as much as 90% of our communication effectiveness. I am a student of body language, a relentless self-observer, and assiduous in turning body language per se into a primary trait of effective leadership.**

_____ ***Many say that hiring is the most important task in the organization. Assuming that’s more or less true, I can call myself and 100% of my leader peers true “hiring professionals,” avid students and practitioners of hiring excellence.***

_____ **There is perhaps no more complex task than developing and executing an evaluation process that is a major/“Top 5” strength for our entire leadership population. (GE, incredibly, calls the evaluation process associated with its manager population the corporation’s #1 strength.) I have schooled myself in the intricacies of the evaluation process, instituted formal training in evaluation, and designed the evaluation process with the same care I would assign to, say, design of the budgetary process. All leaders are strictly evaluated on the quality of their evaluation practice.**

_____ **I acknowledge that time is my only resource—and manage accordingly. I evaluate in exacting detail my time allocation to insure that it visibly matches my espoused priorities. I evaluate daily, weekly, monthly with dispassionate rigor.**

_____ **In managing my time, I keep a substantial amount of my calendar open (25%+) in order to deal with the vagaries of the leadership job. I guard with zeal against the sin of chronic over-scheduling.**

_____ **I am expert at and an avid practitioner of MBWA/Managing By Wandering Around—the key to staying in touch and modeling core values and informally engaging employees. “Obsessive” MBWA effectively surpasses other priorities. I am thoughtful, not haphazard, in my approach to MBWA.**

_____ Am I an avid student of the process of influencing others per se—or do I trust my instincts since I’ve “been around”? There is a massive amount of research on this topic, and influencing per se should be considered a discreet skill to be studied and practiced and mastered.

_____ I have painstakingly made myself expert in understanding the complexity of the decision-making process. I am vividly aware of the (enormous!) biases that seep into the decision-making process, and work formally to address or reduce those biases—and instill this understanding and “studenthood” into 100% of the management corps.

_____ I am a brilliantly schooled and practiced student of negotiation. All jobs include at least informal daily negotiation, and negotiating skills are an implicit part of daily affairs. Training, of various degrees of intensity, is required of every manager.

_____ Do I talk ceaselessly about the importance of execution, but assume that since it is an obvious priority it does not have to be a subject of directed study? This is especially the case for young/first-time managers. Hence, the conscious management of the execution process per se is a topic of study and practice.

_____ *Do 100% of our employees have specific development plans/programs carefully designed and precisely tailored for them and on which they—and especially their managers!—are rigorously evaluated? Can any employee one stops in the hall talk cogently about her/his personal professional development plan and her/his progress thereon (and the degree to which she/he has been aided by her/his manager)? Is individual and collective and directly managed employee growth a part of our core value set?*

_____ I am excruciatingly aware of the “d”iversity of my/our team. (I call it “lower case ‘d’iversity”—not the gender/race variety, but diversity on every-damn-dimension-imaginable.) I actively ensure, for example, that every team features an exciting mix of backgrounds that enhances the likelihood of their following interesting/creative paths to developing and executing projects of every shape and size.

_____ I am fully aware through study and analysis of the power/staggering value of gender-balance from top to bottom in our organization and relative to everything we do. I have a priority strategic program for addressing this issue/preeminent opportunity.

_____ Every leader/manager is exceedingly well trained in teambuilding per se. Every manager is assessed on her/his teambuilding skills and results. Attention to teambuilding per se is on the daily agenda of every one of our leaders.

_____ I fully understand that perhaps the most important asset—and determinant of our success on so many dimensions—is the full cadre of first-line leaders. We, for example, have the most extensive and effective first-line manager/leader selection and training and development programs in our industry, so good that they make one **“gasp”!**

_____ Everyone in the organization (100%!) is trained in “business”—that is, the way a business works, including the financial aspects thereof, so that he or she can have at least a rudimentary grasp of our overall place in the world.

So: How did you do on this assessment exam?

Perhaps not all that well. While nirvana is not likely, at the very least, heightened awareness may—I dearly hope—lead you to examine your own affairs and the development of leaders throughout your organization.

I will stand by my assertion that these are the things leaders actually do—minute by minute, day after day.

I will also stand ramrod straight by my assertion that each and every one of these attributes can be rigorously studied and practiced and mastered—that not a one is “instinctive.”

The elements again, in summary form ...

“Aggressive ‘professional’ listener.”

Expert at questioning. (Questioning **“professional.”**)

Meetings as leadership opportunity #1.

Creating a “civil society.”

Expert at “helping.” (Helping **“professional.”**)

Expert at holding productive conversations.

Fanatic about clear communications.

Fanatic about training.

Master of appreciation/acknowledgement.

Effective at apology.

Creating a culture of automatic helpfulness by all to all.

Presentation excellence.

Conscious master of body language.

Master of hiring. (Hiring **“professional.”**)

Master of evaluating people.

Time manager par excellence.

Avid practitioner of MBWA/Managing By Wandering Around.

Avid student of the process of influencing others per se.

Student of decision-making and devastating impact of irrational aspects thereof.

Brilliantly schooled student of negotiation.

Creating a no-nonsense execution culture.

Meticulous about employee development/100% of staff.

Student of the power of “d”iversity (all flavors of difference).

Aggressive in pursuing gender balance.

Making team-building excellence everyone’s daily priority.

Understanding value of matchless 1st-line management.

Instilling “business sense” in one and all.

Have at it!

VII. Joy! **(Why Not?)**

FUN. JOY. WORK. *If you think the three are incompatible and you are a leader, I'd beg you to take a hike. (Seriously.)*

Is your team having FUN today?

If not, it's 100% your (leader's)

fault. Soooooo?

With the likes of the fun-joy-work quote, I'm NOT trying to inspire you!! I'm simply asking you to think about it and perhaps talk about it.

Anon. (name withheld by me): "Our IT reorg the last 3 years hasn't been fun ... and many key people have left/leaving. *The leader has stopped asking that question.*"

Fun is wholly unrelated to “funny.” To, I hope, state the obvious. And “fun” is hardly antithetical to “serious”—in fact, they are handmaidens.* (Doesn’t get much better than “serious fun.”) And it doesn’t mean that some bad days don’t simply

suck. *Instead, “deep fun” is about enjoying our teammates’ company—sharing in their successes and screw-ups; dropping what we’re doing, even when we’re on deadline, to help a teammate in a bind; seeking to change the game with our current project, even if it’s a wee project; etc.; etc.*

(*“You can’t be a serious innovator unless and until you are ready, willing, and able to seriously

play. **‘Serious play’** is not an oxymoron; it is the essence of innovation.”—Michael Schrage, *Serious Play: How the World’s Best Companies Stimulate to Innovate*)

FUN.

JOY.

WORK.

(Plausible.)

(Compatible.)

(Effective.)

(TODAY.)

VIII. The **WOW-ification** Imperative*

(*Okay. It's an ugly word. But this is *my* screed—and it works for me. You suit yourself. Many in the Twitter Gang approved—a few groaned.)

Innovation Index: *How many of your “Top Five Projects” score 8 or higher (out of 10) on a “Weird”/“Profound”/“WOW”/“Game-changer” Scale?*

WOW-ification Index: *Move every project (definition) that scores 6 or less 2 notches up on the “WOW-ification Scale” within the next two weeks. If your principal current project scores six or less, bring it up one (or two!) notches by noon on Monday. *** (**This tweet was written on a Sunday.)

MORE.
WOW.
NOW.*

***Sorry, couldn't resist.**

WOW-ish Words ...
Shamelessly Uttered By “Real People”*

Zappos’ 10 Corporate Values

“WOW!”

Deliver

through service.

Embrace and drive change.

Create fun and a little weirdness.

Be adventurous, creative, and open-minded.

Pursue growth and learning.

Build open and honest relationships with communication.

Build a positive team and family spirit.

Do more with less.

Be passionate and determined.

Be humble.

Wanted by Ogilvy & Mather International:

Trumpeter Swans

—David Ogilvy

*Is this a “Tom thing?” as some of my friends gently put it when the word “WOW” appears again in my writing. Is it an “American thing?” Sure. BUT—in this section, if you pay close attention, you’ll observe that the overwhelming majority of the authors were **NOT** American.

*“Insanely
great”* —Steve Jobs

*“Radically
thrilling”* —BMW

“Astonish me!” —Sergei Diaghlev

“Build something great!”

—Hiroshi Yamauchi/CEO Nintendo, to a game designer

“Make it immortal!”

—David Ogilvy, to an ad copywriter

“You know a design is good when you want to lick it.” —Steve Jobs

“Every project we undertake starts with the same question: ‘How can we do what has never been done before?’”

—Stuart Hornery, Lend Lease

“Let us create such a building that future generations will take us for lunatics.” —the church hierarchs at Seville

You can’t behave in a calm, rational manner. You’ve got to be out there on the lunatic fringe.” —Jack Welch

“We are crazy. We should do something when people say it is ‘crazy.’ If people say something is ‘good,’ it means someone else is already doing it.”

—Hajime Mitarai, former CEO, Canon

“We all agree your theory is crazy. The question, which divides us, is whether it is crazy enough.” —Niels Bohr, to Wolfgang Pauli

*“There’s no use trying,’ said Alice. ‘One cannot believe impossible things.’ ‘I daresay you haven’t had much practice,’ said the Queen. ‘When I was your age, I always did it for half an hour a day. **Why, sometimes I’ve believed as many as six impossible things before breakfast.’”***

—Lewis Carroll

Kevin Roberts' Credo

1. *Ready. Fire! Aim.*
2. *If it ain't broke ... Break it!*
3. *Hire crazies.*
4. *Ask dumb questions.*
5. *Pursue failure.*
6. *Lead, follow ... or get out of the way!*
7. *Spread confusion.*
8. *Ditch your office.*
9. *Read odd stuff.*
10. ***Avoid moderation!***

*“You can't behave in a calm, rational manner.
You've got to be out there on the lunatic fringe.”*

—Jack Welch

***“I WANT TO BE
THOROUGHLY USED UP
WHEN I DIE.*** ... *Life is no 'brief candle' to me. It is a*

sort of splendid torch which I have got hold of for the moment, and I want to make it burn as brightly as possible before handing it on to future generations.”

—George Bernard Shaw

*“If you ask me what I have come to do in this world,
I who am an artist, I will reply: ‘I am here
to live my life out loud.’”*

—Émile Zola

*“If I had any epitaph that I would rather have more
than any other, it would be to say that I had ...
disturbed the sleep of my
generation.”* —Adlai Stevenson

“

*Life is not a journey to the grave with the intention of arriving safely in one pretty
and well preserved piece, but to skid across the line broadside, thoroughly used up,
worn out, leaking oil, shouting*

‘GERONIMO!’”

—Bill McKenna, professional motorcycle racer

IX. Best or Bust: **1st-Line Leadership** The Heart of EXCELLENCE

Is there a “secret” to productivity and employee satisfaction? Yes! The quality of your cadre of 1st-line managers.

How do I know 1st-line managers singly/collectively are major assets?

Simple: **Ask a general or an admiral about the importance of their cadres of sergeants or chief petty officers.**

“In great armies, the job of generals is to back up their sergeants.” —COL Tom Wilhelm, from Robert Kaplan, “The Man Who Would Be Khan,” *The Atlantic*

Are you clear that a 1st-line boss is a full-fledged

LEADER? (NEVER use any other term.)

Many take 1st-line bosses “seriously.” I urge you to take the cadre thereof **INSANELY** seriously.

“People leave managers not companies.” —Dave Wheeler*

(*Among others, Wheeler’s assertion re ... **1ST-LINE LEADERSHIP** ... supported by Buckingham & Coffman’s masterwork, *First, Break All the Rules: What the World’s Greatest Managers Do Differently*.)

*“In great
armies, the
job of
generals is to
back up their
sergeants.”*

—COL Tom Wilhelm (*The Atlantic* via Robert Kaplan)

10 Questions Concerning Your First-line Supervisors

1. Are you, Big Boss, a ... *formal student* ... of first-line supervisor behavioral excellence? (*Yes, this sort of thing can be formally studied.)
2. Do you absolutely understand and act upon the fact that the first-line boss is the ... **KEY LEADERSHIP ROLE** ... in the organization? Technical mastery is important—but secondary.
3. Does HR single out first-line supervisors individually and collectively for tracking purposes and special/“over the top” developmental attention?
4. Do you spend gobs and gobs (and then more and more gobs and gobs) of time ... *selecting* ... the first-line supervisors? Are your selection criteria consistent with the enormity of the impact that first-line bosses will subsequently have?
5. Do you have the ... **ABSOLUTE BEST TRAINING & CONTINUING DEVELOPMENT PROGRAMS IN THE INDUSTRY** (or some subset thereof) ... for first-line supervisors?
6. Do you formally and rigorously ... **MENTOR** ... first-line supervisors?
7. Are you willing, pain notwithstanding, to ... leave a first-line supervisor slot open ... until you can fill the slot with somebody spectacular? (And are you willing to use some word like ... “*spectacular*” ... in judging applicants for the job?)
8. ***Is it possible that ... PROMOTION DECISIONS ... for first-line supervisors are as, or even more, important than promotion decisions for the likes of VP slots?*** (Hint: Yes.)
9. Do you consider and evaluate the quality of your ... *full set*/**CADRE** of first-line supervisors?
10. Are your first-line supervisors accorded the respect that the power of their position merits?

*Is there ONE
“secret” to
productivity and
employee
satisfaction?*

YES!

*The Quality of your
Full Cadre of ...
1st-line Leaders.*

Suggested addition to your Statement of Core Values:

“*We are obsessed with developing a cadre of first-line managers that is second to none—we understand that this cadre per se is arguably one of our top two or three most important ...*

‘*STRATEGIC ASSETS.*’”

Selecting That (**SUPERSTAR**) 1st-line Leader

Promotion Decisions: *“life
and death
decisions”*

“A man should never be promoted to a managerial position if his vision focuses on people’s weaknesses rather than on their strengths.”

X. The “S-Train” Imperative

The “S train”: SM/Social Media. SX/Social

eXecutives. SE/Social Employees.

SO/Social Organization. SB/Social

Business. Any way you look at it, it’s a full-fledged ... REVOLUTION!

It is axiomatic: SM/Social Media is wasted (almost a “total waste”?) without SE/Social Employees & SX/Social eXecutives & SO/Social Organization.

Can you have “social hot spots” in an organization & still play the Social Business Game effectively? I mostly don’t think so. It’s pretty close to “all or nothing.”

Can you have a “social business” if the CEO doesn’t play (i.e., is not a “Social eXecutive”)? I border on saying/believing “No way!”

The CEO should focus continuous/concentrated energy on creating/maintaining/

adjusting the culture: **SM/SX/SE/**

SO/SB ... is a

**“culture play,” pure
and simple.**

Whole point of an effective Social Business: Everyone plays.

*Marketing is the least
of it.* (Yes, I said “LEAST of it.”)

*EVERY function
plays a crucial role.
The interaction PER
SE puts the value
added into the value
added proposition.*

Power of the “social” is aborted if several bits/functions de facto or de jure opt out.

HR by definition is (should be!) at the center of the vortex if you truly want everyone to play ... The Great Social Game.

Can there be vigorous tension/disagreement within a committed Social Org? Not only “Yes” but “Damn well better be.” That’s the true nature of the Value Add.

Biz 2014: Get Aboard the “S-Train”!

SM/Social Media.

SX/Social eXecutives.

SE/Social Employees.

SO/Social Organization.

SB/Social Business.

SocialBiz 2017: No Option!

*“Branding” is about
Everything AND
Everyone =

Social Executives/
Social Employees/
Social Organization/
Social Business =
Table stakes by 2017.*

A Few of My Favorite **“Social”** Quotes

Winning in Marketplace2014/A “Helping” Ethos!

“Today, despite the fact that we’re just a little swimming pool company in Virginia, we have the most trafficked swimming pool website in the world. Five years ago, if you’d asked me and my business partners what we do, the answer would have been simple, ‘We build in-ground fiberglass swimming pools’ Now we say, ‘We are the best teachers in the world on the subject of fiberglass swimming pools, and we happen to build them as well.’”—Marcus Sheridan, River Pools and Spas (from Jay Baer, *Youtility: Why Smart Marketing Is About Help, Not Hype*)

*“What if instead of trying to be ‘amazing’ you just focused on being useful? What if you decided to inform rather than promote? You know that expression, ‘If you give a man a fish, you feed him for a day. If you teach a man to fish, you feed him for a lifetime’? Well, the same is true for marketing: If you sell something, you make a customer today; if you help someone, you make a customer for life. I call this ‘Youtility.’ **Youtility is marketing upside down. Instead of marketing that’s needed by companies, Youtility is marketing that’s wanted by customers. Youtility is massively useful information, provided for free, that creates longterm trust and kinship between your company and your customers. ... The way customers gather information about companies and make purchase decisions has changed. ...**”*

—Jay Baer, *Youtility: Why Smart Marketing Is About Help, Not Hype*

*“We are the best
teachers in the
world on the
subject of fiberglass
swimming pools, and
we happen to build
them as well.”* —Marcus Sheridan,

River Pools and Spas (Apologies for stating the obvious: The point here is underscoring the possibility of a “pipsqueak” company becoming ... **CENTER-OF-THE-UNIVERSE** ... relative to its area of expertise.)

Marbles, a Ball, and Social Employees at IBM*

“Picture a ball and a bag of marbles side by side. The two items might have the same volume—that is, if you dropped them into a bucket, they would displace the same

*amount of water. **The difference, however, lies in the surface area, because a bag of marbles is comprised of several individual pieces, the combined surface area of all the marbles far outstrips the surface area of a single ball. The expanded surface area represents a social brand’s increased diversity. These surfaces connect and interact with each other in unique ways, offering customers and employees alike a variety of paths toward a myriad of solutions.** If none of the paths prove to be suitable, social employees can carve out new paths on their own.”*

—Ethan McCarty, Director of Enterprise Social Strategy, IBM (from Cheryl Burgess & Mark Burgess, *The Social Employee*)

*FYI: This is simply ... **THE BEST DEFINITION OF SOCIAL BUSINESS** ... I’ve seen anywhere.

IBM Social Business Markers/2005-2012

- *433,000 employees on IBM Connection
- *26,000 individual blogs
- ***91,000 communities**
- *62, 000 wikis
- *50,000,000 IMs/day
- *200,000 employees on Facebook
- *295,000 employees/800,000 followers
of the brand
- *35,000 on Twitter

Source: IBM case, in Cheryl Burgess & Mark Burgess, *The Social Employee*

The “Connection Machine”

*“Once thinking is public, connections take over. Anyone who’s Googled a favorite hobby, food, or political subject has discovered some teeming site devoted to servicing the infinitesimal fraction of the public that shares their otherwise obscure obsession. (Mine: guitar pedals, modular origami, and the 1970s anime show Battle of the Planets.) **Propelled by the hyperlink, the Internet is a connection-making machine. And making connections is a big deal in the history of thought.**”*

—Clive Thompson, “THINKING OUT LOUD: How Successful Networks Nurture Good Ideas,” *Atlantic*/10.13

Seven Characteristics of the Social Employee

1. **Engaged**
2. **Expects Integration of the Personal and Professional**
3. **Buys into the Brand's Story**
4. **Born Collaborator**
5. **Listens**
6. **Customer-Centric**
7. **Empowered Change Agent** [TP: A bazillion miles beyond lip service!]

The Emergent Meaning of “Engagement”

“Customer engagement is moving from relatively isolated market transactions to deeply connected and sustained social relationships. This basic change in how we do business will make an impact on just about everything we do.”—Dion Hinchcliffe & Peter Kim, *Social Business By Design: Transformative Social Media Strategies for the Connected Company*

Social Business:

*Empowerment
on steroids!*

XI. Cross-functional EXCELLENCE

“Allied commands depend on mutual confidence, and this confidence is gained, above all, through the development of friendships.”—General D.D. Eisenhower

“I got to know his secretaries.” —Dick Parsons
(former CEO Time Warner, on the key to successfully fending off raider Carl Ichan)

Look at any organizational failure, and poor cross-functional integration is more often than not the *chief* culprit. (A strong assertion, I’d be the first to acknowledge—but based on one hell of a lot of observation.) Within an engineering company, for example, research, marketing and finance are routinely at each other’s throats—and the result is, say, that a critical new product comes to market 12 months late. Or take the local police and federal police: Each doubtless has the fight against terrorism as their pre-eminent goal — but frequently refuse to share all their data with one another.

Strategic advantage #1:

“Let’s do lunch.”

I chose in introducing this topic the word “excellence,” as in “cross-functional

excellence,” or, as I prefer ... **XFX**. That is, the idea here is *not* merely about “removing barriers.” It *is* about what I sincerely believe is no less than the No. 1 opportunity to achieve competitive dominance—e.g., cut that new-product development by, perhaps, 50 percent or even more.

I have the utmost respect for Oracle and SAP. But this is not primarily a software issue. Or, rather, it is—but a *softer* form of software. Secret #1 (yes, I’ll go that far) is “*Let’s do lunch.*” In fact I insist, or would if I could, that bosses literally *measure* their direct reports on the number of lunches per month they have with members of other functions!

It works like this: *Joe in procurement invites Sam in finance to lunch. Odds are high that along the way they discover a host of connections—e.g., both have eighth-graders in the same school. Joe-the-professional will still tenaciously represent his “function,” and Sam his—but the tenor of interactions is likely to change significantly, if not dramatically, from “gotcha” to something approaching “How can we colleagues jointly add maximum value—or at least eliminate the wasteful and long-term pollution that accompanies posturing and other petty inter-departmental bullshit?”*

Or this: *“They brainstormed about how to turn around this [catastrophic] mis-understanding, and came up with a simple plan—every day for the next three months she would have lunch or coffee with one of the partners. Today she is executive vice president for [a Fortune 50 company].”* —Betsy Myers, an extraordinarily talented professional who had been blocked from leadership positions in her firm, from *Take the Lead: Motivate, Inspire, and Bring Out the Best in Yourself and Everyone Around You* (A talented partner at a prestigious law firm kept missing the promotions she clearly was due. After some analysis and coaching, it appeared that she had her head down working hard and effectively—but had not bothered to bond with her fellow partners; she assumed that the clearly brilliant work would stand on its own.)

I call things like “doing lunch” the ... *“social accelerators”* ... of cross-functional excellence. I can muster a list of a in a flash—e.g., present small *weekly* awards to those in other functions who have helped your team-function move forward. One should not promise miracles lightly, but taken together these notions—a sample of which follow—can lead to miracles of the first order.

AFX/Cross-Functional EXCELLENCE:

Typical Social Accelerators

New product 9 months late to market? Sloppy response to a customer problem? Missed deadlines our de facto trademark? A dark cloud always seems to hover over head? The problem-behind-the-problem is almost always the same: Screwed up cross-functional co-ordination. The answer is not primarily a mega-investment in new “enterprise software,” or some such. The answer is a culture of mutual support. Which is to say the answer is ... SOCIAL ... not technical. To smooth the ties, to make cross-functional cooperation a primo source of value added rather than pain, requires paying rapt attention to what I’ve come to call the “AFX Social Accelerators.” Herein a sample:

- 1. EVERYONE’s [more or less] JOB #1: Make friends in other functions!**
(Purposefully. Consistently. Measurably.)
- 2. “Do lunch” with people in other functions!! Frequently!! (Minimum 10% to 25% for everyone? Measured.)**
- 3. Ask peers in other functions for references so you can become conversant in their world. (It’s one helluva sign of ... GIVE-A-DAMN-ism.)**
- 4. Religiously invite counterparts in other functions to your team meetings. Ask them to present “cool stuff” from “their world” to your group.**
- 5. PROACTIVELY SEEK EXAMPLES OF “TINY” ACTS OF “AFX” TO ACKNOWLEDGE—PRIVATELY AND PUBLICALLY. (Bosses: ONCE A DAY ... make a short call or visit or send an email of “Thanks” for some sort of AFX gesture by your folks and some other function’s folks.)**
- 6. Present counterparts in other functions awards for service to your group. Tiny awards at least weekly; and an “Annual All-Star Supporters [from other groups] Banquet” modeled after superstar salesperson banquets.**
- 7. Routinely discuss—A SEPARATE AGENDA ITEM—good and problematic acts of cross-functional cooperation at every Team Meeting.**

**Job #1/
EVERY ONE
OF US: Make
friends
in other
functions! ***

***(*Purposefully. Consistently.
Measurably.)***

8. When someone in another function asks for assistance, respond with ... more ... alacrity than you would if it were the person in the cubicle next to yours—or even more than you would for a key external customer. (Remember, XFX is the key to Customer Retention which is in turn the key to “all good things.”)

9. Do not bad mouth ... “the damned accountants,” “the bloody HR guy.” Ever. (Bosses: Severe penalties for this—including public tongue-lashings.)

10. Get physical! “Co-location” may well be the most powerful “culture change lever.” Physical X-functional proximity is almost a ... guarantee ... of remarkably improved cooperation—to aid this one needs flexible workspaces that can be mobilized for a team in a flash.

11. Establish “adhocracy” as S.O.P. To improve the new “X-functional Culture” (and business results), little XF teams should be formed on the spot to deal with an urgent issue—they may live for but ten days, but it helps the XF habit, making it normal to be “working the XF way.”

12. Early project “management” experience. Within days, literally, of coming aboard folks should be “running” some bit of of a bit of a bit a project, working with folks from other functions—hence, “all this” becomes as natural as breathing.

13. Work proactively to give as large as possible numbers of people temporary assignments in other functions—especially Finance.

14. “Get ’em out with the customer.” Rarely does the accountant or bench scientist call on the customer. Reverse that. Give everyone more or less regular “customer-facing experiences.” She or he learns quickly that the customer is not interested in our in-house turf battles!

15. Formal evaluations. Everyone, starting with the receptionist, should have a significant XF rating component in their evaluation. (The “XFX Performance” should be among the Top 3 items in all managers’ evaluations.)

16. Consider creating a special role, or even position. Specialty chemical company Buckman Labs established “*knowledge transfer facilitators*,” effectively former “middle managers,” with 100% of discretionary pay based on success at spurring integration across previously impermeable barriers.

17. **Every functional unit should have strict and extensive measures of “customer satisfaction” based on evaluations from other functions of its usefulness and effectiveness and value-added to the enterprise as a whole.**

18. Demand XF experience for, especially, senior jobs. For example, the U.S. military requires all would-be generals and admirals to have served a full tour in a job whose only goals were cross-functional achievements.

19. “Deep dip.” Dive three levels down in the organization to fill a senior role with some one who has been noticeably pro-active on adding value via excellent cross-functional integration.

20. XFX is ... PERSONAL ... as well as about organizational effectiveness. PFXF [Personal XFX] is arguably the #1 Accelerant to personal success—in terms of organizational career, freelancer/Brand You, or as entrepreneur.

21. **EXCELLENCE!** There is a “*State of XF Excellence*” per se. Talk it up constantly. Pursue it relentlessly. Aspire to nothing less.

**THE WHOLE POINT HERE IS
THAT “XFX” IS ALMOST
CERTAINLY THE #1
OPPORTUNITY FOR
STRATEGIC
DIFFERENTIATION. WHILE
MANY WOULD LIKELY
AGREE, IN OUR MOMENT-TO-
MOMENT AFFAIRS, XFX PER
SE IS NOT SO OFTEN VISIBLY
& PERPETUALLY AT THE TOP
OF EVERY AGENDA. I ARGUE
HERE FOR NO LESS THAN ...**

**VISIBLE.
CONSTANT.
OBSESSION.**

Suggested Core Value: *“We will not rest until seamless cross-functional integration/ communication has become our primary source of value-added. EXCELLENCE in cross-functional integration shall become a daily operational passion for 100% of us.”*

“Social” RULES: A General Primer On “Social” POWER

“Courtesies of a small and trivial character are the ones which strike deepest in the grateful and appreciating heart.”

—Henry Clay, American Statesman/1777-1852

“When dealing with people, remember you are not dealing with creatures of logic, but with creatures of emotion, creatures bristling with prejudice and motivated by pride and vanity.”

—Dale Carnegie

“Personal relationships are the fertile soil from which all advancement, all success, all achievement in real life grow.”

—Ben Stein

“Let’s not forget that small emotions are the great captains of our lives.” —Van Gogh

“The ‘golden rule’ is of no use whatsoever unless you realize it is your move.”—Frank Crane

“The terms ‘hard facts,’ and ‘the soft stuff’ used in business imply that data are somehow real and strong while emotions are weak and less important.”—George Kohlrieser, *Hostage at the Table* (Kohlrieser is a hostage negotiator and professor of management)

“Courtesies of a small and trivial character are the ones which strike deepest in the grateful and appreciating heart.”

—Henry Clay, American Statesman/1777-1852/epigraph for *The Little BIG Things*

“They brainstormed about how to turn this [catastrophic] misunderstanding around, and came up with a simple plan— every day for the next three months she would have lunch or coffee with one of the partners. Today she is executive vice president for [Fortune 50 company].”—Betsy Myers, on an extraordinarily talented professional who had been blocked from leadership positions in her firm, from *Take the Lead*

“Allied commands depend on mutual confidence and this confidence is gained, above all through the development of friendships.”

—General D.D. Eisenhower, in *Armchair General** (*“Perhaps DDE’s most outstanding ability [at West Point] was the ease with which he made friends and earned the trust of fellow cadets who came from widely varied backgrounds; it was a quality that would pay great dividends during his future coalition command.”)

“Keep a short enemies list. One enemy can do more damage than the good done by a hundred friends.” —Bill Walsh, *The Score Takes Care of Itself* (Walsh was the San Francisco 49ers Hall of Fame coach.)

“Appreciative words are the most powerful force for good on earth.” —George W. Crane, physician, columnist

“The two most powerful things in existence: a kind word and a thoughtful gesture.”

—Ken Langone, co-founder, Home Depot

“The deepest human need is the need to be appreciated.”

—William James

“I denied myself the pleasure of contradicting him abruptly and of showing immediately some absurdity in his proposition; and in answering I began by observing that in certain cases or circumstances his opinion would be right, but that in the present case there ‘appeared’ or ‘seemed to me’ some difference, etc. The conversation I engaged in went more pleasantly; the modest way in which I proposed my opinions procured them a readier reception and less contradiction; I had less mortification when I was found to be in the wrong, and I more easily prevailed with others to give up their mistakes and join with me when I happened to be in the right.” —Benjamin Franklin

“One kind word can warm three winter months.” — Japanese Proverb

“I can live for two months on a good compliment.” —Mark Twain

“I regard apologizing as the most magical, healing, restorative gesture human beings can make. It is the centerpiece of my work with executives who want to get better.”

*—Marshall Goldsmith, *What Got You Here Won’t Get You There: How Successful People Become Even More Successful.**

***“I am ... hundreds of times
better ... here because of the
support system. It’s like you are***

***working in an organism; you are not a single cell
when you are out there practicing.”*** —Dr. Nina Schwenk,
comparing Mayo Clinic to her prior assignment, quoted in Chapter 3, “Practicing
Team Medicine,” from Leonard Berry & Kent Seltman’s *Management Lessons
From Mayo Clinic* (Dr. William Mayo formally introduced de facto team medicine—
“medicine as a co-operative science”—in 1910. Team medicine is arguably the
centerpiece of Mayo’s exceptional record; those who don’t get with the program are
disciplined or even dismissed—including prominent M.D.s.)

***“When I was in medical school, I spent hundreds of
hours looking into a microscope—a skill I never
needed to know or ever use. Yet I didn't
have a single class that
taught me communication or
teamwork skills—something
I need every day I walk into
the hospital.”*** —Peter Pronovost, *Safe Patients, Smart*

Hospitals (Pronovost, a Johns Hopkins M.D., is the creator of the “checklist”
approach to improved patient safety, made famous in Atul Gawande’s book *The
Checklist Manifesto*. Pronovost is responsible for saving many thousands of lives.)

XII. The “Sharing Economy”

The “sharing economy” is the rage—and, indeed, it is the real thing. The idea stems from an eternal verity. E.g., the quote below dates to 1868:

*“Cast your
bread upon
the waters &
it will come
back
battered.”*

—Louisa May Alcott

**Sharing matters.
Now more than ever.
(It's a "*Share or
else*" economy.)
Sharing is ... fun.
Sharing is ...
contagious.
Sharing ... works.
Gear up.
SHARE.
NOW.**

XIII. The (All Powerful) “Hang Out Axiom”: Diversity (“lower case ‘d’” diversity) Rules

In every aspect of life, achieving true diversity is a winning strategy. And it must be constantly worked at. Homogeneity is always the default state.

I call it “lower case ‘d’ diversity”: diversity on any damned dimension you can imagine.

I call it the “squint test.” *Forget quotas, but when you squint at an exec team photo, it ought to look more or less (more more than less) like the market being served.*

Squint test redux: **Women buy the lion’s share of retail AND commercial goods.* Does your top team reflect that? (*If it doesn’t, you’re an ... idiot.*)**

Diversity battlecry: Fight RHS! (Rampant Homogeneity Syndrome.)

Gary Hamel: “The bottleneck is at the top of the bottle.” Worst cases of RHS/Rampant Homogeneity Syndrome are boards and top teams.

Diversity: “You will become like the five people you associate with the most; this can be either a blessing or a curse.”—Billy Cox

“You are what you eat.”—Victor Lindlahr/nutritionist/1942 “You ARE who you hang out with.”—T. Peters

(* “Forget China,
India, and the
Internet: Economic
Growth Is Driven by
Women. ”)
—Headline, *Economist*

Diversity: *“It is hardly possible to overrate the value of placing human beings in contact with persons dis-similar to themselves, and with modes of thought and action unlike those with which they are familiar. Such communication has always been, and is peculiarly in the present age, one of the primary sources of progress.”* —John Stuart Mill (1806-1873)

Diversity: *Hang out with cool and thou shalt become more cool. Hang out with dull and thou shalt become more dull.*

Diversity: *Your “hang out with” “portfolio” can/should be as carefully concocted/managed/measured as your strategic plan—it IS your de facto strategic plan!*

Diversity: *Every relationship-partnership decision (employee/vendor/customer/etc.) is a strategic decision: “Innovate, ‘Yes’ or ‘No.’”*

Diversity: *“The bottleneck is at the top of the bottle. Where are you likely to find people with the least diversity of experience, the largest investment in the past, and the greatest reverence for industry dogma? **At the top!**”*

—Gary Hamel*

*Ouch  (And oh-so-TRUE.)

“Diverse groups of problem solvers—groups of people with diverse tools—consistently outperformed groups of the best and the brightest. If I formed two groups, one random (and therefore diverse) and one consisting of the best individual performers, the first group almost always did better. ...

DIVERSITY
TRUMPED
ABILITY.”

—Scott Page, *The Difference: How the Power of Diversity Creates Better Groups, Firms, Schools, and Societies*

Diversity matters: Boards. Exec teams. Customers. Vendors. Consultants. Employees. Benchmarks. Who you go to lunch with. Etc.

Diversity: “Future-defining customers may account for only 2-3% of total, but represent a crucial window on the future.”—A. Slywotzky

Diversity: “Don’t benchmark, ‘Futuremark’!” (Source unk.) (Tomorrow is being played out today ... SOMEWHERE.)

Diversity: “Don’t benchmark, ‘Othermark’!” (Source unk.) (Look waaaay outside your industry for lessons.)

Diversity: “Companies have defined so much ‘best practice’ that they are now more or less identical.”—Jesper Kunde/*Unique Now or Never*

**Diversity: “While everything may be better, it is also increasingly the same.”
—P. Goldberger on retail, “The Sameness of Things,” *NYTimes***

Diversity: “*The short road to ruin is to emulate the methods of your adversary.*” —Winston Churchill

Diversity seeking: “*Do one thing every day that scares you.*” —Eleanor Roosevelt*

(*This is INCREDIBLY hard.)

Diversity seeking: **HIRE (explicitly)** for ...

curiosity.

Diversity seeking: **PROMOTE (explicitly)** for ...

curiosity.

23 Flavors of “Hanging Out”*

- *Customers**
- *Vendors**
- *Out-sourcing Partners**
- *Acquisitions**
- *Purposeful “Theft”**
- *Diversity/“d”iversity**
- *Diversity/Women**
- *Diversity/Crowd-sourcing**
- *Diversity/Weird**
- *Diversity/“Deep-dip” Promotions**
- *Benchmarks**
- *Curiosity**
- *Calendar**
- *MBWA**
- *Lunch/General**
- *Lunch/Other Functions**

- *Top Team**
- *Board of Directors**
- *“Brand You”**
- *Anti-gravity/Solitude**

***From my paper, “Innovation Strategy Mainstay: The ‘Hang Out’ Axiom” (available at tompeters.co)**

220 = 220 = #1

About 220 work days per year.

Hence: 220 **lunches** per year.

Hence: 220 “hang out” opportunities ... served up on a platter.

Lunch hour passes solo: Hang out opportunity lost forever.

Lunch with pals: Expand-through-new-hangouts opportunity lost forever.

Lost lunch = Evaporated-gone-kaput-wasted opportunity to raise one’s I2Q/Innovator’s IQ.

220 lunches = **#1***

**STRATEGIC Growth
Opportunity?**

(*NO KIDDING!)

Diversity battlecry: *Fight ...* **RHS!**

*(Rampant
Homogeneity
Syndrome.)*

Diversity/“Hang Out Axiom”/Billy Cox: *“You will
become like the five
people you associate
with the most; this
can be either a
blessing or a curse.”*

XIV. The Ultimate Truth-teller: **TIME!**

Your calendar never lies.

Your calendar always

knows.

(Do you?????)

The way we spend our time
is our priorities.

The way we spend our time
is our “strategy.”

The way we spend our time
is what we (really) care
about.

The way we spend our time
is what we “are.”

Your calendar
NEVER lies.

PERIOD.

The Rule of **50** & the Power of Daydreams

“Most managers spend a great deal of time thinking about what they plan to do, but relatively little time thinking about what

*they plan ... **not to do**.* As a result, they

become so caught up ... in fighting the fires of the moment that they cannot really attend to the long-term threats and risks facing the organization. So the first soft skill of leadership the hard way is to cultivate the perspective of Marcus Aurelius:

avoid busyness, free up your time, stay focused on what really matters. *Let me put it bluntly: every leader should routinely keep a substantial portion of his or her time—I would say as much as*

50 percent—unscheduled. ... *Only*

when you have substantial ‘slop’ in your schedule—unscheduled time—will you have the space to reflect on what you are doing, learn from experience, and recover from your inevitable mistakes. Leaders without such

free time end up tackling issues only when there is an immediate or visible problem. Managers’ typical response to my argument about free time is, ‘That’s all well and good, but there are things I have to do.’ Yet we waste so much time in unproductive activity—it takes an enormous effort on the part of the leader to keep free time for the truly important things.”

“The Discipline Of Daydreaming”: “Nearly every major decision of my business career was, to some degree, the result of daydreaming. ... To be sure, in every case I had to collect a lot of data, do detailed analysis, and make a data-based argument to convince superiors, colleagues and business partners. But that all came later.

*In the beginning, there was
the ... daydream.*

By daydreaming, I mean loose, unstructured thinking with no particular goal in mind. ... In fact, I think daydreaming is a distinctive mode of cognition especially well suited to the complex, ‘fuzzy’ problems that characterize a more turbulent business environment. ... Daydreaming is an effective way of coping with complexity. When a problem has a high degree of complexity, the level of detail can be overwhelming. The more one focuses on the details, the more one risks being lost

in them. ... *Every child knows how
to daydream. But many,
perhaps most, lose the
capacity as they grow up.
...”*

Source: Dov Frohman (& Robert Howard), *Leadership The Hard Way: Why Leadership Can't Be Taught—And How You Can Learn It Anyway* (Chapter 5, “The Soft Skills Of Hard Leadership”)

Calendar: **The RULE OF ONE**

*“If there is any One
‘secret’ to effectiveness, it is
concentration. Effective
executives do first things
first ... and they do
One thing at a time.”*

—Peter Drucker

Calendar Query #1

(Precisely)

*how are you
going to make
the next 15
minutes
matter?*

XV. Civility!

Marissa Mayer keeps execs waiting in place for hours for a meeting she called. (Per *Vanity Fair*) Contemptible behavior by any measure.* (*Marissa Mayer has a lot of company in the less-than-civil-behavior league. But a timely article in VF enraged me—and triggered this twitterant.)

Marissa Mayer keeps execs waiting for hours: *Can you imagine Warren Buffett doing that?*

Dave Farley: “Astonishingly rude! I gave my former CEOs 15-30 minutes, then I leave. If one tolerates rudeness (abuse), it never ends.”

No one is so good at what they do to get a bye for rude behavior. Un-productive doesn't faze me. Un-civil/purposeful incivility turns me ... purple with rage.

I'm quite sure Ms. Mayer has no interest in meeting me. I *know* I have no interest in meeting her.

As a 71-year-old, I'd prefer my tombstone *not* say, “He made a lot of \$\$\$, but at the end of the day he was a real shit.”

Reading recommendation for Ms. Mayer: *Rules of Civil Behavior In Company & Conversation*, by George Washington

My favorite in G.Washington's book civil behavior: ***“Always stand when someone, junior or senior, enters the room.”***

(I'm loath to admit it—but sometimes I'm distracted and violate this rule. I kick myself for days. Same with failure to make eye contact.)

Paul Walker: “And move out from behind your desk if you have one.”

John Grinnell: “Civil behavior is called civil for a reason. It's the basis of civilization. Hard earned, can be lost.”

Hyper-disciplined Marissa Mayer never keeps outsiders waiting, which makes her (hence purposeful) behavior toward insiders even more contemptible.

My rule: *More important to be on time for insider meetings than outsider meetings. (Happy insiders yield better results—which makes outsider meetings easier.)*

Tim Brander: *“Internal courtesy sets the tone for external relationships.”*

I might be tempted to keep someone waiting, but I would feel the lingering sting of my mother’s roundhouse slap and mend my ways posthaste. Dave Wheeler:

“MBMR. Management By Mom’s Rules. Good Home Training applied can be a performance multiplier and persona ‘differentiator.’”

Richard Branson: *“Respect is how to treat everyone, not just those you want to impress.”*

Stretching only a little, I'd say sales is easy if you have a reasonably good product and unreasonably good manners. :-)

Vala Afshar: ***“We are not a team because we work together. We are a team because we respect, trust, and care for each other.”***

Sunny Bindra: *“You're not ‘running late,’ you're rude and selfish.”*

Craig Lorne: *“Rudeness is lifeblood of forgetting who you serve. Good CEOs support the customers and staff and value follows.”*

Horatio Nelson: *“I have always been a quarter of an hour before my time, and it has made a man of me.”*

Since “showing up” is 80% of winning the game, we should bless the laties for making it so easy for us ontimies to win.

(For NFL nuts re this stream, Tom Landry and Bill Walsh were first and foremost gentleman. Fact: Fits comfortably with fierce competitiveness.)

*There is a
time and place
for civility. All
the time.*

Every place.

Manners =

Respect.

“M.R.I. means ‘most respectful interpretation’ of what someone’s saying to you. I don’t need everyone to be best friends, but I need to have a team with M.R.I. So you can say anything to anyone as long as you say it the right way. Maybe you need to practice with, ‘*Can you help me understand why you don’t want to do this or why you wanted to do that.*’ ... I just make it so it’s a human environment.”

—Robin Domeniconi, CMO. Rue La La, a flash sale web site (from Adam Bryant, *Quick and Nimble: Lessons from Leading CEOs on How to Create a Culture of Innovation*)

FYI/Reading recommendation: *The Manager’s Book of Decencies: How Small Gestures Build Great Companies.*—Steve Harrison, Adecco

“Simple” as **K.R.P.** (No kidding.)

“Courtesies of a small and trivial character are the ones which strike deepest in the grateful and appreciating heart.”—Henry Clay, American Statesman (1777-1852)

The above is a **STRATEGIC** statement.

(40 years of observation and participation say: *Biz is lost more through singular and collective “small” behavioral slip-ups than through performance shortfalls.*)

K = R = P

Kindness = Repeat Business = Profit.

E.g. ... *“There is a misconception that supportive interactions require more staff or more time and are therefore more costly. Although labor costs are a substantial part of any hospital budget, the interactions themselves add nothing to the budget. **KINDNESS IS FREE.**”*

Listening to patients or answering their questions costs nothing. It can be argued that negative interactions—alienating patients, being non-responsive to their needs or limiting their sense of control—can be very costly. ... Angry, frustrated or frightened patients may be combative, withdrawn and less cooperative—requiring far more time than it would have taken to

interact with them initially in a positive way.” —Putting Patients First, Susan Frampton, Laura Gilpin, Patrick Charmel (Griffin Hospital/Derby CT; Plantree Alliance)

E.g. ... *“I regard apologizing as the most magical, healing, restorative gesture human beings can make. It is the centerpiece of my work with executives who want to get better.” —Marshall Goldsmith, What Got You Here Won’t Get You There: How Successful People Become Even More Successful.*

Kindness:

Thoughtful.

Decent.

Caring.

Attentive.

Engaged.

Listens well/obsessively.

Appreciative.

Open.

Visible.

Honest.

Responsive.

On time all the time.

Apologizes with dispatch for screw-ups.

“Over”-reacts to screw-ups of any magnitude.

“Professional” in all dealings.

Optimistic.

Understands that kindness to staff breeds kindness to others/outsideers.

Applies throughout the “supply chain.”

Applies to 100% of customer’s staff.

Explicit part of values statement.

Basis for evaluation of 100% of our staff.

Kindness ... **WORKS!**

Kindness ... **PAYS!**

XVI. Politics Is Life. The Rest Is ...

The definition of politics is: The essence of getting things done.

Politics is the lifeblood of getting **ANYTHING** done.

If you dislike politics, then you dislike implementation. PERIOD.

I'm flabbergasted by anyone not understanding that to get anything done he/she must pursue/achieve mastery of politics/political process.

If you dislike politics, then it is a dreadful mistake to be in charge of anything.

To hate all politics is to hate the fact that you were born into the human race.

Politics haters are the same ones who tell the jokes about "Getting things done would be walk in the park if not for the damn people."

Glen Flook: "OMG how true-life is a political process."

Emmanuel Gobillot: "You are so right. Politics is the engine of power. Dismiss either and you are dismissing humanity's search for meaning."

The most activist political bodies I know are families with two teenage kids. Inspiring aspirations, treachery, etc., etc.

There will always be hierarchy. There will always be politics. The idea is to do it well and toward an honorable end.

Brian Scatland: "Majoring in political science served my business career better than my MBA."

Read Robert Caro's *Master of the Senate*. LBJ was a Master Scientist of political process!

Want to save the world? Polio vaccine is useless unless you master the politics of distribution in an impoverished setting!

A process not based on messy human reality is pie-in-the-sky.

*If you dislike politics, then
you dislike implementation.
PERIOD.*

*If you dislike politics, then it
is a dreadful mistake to be in
charge of anything.*

*To hate all politics is to hate
the fact that you were born
into the human race.*

If you give a shit about something, you'll automatically “go political” to gain others' support.

I've never observed a big company that's not very “political.” Great *New Yorker* article on the “new” super-companies (Google, et al.); they are fundamentally the same as old supercos in terms of hierarchy, power plays and power trips, politics.

Who says politics is not rational? An asinine notion. It's “political process,” but rational if you are a student of politics. If you're not, then leading anything is the wrong career choice.

Politics = Life:

Good restaurants.

Bad restaurants.

Good politics.

Bad politics.

Yawn.

*I'm flabbergasted
(careful word choice)
by anyone not
understanding that to
get anything done
he/she must
pursue/achieve
mastery of
politics/political
process.*

XVII. Meetings **EXCELLENCE**

Like it or lump it: Meetings are what bosses “do.” **Get over it.** Act accordingly.

THE meeting issue for boss/chair is: *Will (this meeting) be a Model of Excellence?*
“Excellence standard” applies as much to a meeting as to ballet/football.

Theater is event. Football game is event. Surgery is event. And meeting is event. It’s up to you whether the standard is mediocrity or excellence.

Meeting: “Theater of inquiry and persuasion and motivation and engagement and enhanced teamwork.”

Boss: If staff leaves “morning meeting” less than inspired ... *then you pissed the day away due to gross negligence.*

Boss: Only **ONE** key word concerning **EVERY** meeting.

PREPARATION.

Grade yourself on meeting prep today. Be tough. Odds of 4.0 GPA low.

Meetings = **#1** leadership opportunity. PERIOD.

Every meeting that does not stir the imagination and curiosity of attendees and increase bonding and cooperation and engagement and sense of worth and motivate rapid action and enhance enthusiasm is a permanently lost opportunity.

The key word is NOT “control.” The keyword IS “Excellence.”

Does your organization have a full-fledged training course titled “Conducting Excellent Meetings”? If not, why not?

I am not in the least bit interested in “better/well run meetings.” I am interested in “EXCELLENT meetings.” For heaven’s sake, why not?

Scheduling is your personal responsibility. A failing grade almost guarantees failing longterm performance.

Over-scheduling is a mortal, not venial, sin.

*I am not in the least
bit interested in
“better/well run
meetings.” I am
interested in
“EXCELLENT
meetings.” For
heaven’s sake,
why not?*

**Miscellany: If Your Next Meeting Fails to Excite ...
It's Your Fault/Your Irretrievable Loss!**

Going to a simple cocktail party last night, I found myself, out of habit, scripting first comments for various people. *BEGINNINGS = THE BALLGAME.*

Forget the “meat.” (More or less.) *Beginnings and endings overwhelm middles!*

Cocktail party, someone a little over their ethanol limit makes a loud-ish questionable remark as they leave—that's all you remember.

Every meeting needs an energetic-exciting start and a blow-out ending that launches the “To dos” with gusto!

Never ever begin a meeting with an insipid “Let’s get started.” Begin it with a plunge, not a tiptoe—e.g., some exciting-surprising nugget.

Perhaps begin with a show of enthusiasm, maybe a 90-second report on some little thing that went well, maybe with a kudo to someone at the meeting.

You damn well better believe that superb beginnings and inspiring endings do not occur by accident!

Right before a meeting ends, quickly ask each person how he or she FEELS about the takeaways. Deal now with frowns/dis-engagement.

Thank *EACH* person, with a specific reference, usually in public, for their contribution to the meeting being wrapped up.

And if you’ve got a mega-frowner who didn’t speak up, try to casually/unobtrusively catch him/her for a moment as you leave.

At the end of the day, send 2 or 3 notes (or emails) thanking, again, individuals for their contributions.

FYI: Remember, one person’s humorous remark is another person’s insult. “Humorous” remarks should NEVER be at someone else’s expense!!!! (You’d be astonished at the # of “micro-digs” if you bothered to keep track.)

XVIII. Email **Excellence** (Why Not?)

17 January 2014: Thank you Chris Christie: Anyone who puts anything in any email that might embarrass him/her next week, next month, in 2024, is an ... IDIOT.

A sloppy* email is a total piece of

crap. STOP!

(*Sloppy: Ungrammatical. Poorly argued. Equivocal—could be interpreted multiple ways. Flippantly critical of someone/anyone. Rude. Etc. Etc. I.e., “unprofessional.”)

On The Ball Theory: “Write, rewrite, wait, and then send—the modern version of think before you speak!”

Assume your boss’s boss will read any email you write.

Assume your least supportive colleagues will read any email you write.

Assume one or > one customer will read any email you write.

Assume that any “clever” email you write will go viral.

(Assume your mom will read any email you write. Sorry, couldn't resist.)

Medieval times (1999): Oral hissy fit would mostly evaporate in 4-5 days. Modern times, no matter how limited the distribution, it may go viral.

Hasty emotional response is the nightmare scenario!

Same rules for “personal” emails as “professional” ones. Personal emails frequently are not personal.

EMAIL.

EXCELLENCE.

Make this duo a tautology—not an oxymoron.

Ever Heard of the ...

Instead of trying to cover a raft of issues, especially people issues, in a long email ... pick up the frigging

PHONE.

(FYI: NO “people issues” in emails. **PERIOD.**)

Ed Batista: “The (illusory) feeling that we **MUST** communicate **NOW** causes so many interactions to go awry. It can wait, really, it can.”

Twitter comment: “Or knock on the door.”

On the phone you can add 20 degrees nuance in 15 minutes—rather than perhaps coming across as intractable via hard-copy email.

XIX. The Response **Is** The Problem

I call it ... **Service Rule #1A**

*The problem is rarely/never the problem. The response to the problem invariably ends up being the real problem.**

*This sounds like an exaggeration. It is ... **NOT**. From screwed-up U.S. presidencies to losing multi-billion \$\$ sales, it seems invariably to be a clumsy response to something (initially) relatively “small” that sets in motion a full-fledged meltdown.

(FYI: Fixing stuff gone wrong by “overdoing it”: Research shows it costs about **5X more to acquire a new customer than it does to hold on to an existing customers—in many industries it’s more like **500X!**)**

Service Rule #1B

The 3-minute Rule

*There once was a time when a three-minute phone call would have avoided setting off the downward spiral that resulted in a complete rupture.**

*So make the call. Set aside—**IN AN ORGANIZED FASHION**—a time block to make such calls.

(“I regard apologizing as the most magical, healing, restorative gesture human beings can make. It is the ...
CENTERPIECE ...
of my work with executives who want to get better.”

—Marshall Goldsmith, *What Got You Here Won't Get You There: How Successful People Become Even More Successful.*)

Service Rule **#1C** Employees **FIRST!**

David Spellman:

*“Customers
will only love
a company
that loves its
employees.”*

BCMac: *“My corollary is,
‘How we treat one
another is ultimately
how we treat the
clients.’”*

Vala Afshar: *“I’ve always said
‘You can’t remain a
great company on the
outside if you aren’t
one on the inside.’”*

TP/FYI: This is **NOT** guru bullshit. This is hard-nosed fact.

Service Rule **#1D**

ADDICTED to Helping

Twitter comment: “If a window of opportunity opens, do not pass it by or close it.”

There is no “if”: A “window of opportunity” opens

EVERY day for

EVERY one of us—e.g., helping someone

out, unbidden, for 10 minutes.

If you don’t help someone out in some little way every day (at work) you are only half a human.

Instinctively helping others at work (little hand on little thing) single best builder positive/people-centric/customer-centric culture.

“Helping” (on every dimension and throughout our community of stakeholders) is not “soft.” It is the core of a profit-maximizing STRATEGY.

“Stuff” like listening and helping are core of STRATEGY. (Not mere tactics.)

Doug Shaw: “I have a few key principles I operate by. *Offering help is the first one.* That's where it all starts.”

(Doug Shaw: “Here's the full set. Offer help. Experiment. Stay in touch. Speak your mind. Lead by example. Be genuinely interested in people.”)

Helping someone out is not “nice”—as a practice, it is a CSA/Core Strategic Asset.

Vala Afshar: “If you are not helpful, you are not influential.”

Patricia Martin: “Small stuff done well breeds confidence and opens field of possibilities, too.”

We're looking to establish a full-fledged ...

ADDICTION

[to helping].

Excellence is fun. “Small stuff” is more important than big stuff to make it habit-forming & spread the contagion.

Practice of Excellence: **ALL MOTIVATION IS SELF-MOTIVATION. PERIOD.**

(Boss “just” creates platform, offers encouragement.)

Vala Afshar: *“A social business feels like a village—people know your name, doors are open late, lights are always on, and people care.”*

Frankly, that's why it's [a social business] not an engineered “system,” but a way of being

*If you don't
help someone
out in some (little)
way every day
(at work) you are
only half a
human.**

***Intentionally strong language!**

XX. Christmas “Thank You” Chronicles

PLEASE consider this. Monday 23rd [December, 2013] or Fri 27th or Mon 30th or

Tues 31st: *CALL* **10-50** *people to thank*
'em for their support in 2013.

The two most important words in leader's language:

“Acknowledge” &

“Appreciate.”

So at year's end work your
ass off on acknowledgement/appreciation.

21 Dec/I have decided to bug you every day until New Year's Eve to CALL 10-50 people to thank them for their support in 2013.

David Ivers: “It works well Tom! I personally delivered to the 14 people on my team a handwritten Christmas Card with a small Lindt Chocs box.”

21 Dec/Christmas gift *from* you today. If shopping, be especially courteous to grouches and smile at stressed-out staff even if service is sub-par.

21 Dec/Best Christmas gift I've heard of this year: Customer brings a cup of coffee mid-morning to our beleaguered local postal clerk.

21 Dec/If, like many of us, you're shopping today, enjoy the madness. Engage the madness in the spirit of Christmas.

21 Dec/Saturday before Christmas. Cherish the madness. You're only here for a little while.

21 Dec/ ***Be present today.*** It's the greatest gift you can give.

21 Dec/The worse your voice, the more vigorously you should sing the Carol. It's about spirit, not 6-sigma quality.

21 Dec/Pop into a church and light a candle for someone sick today. (Even if you are a strict non-believer.)

21 Dec/Make those calls to thank people for their support. Promise: You will enjoy it immensely. (We all need a kick in the ass. Once you start, you'll really get off on it.)

21 Dec/John Barnes: ***“On your advice, I've been doing this for 3 years, always one of the professional highlights of the year.”***

Dave Wheeler: “And spend a few words/seconds to thank your frontline team individually and personally! Cost minimal. ROI monstrous!”

21 Dec/Dave: “Cost < 0 because it ends up making you feel good at least as much as recipient!”

21 Dec/Nosy me. Asked grocery checkout person how many say “Happy Holidays.” She said probably 1 in 4 or 5, “less by late afternoon.”

21 Dec/Real key is making kind comment ... **WITH EYE CONTACT** • Otherwise the gesture is diminished by three-quarters.

Trevor Gay: “Best gift I've had this Christmas was the chat I had with the homeless guy when I took my dog for walk today. Feel blessed.”

Monday 12/23: Go on a “Thank you” binge. **DAMN IT.**

The degree to which the average analytically trained businessperson fails to appreciate TYP/Thank You Power is staggering/pathetic.

Dave Wheeler: **“ And spend a few words/seconds to thank your frontline team individually and personally!**

Cost minimal.

ROI

monstrous!”

*If you feel awkward
saying “Thank
you,” it’s because
you haven’t practiced
enough.*

If you feel awkward saying “Thank you,” tell the person you are thanking that you feel awkward. Zounds. The credit you will get.

Can you say “Thank you” too much? Doubtless, yes. But in the human race’s first 60,000 or so years, no one has overdone it so far.

I worry about Syrian civil war & 7,999,999 other things. That people will say thank you too much didn’t make my “Top 8,000,000 Worries” list.

Steve Pfistner: “Ah, the joy of affirming another fellow humanoid.”

“Affirming another humanoid”—Love it!

Handwritten notes make me weak in the knees.

An “almost” guarantee: Even if your first “Thank yous” seem forced, the response will be so overwhelming that you’ll soon be in the groove.

At the very least, you can do a “*Hey, thanks, bro, somehow we survived another year.*”

Mike Ferguson: “You’re saying I have to make a call, not email, right? I thought so. Okay okay okay.”

Ever heard the phrase “*Bet your sweet ass*”?

Cindy Starks: *“This is one of those things that I just don’t understand. I’ve tried. Why is it so hard for people to say ‘Thank You’ or ‘Thanks’”?*

I am as befuddled as you are.

Drew: *“The importance of ‘Thank you’ is drilled into children, yet often lost on adults. It’s something I had to relearn.”*

Jeff Hathaway: *“Things like ‘Thank you’ should be on the list called ‘assumptions,’ especially for leaders. Maybe why the future is brighter for Women?”*

John Hinton III: *“I always say ‘Please’ and ‘Thank you.’ You never know what type of day someone is having. Best way to convey appreciation.”*

John Wheaton (engineering chief): *“#1 reason engineers leave biz is they are not appreciated.”*

Damn right, John. We engineers are human, too. :-)

John Wheaton: *“Say [‘Thank you’] in Monday meetings. Say it on rounds. The more you say it the easier it is.”*

Catherine Huggins: *“Expressing thanks is just another way of acknowledging life is bigger than any one individual.”*

Lisa Rokusek: *“Often it takes the doing of gratitude to ignite the feeling. We can’t let a lack of feeling stop us from grateful actions.”*

Lars Leafblad (Fundraiser): *“The five seconds of silence I experience when I call a donor for no other reason than thank you is deafening!”*

Trevor Gay: *“In my experience the most well received ‘Thank you’ is one for doing your routine task.”*

Amen!!!!!!! My version: No one ever has an “average day.” There’s always *something* worth noting.

“The Power of Thanks” is well supported by science, too:
[http://news.harvard.edu/gazette/story/2013/03/the-power-of-thanks/ ...](http://news.harvard.edu/gazette/story/2013/03/the-power-of-thanks/)

XXI. The (Awesome) Power of ... Acknowledgement

“The deepest principle in human nature is the craving to be appreciated.”—William James

“The two most powerful things in existence: a kind word and a thoughtful gesture.”—Ken Langone

“Good leaders make people feel that they’re at the very heart of things, not at the periphery.”—Warren Bennis

“Leadership is about how you make people feel—about you, about the project or work you’re doing together, and especially about themselves.”—Betsy Myers, *Take the Lead: Motivate, Inspire, and Bring Out the Best in Yourself and Everyone Around You*

“The philosopher Isaiah Berlin remarked that Churchill ‘idealized’ his countrymen ‘with such intensity that in the end they approached his ideal and began to see themselves as he saw them.’”—Robert Kaplan, *Warrior Politics: Why Leadership Demands a Pagan Ethos*

*“Employees who
don’t feel significant
rarely make
significant
contributions.”*

—Mark Sanborn

Night and Day: Yes, **AND** ...

“Yes, *but* ...”

(= “Thanks for the comment ... and, ahem, here is what’s **WRONG** with it ...” = **MIXED MESSAGE/NEGATIVE**.)

“Yes, **and** ...”

(= “That was an absolutely first-rate comment, **AND** perhaps **WE** could even make it better ...” = **POSITIVE**.)

FYI: This is (TRULY) a **BIG DEAL**.

The **(Awesome)** Power of Acknowledgement: **NOTEBOOK** Power

Whenever you are interviewing or meeting with someone ... carry **(without fail)** a notebook.

Take notes.

To be sure, you'll doubtless hear something worth recording. But, mainly **(without fail)** you will gain the enduring respect of the person you are interacting with.

Why?

By recording their ideas you are saying, in effect, ***“I think you have something to say worthy of recording and I wish to capture it for eternity.”***

Always carry the notebook. Take copious notes. Record info. **AND:** It's the ultimate form of flattery/acknowledgement/respect.

Joel Heffner/**Creativity Kit: Field Notes**
Notebook + Pencil

Stefan Stern: *“The bosses who don’t take notes may also be the ones who say ‘Got it!’ too quickly when in truth they aren’t really listening.”*

Sachin Shah: *“I got our EO’s asst to take notes in her meetings so she could listen. She estimated \$50k gain in her productivity.”*

Note to bosses: ***In your last conversation with an employee, how many pages of notes did you take?***

(Query to bosses: ***In your last conversation with an employee, did you listen (at least) ...***

***75%** of the time?)*

XXII. Listening Is **Job #1**/Make 2014 ...

The “Year of the Ear”

I’LL BROOK NO RETORT:REALLY: Nothing but nothing but nothing (but nothing) is more important than listening! To wit:

Listening is ...

(And when you read “listening,” please substitute “*OBSESSION* with listening.”)

Listening is ... the ultimate mark of ***Respect.***

Listening is ... the heart and soul of ***Engagement.***

Listening is ... the heart and soul of ***Kindness.***

Listening is ... the heart and soul of ***Thoughtfulness.***

Listening is ... the basis for true ***Collaboration.***

Listening is ... the basis for true ***Partnership.***

Listening is ... a ***Team Sport.***

Listening is ... a ***Developable Individual “Professional” Skill.****

(*Though women are instinctively *far* better at it than men.)

Listening is ... the basis for ***Community.***

Listening is ... the bedrock of ***Joint Ventures that work.***

Listening is ... the bedrock of ***Joint Ventures that last.***

Listening is ... the core of ***effective Cross-functional Communication****

(*Which is in turn Attribute #1 of organizational effectiveness.**)

(**I know, I keep repeating this—only because “Attribute #1” is no exaggeration.)

Listening is ... the engine of superior ***EXECUTION.***

Listening is ... the key to ***making the Sale.***

Listening is ... the key to ***Keeping the Customer’s Business.***

Listening is ... the engine of ***Network development.***

Listening is ... the engine of ***Network maintenance.***

Listening is ... the engine of ***Network expansion.***

Listening is ... ***Learning.***

Listening is ... the ***sine qua non of Renewal.***

FYI: Harvard Med School doc Jerome Groopman, in his book *How Doctors Think*, tells us that the patient is the doctor's best source of evidence about the patient's problem. Then, citing hard-nosed research, Groopman asks, “*On average, how long does the patient speak before the doc interrupts?*”

Answer?

**“18 ...
seconds.”**

“Our work, our relationships, and, in fact, our very lives succeed or fail gradually, then suddenly—one conversation at a time.”

Source: Susan Scott, *Fierce Conversations: Achieving Success at Work and in Life, One Conversation at a Time*

Listening is ... the *sine qua non* of Creativity.
Listening is ... the *sine qua non* of Innovation.
Listening is ... the core of *taking Diverse opinions aboard*.
Listening is ... *Strategy*.
Listening is ... *Source #1 of "Value-added."*

Listening is ... ***Differentiator #1.***

Listening is ... ***Profitable.****

(*The "R.O.I." from listening is higher than from any other single activity.)
Listening underpins ... *Commitment to EXCELLENCE.*

Do you agree with the above?
(Frankly, that's a set-up question. How could you *not* agree?)
(I hope.)

If you agree, shouldn't listening be ... *a Core Value?*
If you agree, shouldn't listening be ... *perhaps Core Value #1?**
(* "We are Effective Listeners—we treat Listening EXCELLENCE as the Centerpiece of our Commitment to Respect and Engagement and Community and Growth"—or some such.)
If you agree, shouldn't listening be ... *a Core Competence?*
If you agree, shouldn't listening be ... *Core Competence #1?*

Shouldn't listening be ... *Core Competence #1?*

If you agree, shouldn't listening be ... *an explicit "agenda item" at every Meeting?*
If you agree, shouldn't listening be ... *our Strategy—per se? (Listening = Strategy.)*
If you agree, shouldn't listening be ... *the #1 skill we look for in Hiring (for every job)?*
If you agree, shouldn't listening be ... *the #1 attribute we examine in our Evaluations?*
If you agree, shouldn't listening be ... *the #1 skill we look for in Promotion decisions?*
If you agree, shouldn't listening be ... *the #1 Training priority at every stage of everyone's career—from Day #1 to Day LAST?*

If you agree, what are you going to do about it ... *at your* **NEXT meeting?**

If you agree, what are you going to do about it ... *by the end of the* **DAY?**

If you agree, what are you going to do about it ... *in the next* **30 DAYS?**

If you agree, what are you going to do about it ... *in the next* **12 MONTHS?**

If you agree, what are you going to do about it ... *in the next ...*

30 MINUTES?

“It’s amazing how this seemingly small thing—simply paying fierce attention to another, really asking, really listening, even during a brief conversation—can evoke such a wholehearted response.”

—Susan Scott, *Fierce Conversations: Achieving Success at Work and in Life One Conversation at a Time*

“Let Silence Do the Heavy Lifting”

—chapter title from Susan Scott, *Fierce Conversations: Achieving Success at Work and in Life One Conversation at a Time*

“There is a profound difference between having a title ... and being someone to whom people commit at the deepest level. If we wish to accomplish great things in our organizations, we must come to terms with a basic human need: a universal longing to be known.”

—Susan Scott, “Be Here, Be Prepared to Be Nowhere Else,” chapter title, *Fierce Conversations: Achieving Success at Work and in Life One Conversation at a Time*

“It was much later that I realized Dad’s secret. He gained respect by giving it. He talked and listened to the fourth-grade kids in Spring Valley who shined shoes the same way he talked and listened to a bishop or a college president.

*He was seriously
interested in who you
were and what you
had to say.”*

—Sara Lawrence-Lightfoot, Respect

“My education in leadership began in Washington when I was an assistant to Defense Secretary William Perry. He was universally loved and admired by heads of state ... and our own and allied troops. *A lot of that was because of the way he listened. Each person who talked to him had his complete, undivided attention. Everyone blossomed in his presence, because he was so respectful, and I realized I wanted to affect people the same way.*

“Perry became my role model but that was not enough. Something bigger had to happen, and it did .It was painful to realize how often I just pretended to hear people. *How many times had I barely glanced up from my work when a subordinate came into my office? I wasn't paying attention; I was marking time until it was my turn to give orders.* That revelation led me to a new personal goal. I vowed to treat every encounter with every person on Benfold [Abrashoff was the Captain] as the most important thing at that moment. It wasn't easy, but my crew's enthusiasm and ideas kept me going.

“It didn't take me long to realize that my young crew was smart, talented and full of good ideas that usually came to nothing because no one in charge had ever listened to them. ... I decided that my job was to listen aggressively ...”

—Mike Abrashoff, *It's Your Ship: Management Techniques from the Best Damn Ship in the Navy*

Suggested addition to your statement of Core

Values: *“We are Effective
Listeners—we treat
Listening
EXCELLENCE as
the Centerpiece of
our Commitment to
Respect and
Engagement and
Community and
Growth.”*

Mikael Pawlo/tweet: *“Nothing beats eye-to-eye or ear-to-ear. Asking questions and listening with a smile is raw power.”*

TP: Amen.

*“The best way
to persuade
someone is
with your
ears, by
listening to
them.”*

—Dean Rusk

presentations: talking

“at” before

listening!

Source: Susan Scott, “Let Silence Do the Heavy Listening,” chapter title, *Fierce Conversations: Achieving Success at Work and in Life, One Conversation at a Time*

The Good Listener's Rules ...

Exists totally for the given conversation. *There is nothing else on earth of importance for those 45 minutes.*

To co-opt a great book*: *fierce attentiveness*.
[Susan Scott, *Fierce Conversations*]

Keep your f-ing mouth shut.

Gives the other person time to stumble toward clarity without interruption.

NEVER finishes the other person's sentence.

Becomes invisible; make the other person the centerpiece.

Do not **EVER** take a call, even from your boss.

Takes (extensive) notes.

Calls (emails) a couple of hours later to thank the other for their time.

Calls the next day with a couple of followup queries.

Leaves it mostly open-ended; do not conclude with your view of the world.

Doesn't pontificate for even 17 seconds!

Tom Asacker: *"It doesn't matter what people think about you. Rather, how you make them feel about themselves in your presence."*

TP: Stunningly well said.

Manager, from Twitter: *“I always write ‘LISTEN’ on the back of my hand before a meeting.”*

“EVERYONE has a story to tell, if only you have the patience to wait for it and not get in the way of it.”

—Charles McCarry, *Christopher’s Ghosts*

Listening-as-**PROFESSION**

I consider bosses of units >25 employees with no substantial ... **FORMAL LISTENING TRAINING** ... to be guilty of dereliction of duty.

Tim Baker: *“Simply put, I think many people underestimate the effort proper listening requires.”*

If you ain't exhausted (after a serious conversation), **then you weren't really listening.** (That is not a throwaway line.)

***Really* listening is literally the most exhausting activity I know—that includes vigorous physical activities.**

Saurabh Gupta: “Not only effort but **concentration** as well.”

John Morrison: “It's not 'listening'; it's **'absorbing'** ...”

TP: [Listening is] a lotta stuff. **"Acknowledging"** is a good part of the definition, too.

Trevor Gay: “I've a friend-mental health counselor; if he sees 3 patients a day he is exhausted & its TOO BUSY.”

David Spellman: *“I taught a management class yesterday on 5 levels of listening: **Ignoring, Pretending, Selective, Attentive, and Empathic. KEY skill set.**”*

TP: **Bravo!**

Cary Cooper: “A few years ago co authored book titled ***Shut Up & Listen!***”

TP: **Bravo!**

House of Faith (Twitter I.D.): “Listening is a lost art today. The ability to ‘talk over’ another is prized. Loose lips still sink ships!”

Tim Baker: “There are those who listen and there are those who are just waiting to talk (again) (and again).”

Preparing retort while another talking = **Anti-listening.**

McKinsey [in my time]: ZERO interest in topic per se, 100% prepping to demo intellectual horsepower w/ clever retort.

Susan Cain addresses this brilliantly in her book *Quiet*. (Alas, research clearly indicates we evaluate the "talk over" types as smarter. More fools us!)

Then there's my motto: **100%** of communication failures are ... *my fault*. (It is up as communicator to me to figure out how to be effective in communicating with any given person in the immediate context of the exchange—e.g., they're having a bad day, good day, etc.)

FYI, if you do public speaking, listening to your audience still skill #1. Bet I make **200** adjustments in 1-hour speech based on what I "hear."

Rich McDonald: “DITTO! It’s why I don’t memorize ANY scientific presentations; I listen to audience's words ... *& ‘listen’ to their eyes/grunts/hand gestures/posture.*”

Key word [re listening]:

PRACTICE!

Effective listening is a ...

PROFESSION!

It's no different than neurosurgery or particle physics. Study and practice and refresh accordingly.

Professional Skill #1 for every leader is ...

LISTENING!

**(I AM DEADLY SERIOUS ABOUT THIS.
NOT AN APPROXIMATION.)**

B.School: 3 finance courses, 3 accounting courses, 3 marketing courses,

ZERO listening courses.

IMPEACH the Dean/s!

No listening course at your b.school?

Demand a full tuition refund with interest plus a letter of apology signed by the dean.

Cary Cooper: “When have managers ever been trained to be on ‘receive’ rather than ‘transmit’? Our B.Schools don’t teach it, neither do exec programs!”

Edward Nevraumont: “Forget a course on listening, why not start with a class? Most B.Schools throw their hands in the air on Leadership in general.”

**All generals, admirals and
CEOs should attend a
listening refresher course
annually!**

(Margot Durkin: *“And school principals, too!”*)

Chris Oestereich: *“The ‘soft’ skills are
anything but!”*

EVERY boss needs a ... **NBB/**
No Bullshit Buddy ...

to give him/her* regular feedback on listening
behavior. (*FYI: Evidence and anecdote both crystal

clear: **WOMEN** are, indeed, better
listeners—and, yes, more often than not better
leaders—than men.)

Trevor Gay: “I once had a boss who regularly

asked me; *‘Have you
given your
team a good
listening to
lately?’”*

(Last word: A key reason *In Search of Excellence* was successful: **Bob Waterman was/is a peerless listener!**)

XXIII. Quiet, Please: Bring on the **INTROVERTS**

“We live with a value system that I call the Extrovert Ideal—the omnipresent belief that the ideal self is gregarious, alpha, and comfortable in the spotlight. The archetypal extrovert prefers action to contemplation, risk-taking to heed-taking, certainty to doubt. ... We think that we value individuality, but all too often we admire one type of individual ... Introversion is now a second-class personality trait. ... The Extrovert Ideal has been documented in many studies. Talkative people, for example, are rated as smarter, better looking, more interesting, and more desirable as friends. Velocity of speech counts as well as volume: We rank fast talkers as more

competent and likeable than slow ones. *But we make a grave mistake to embrace the Extrovert Ideal so unthinkingly.* ... As the science journalist Winifred

Gallagher writes, ‘The glory of the disposition that stops to consider stimuli rather than rushing to engage with them is its long association with intellectual and artistic achievement. Neither E = mc squared or Paradise Lost was dashed off by a party animal.’ Even in less obviously introverted occupations, like finance, politics, and activism, some of the greatest leaps forward were made by introverts ... figures like Eleanor Roosevelt, Warren Buffett and Gandhi achieved what they did not in spite of but because of their introversion.”

—Susan Cain, *Quiet: The Power of Introverts in a World That Can't Stop Talking*

“If you are a manager, remember that one third to one half of your workforce is probably introverted, whether they appear that

way or not. Think twice about how you design your organization’s office space. Don’t expect introverts to get jazzed up about open office plans or, for that matter, lunchtime birthday parties or teambuilding retreats. Make the most of introverts’ strengths— these are the people who can help you think deeply, strategize, solve complex problems, and spot canaries in your coal mine.

“Also remember the dangers of the new groupthink. If it’s creativity you’re after, ask your employees to solve problems alone before sharing

their ideas ... ***Don’t mistake***

assertiveness or elegance for good ideas. If you have a proactive workforce (and I

hope you do), remember that they may perform better under an introverted leader than under an extroverted or charismatic one.”

—Susan Cain, *Quiet: The Power of Introverts in a World That Can’t Stop Talking*

“The next time you see a person with a composed face and a soft voice, remember that inside her mind she might be solving an equation, composing a sonnet, designing a hat. She might, that is, be deploying the power of quiet.”

—Susan Cain, *Quiet: The Power of Introverts in a World That Can't Stop Talking*

(FYI: The book **QUIET** literally
changed my life—and has made me a frothing
crusader. I am guilty of extrovert-love. Extrovert-
love more or less means ... **you are**
ignoring [the stupendous power of] **half**
the population. That is fact ...
and not an approximation.)

The **BIG THREE**

What do we (actually) ... **Do**?

TALK. (Present.)

LISTEN.

WRITE.

Why have we most likely *never* studied the first two* (*especially #2/Listening), and probably not studied the third since high school?

Anybody up for ... **MASTERY?**

The Big Three Plus ONE: Body Language RULES

So: **PAY ATTENTION.**

(Damn it.)

“Research indicates the pitch, volume and pace of your voice affect what people think you said

*about **five times** as much as the*

actual words you used .” —Stanford Business/Spring 2012/on the work of Prof. Deborah Gruenfeld

*“ [Professor Linda Gruenfeld] pulls bits and pieces from her brain in order to persuade her audience with rational arguments. Yet her research tells her—and you—that it isn’t the quality of her arguments that will persuade people. It is, rather, how she conveys it. **‘Your status,’ she says, ‘is determined by physical attributes and nonverbal cues. People decide if you are competent in less than 100 milliseconds.’**”* —Stanford Business/Spring 2012

“I know that everything I do in the hallway is more important than anything I say in the meeting.”

—CEO/telecomms company, in Carol Kinsey Goman, *The Silent Language of Leaders: How Body Language Can Help—or Hurt—How You Lead*

“Mandela, a model host [in his prison hospital room] smiled grandly, put [Justice Minister Kobie] Coetzee at his ease, and almost immediately, to their quietly contained surprise, prisoner and jailer found themselves chatting amiably. ... *[It had mostly] to do with body language, with the impact Mandela’s manner had on people he met. First there was his erect posture. Then there was the way he shook hands. The effect was both regal and intimidating, were it not for Mandela’s warm gaze and his big, easy smile.* ... Coetzee was surprised by Mandela’s willingness to talk in Afrikaans, his knowledge of Afrikaans history.” Coetzee: “He was a born leader. And he was affable. He was obviously well liked by the hospital staff and yet he was respected even though they knew he was a prisoner.” —John Carlin, *Playing the Enemy: Nelson Mandela and the Game that Made a Nation*. (Mandela meets surreptitiously with justice minister after decades in prison—and turns on the charm)

Albert Mehrabian's [directional] "7-38-55 Rule"* **

Your words: 7%

Your tone of voice: 38%

Your body language: 55%

***7% of message pertaining to feelings and attitudes is in the words that are spoken.**

38% of message pertaining to feelings and attitudes is paralinguistic (the way that the words are said).

55% of message pertaining to feelings and attitudes is in facial expression.

(WARNING: This research is somewhat controversial.**

XXIV. The 50 “Have Yous”

While waiting in the Albany airport to board a Southwest Airlines flight to Reagan one morning, I happened across the latest Harvard Business Review, on the cover of which was a bright yellow “lead article” sticker. On it were the words “Mapping your competitive position.” It referred to a feature article by my friend and admired colleague Rich D’Aveni.

Rich’s work is uniformly good—and I have said as much publicly on many many occasions dating back 15 years. Moreover, I’m sure this article is first-rate, too—though I admit I didn’t read it.

In fact, it triggered a furious negative “Tom reaction,” as my wife calls it. Of course I believe you should worry about your “competitive position.” But instead of obsessing on competitive position and other abstractions, as the B.Schools and consultants would invariably have us do, I instead wondered about some “practical stuff,” which I believe is far, far more important to the short- and long-term “strategic” health of the enterprise, tiny or enormous.

Hence, rather than an emphasis on competitive maps or looking for a “blue ocean” (empty space, per the popular book Blue Ocean Strategy), I urge you to pay attention to my 50 “Have Yous,” as I call them. The list could easily be three times as long—but this ought to keep you occupied for a while. Of course, the underlying hypothesis is that if you proactively do the “small stuff” below, your “competitive position” will improve so much that mapping will become a secondary issue!

Herewith:

TODAY?

1. Have you called a customer ...
2. Have you in the last 10 days ... visited a customer?
3. Have you in the last 60-90 days ... had a seminar in which several folks from a key customer’s operation (different levels, different functions, different divisions) interacted, via facilitator, with various of your folks? (Goal: Fully integrates us with our key customers—and makes it clear we want to get to know them on all levels.)
4. Have you thanked a front-line employee for a small act of helpfulness ... in the last three days?

5. Have you thanked a front-line employee for a small act of helpfulness in the last ...

THREE HOURS?

6. Have you thanked a front-line employee for carrying around a great attitude ... *TODAY*?

7. Have you in the last week recognized—publicly—one of your folks for a small act of *cross-functional cooperation*? (“Small,” social acts enhancing cross-functional bonding may be my Obsession #1.)

8. Have you in the last week recognized—publicly—one of “their” folks (another function) for a small act of cross-functional cooperation with your gang?

9. Have you invited in the last month a leader of *another function* to your weekly team priorities meeting?

10. Have you personally in the last week-month called-visited an internal or external customer to *sort out, inquire, or apologize* for some little or big thing that went awry? (No reason for doing so? If true—in your mind—then you’re more out of touch than I dared imagine. Pity.)

11. Have you in the last two days had a chat with someone (a couple of levels “down”) about specific deadlines concerning a project’s next steps?

12. Have you in the last two days had a chat with someone (a couple of levels “down”?) about specific deadlines concerning a project’s next steps ... and what

specifically *you can do to remove a hurdle*? (**Boss as**

CHRO, Chief Hurdle

Removal Officer.

Peter Drucker: “Ninety percent of what we call ‘management’ is doing things that make it more difficult to get things done.”)

13. Have you celebrated in the last week a “small” (or large!) *milestone* reached? (I.e., are you a milestone fanatic? Are you a celebration fanatic?)

14. Have you in the last week or month revised some estimate in the “wrong” direction (i.e., acknowledged that things were more problematic than previously estimated) and apologized for making a lousy estimate? (*Somehow or other you must publicly reward the telling of difficult truths—and the reporting of bad news.*)

15. Have you installed in your tenure a very comprehensive customer satisfaction scheme for all your *internal* customers? (With major consequences for hitting or missing the mark.)

16. Have you in the last six months made a week-long, visible, very intensive *visit-tour* of external customers’ operations?

17. Have you in the last 60 days called an abrupt halt to a meeting and “ordered” everyone to get out of the office and “into the field” *immediately* with the *order* to fix (f-i-x, finito!) *some/any* nagging “small” problem through immediate practical action?

18. Have you in the last week had a rather thorough discussion of a “trivial” “cool design thing” someone has come across—*away* from your industry or your function—at a website or in a product or its packaging? And do you urge/insist that everyone (*every* one) be on the lookout for, bring in, and present “incredibly cool stuff I’ve found” from “everyday life”?

19. Have you in the last two weeks had an informal meeting—at least an hour long—with a front-line employee to discuss “things we do right,” “things we do wrong,” and “What would it take to turn this job into something approaching their “dream job”?”

20. Have you in the last 60 days had a general meeting to discuss “things we do wrong” ... that we can fix in the next 14 days? (With follow-up *exactly* 14 days later.)

21. Have you had, in the last year, a one-day, intense offsite with each of your principal internal customers—followed by a substantial celebration of “things gone right” on both parties’ parts?

22. Have you in the last week privately pushed someone to do some family thing that you fear might be overwhelmed by internal deadline pressure?

23. *Have you learned the names of the children of everyone who reports to you? (If not, you have 30 days to fix it.)*

24. Have you taken, in the last month (two weeks?), an interesting-*weird* outsider to lunch? And, do you keep careful track of “weirdo lunches”?

25. Have you in the last month invited an interesting-*weird outsider* to sit in on an important meeting?

26. Have you, in the last three days, discussed in a meeting something interesting, beyond your industry, that you ran across while reading, etc.? (This means more than an email from you with a cyberlink or two.)

27. Have you in the last 24 hours injected into a meeting “I ran across this interesting idea in (strange place)”?

28. Have you in the last two weeks asked someone to report on something, anything that constitutes an act of brilliant service rendered in a “trivial” situation—restaurant, car wash, etc.? (And then discussed the relevance to your work—and then implemented *on-the-spot* some little thing from what they learned?)

29. *Have you in the last 30 days examined in detail (hour by hour) your calendar to evaluate the degree to which “time actually spent” mirrors your “espoused priorities”?*

(And repeated this exercise with everyone on the team.)

30. Have you in the last two months had a presentation to your group by a “weird” outsider?

31. Have you in the last two months had a presentation to the group by a customer, internal customer, vendor featuring “working folks” 3 or 4 levels down in the vendor/customer/internal customer organization (and in your organization)?

32. Have you in the last two months had a presentation to the group of a cool, beyond-our-industry idea by two of your folks?

33. Have you at every meeting today (and forevermore) redirected the conversation to the practicalities of implementation concerning some issue before the group?

34. Have you at every meeting today (and forevermore) had an end-of-meeting

discussion on “action items to be dealt with in the next **4, 24,**

48 hours”? (And then made this list public—and followed up in 4 or 24 or 48

hours.) (And made sure everyone has at least one such item.)

35. Have you had a discussion in the last six months about what it would take to get recognition in a local-national poll of ... *“best places to work”*?

36. Have you in the last month approved a *cool-different-very different training course* for one of your folks?

37. Have you in the last month taught a front-line training course?

38. **Have you in the *last week* discussed the idea of *Excellence per se*?** (What it means, how to get there, concerning a current project.)

39. Have you in the last week discussed the idea of ...

“Wow”? (What it means, how to inject it into an ongoing “routine” project.)

40. Have you in the last 45 days assessed some major internal process in terms of the details of the “experience,” as well as results it provides to external or internal customers?

41. Have you in the last month had one of your folks attend a meeting you were supposed to go to, which therefore gives them unusual exposure to senior folks?

42. Have you in the last 60 (30?) (15?) (7?) days sat with a trusted friend or “coach” to discuss your “management style”—and its long- and short-term impact on the group?

43. Have you in the *last three days* considered a professional relationship that was a little rocky and made a call to the person involved to discuss issues and smooth the waters? (Taking the “blame,” fully deserved or *not*, for letting the thing-issue fester.)

44. Have you in the last ... *two hours* ... stopped by someone’s (two-

levels “down”) office-workspace for 5 minutes to ask **“What do**

you think?” about an issue that arose at a more or less just completed meeting? (And then stuck around for 10 or so minutes to listen—and *visibly* taken notes.)

45. *Have you ... in the last week ... looked around you (“eyeballed”) to assess whether the diversity of the group pretty accurately mirrors the diversity of the market being served?*

(And began to act on the disparity, if it exists?)

46. Have you in the last day at some meeting gone out of your way to make sure that a normally reticent person has been engaged in a conversation—and then thanked him or her, perhaps privately, for their contribution?

47. Have you in the last four months had a half-day, full-team session specifically aimed at checking on the “corporate culture” and the degree we are true to it—with presentations by relatively junior folks, including front-line folks? **(And with a determined effort to keep the conversation restricted to “real world” “small” cases—not theory.)**

48. Have you in the last six months talked about the *Internal Brand Promise*—i.e., what you and the organization promise to employees in terms of respect and growth opportunities?

49. Have you in the last year had a full-day off-site to talk about individual (and group) aspirations?

50. Have you called a customer ... **TODAY?**

(51. Have you “mapped your competitive position” since you finished this checklist? Now it’s okay to do.)

Do You ... *Hear Me?*

Have You ... *Started?*

Obviously I hope you'll use this list. Perhaps as follows:

- (1) Circulate to your team.
- (2) Agree on no more than a half-dozen items to act as a Starter Action List.

(3) **Pick ONE** item.

(4) **Do it TODAY.**

- (5) Repeat once a week.

XXV. 2013-14/New Year's Week

This week you get a twofer. An ending and a beginning. *Beginnings and endings are all-important.* Act accordingly.

As year closes, emphasize that we are a team moving forward. Use the word

“We”

per se until you're blue in the face.

Bosses. This week collect folks' 2013 stories. With mouth mostly shut, ears open, encourage energetic commitment to personal growth in 2014.

Good or not so good results, most folks have done their bit to contribute. Show your appreciation this week.

Pope Francis has made an enormous impact on an enormous institution with his way of being. Apply to your wee corner of the world this week.

Bad year? It happens. Be a paragon of grace and thoughtfulness.

Good year or not so good year, end it on a high with an un-showy show of energy and enthusiasm and appreciation and joie de vivre.

Make 2014 the year of committed servant leadership.

2014: Thought for those **NOT** in formal leadership slots: *Every day, on or off the job, offers up a plethora of leadership opportunities! Go for it!*

May each and every one of those you are privileged to lead have a 2014 marked by accomplishment and growth.

Make 2014 the year of committed ... servant leadership.

Thought for 2014 for those *not* in formal leadership

slots: *Every day*, *on*
or off the job, offers
every one *of us a*
plethora of
leadership
opportunities!
Go for it!

Year's End: Lessons About Enterprise and Life Itself ... While Baking Christmas Cookies

A couple of hours in a hot kitchen can teach you as much about business and management as the latest books on re-engineering or total quality management. That's my take, anyway, after a bout of Christmas-cookie baking. Here are 11 lessons for life (and enterprise), fresh from the oven:

1. Engagement. Watching others helps, but you've gotta get your hands dirty. I hadn't made cookies for years, so I observed a friend do a few batches. I thought I was learning something, and I suppose I was—but nothing really clicked until my hands were covered with flour.

Lesson (for trainers especially): *Cut the lectures. Get folks involved in "real stuff" very quickly!*

2. A plan. I'm not keen on planning in general, but a time-tested recipe is a godsend. First, it's roughly "right." More important, it gives you the confidence to get started.

Lesson: *Any plan is a help; it gives folks the sense they aren't aimlessly flailing.*

3. Art. The plan is an outline—not Holy Writ. Plans, including recipes, are made to be tinkered with—and eventually torn up. Cookie making, software design, and real-estate lending are art. And it's the artists, not the slavish followers of others' recipes, who land in the world's halls of fame.

Lesson: *Blind devotion to any plan is downright dumb!*

4. Trial and errors. Yes, I'd watched a master at work (or at least a pretty good cook), but in my first hour of hands-on work, with instructions close at hand, I made dozens of mistakes, large and small. And in business life, real life, and cookie-making life, error is the fuel that drives you.

Lesson: *Don't "tolerate" mistakes. Embrace them!*

5. The same mistakes. "Mistakes are OK," some concede, "but don't make the same mistake twice."

Rubbish! I made virtually the same errors, in something as relatively simple as cookie making, over and over ... and over.

Lesson: *Nobody ever did anything (interesting) right the first ... or 21st ... time.*

6. A sense of humor. I was awkward at the start. (And at the finish.) I turned the kitchen into a disaster area. Kids and adults made their day laughing at me (or so it seemed). Experimentation—the nub of life and business—depends on learning to laugh at yourself.

Lesson: *Learning is precisely about making a fool of yourself—often in public.*

7. Perseverance. An ability to laugh at yourself and suppress your ego is key—but so is steely-eyed determination. Sure it was “just” cookie making. But I did want to do it right.

Lesson: *Winners want to do everything well, no matter how trivial; and that takes focus and unrelenting drive.*

8. Perfectionism. Certainly, the kitchen was a mess. Yes, I was the object of ridicule. But to master one’s craft requires nothing less than pain-in-the-butt perfectionism. Most see artists, and creative types in general, as scatterbrained. I’m sure there are scatterbrained artists (and bakers), but their work doesn’t end up in museums (or cookbooks). (And: Part of the deal for me: leaving the kitchen ... SPARKLING.)

Lesson: *Creativity and perfectionism are essential handmaidens.*

9. Ownership. It was made clear to me: I was responsible for the Christmas Eve dinner cookies. There were no backups available—and a long ginger-cookie tradition hung on my frail (i.e., incompetent) shoulders. The monkey was ensconced squarely on my back. So I did the job.

Lesson A: *No ownership, no passion.*

Lesson B: *No passion, no perseverance.*

Lesson C: *There is no half ownership.*

10. Accountability. When I’d helped with some previous cookie making (the day before), I’d screwed up the baking time twice. Now I was on my own. That should have made things more difficult. But, to the contrary, I was so attuned to the task that I didn’t come close to blowing it.

Lesson: *Until you’re engaged in all aspects of a job, you don’t fully engage.*

XXVI. Criticism, (Severe) Limits Thereto

Remember: *Criticism poorly given rarely leads to correction. It leads to evasion—avoiding the task in the future.*

Joel Heffner: “Coaching is like walking on eggs; any dope can criticize.”

Try Ed Schein’s book *Helping: How to Offer, Give, and Receive Help*.

Helping is far more delicate than neurosurgery!

Vala Afshar: “Most people will do better work and put greater effort under a spirit of approval than under a spirit of criticism.”

Wendy Maynard: “Positivity goes a long way, as does asking people what they think went well.”

Wendy Maynard: “There’s just been too much emphasis in management about ‘constructive criticism’; it can easily be abused.”

Rich McDonald: “Why many bosses stink—they watch too many military movies and forget that in-your-face degrading remarks never work for anyone.”

Wendy Maynard: *“Most people were criticized unfairly as kids. As managers, they simply repeat the bad patterns.”*

XXVII. **E**xcellence

Remember (per me): Excellence is not an “aspiration.” Excellence is the next five minutes. Or not.

John Miller: “You are only 5 minutes max away from Excellence.”

*Excellence is NOT about
“increasing market share.”*

*Excellence IS your next
email or IM or 30-second
chance meeting in the hall.*

If you are a big cheese, Excellence that translates into \$\$\$ is about your interactions during the elevator ride to the top floor.

If ever there were a day for Excellence via MBWA, it’s tomorrow [12/31/13].

Remember, Excellence is the work that gets done on the real or metaphorical “lower floors.” Camp out there this week.

Excellence is **NOT** a “goal.”

Excellence **IS** a way of life.

Or not.

Excellence is **NOT** an
institutional choice.

Excellence **IS** a personal choice.

Or not.

Excellence is **NOT** an
“aspiration.”

Excellence **IS** the next 5 minutes.

Or not.

*Excellence is
not an
“aspiration.”
Excellence is
the next five
minutes.
(Or not.)*

EXCELLENCE is not an "aspiration."
EXCELLENCE is ... THE NEXT FIVE MINUTES.

EXCELLENCE is your next conversation.

Or not.

EXCELLENCE is your next meeting.

Or not.

EXCELLENCE is shutting up and listening—really listening.

Or not.

EXCELLENCE is your next customer contact.

Or not.

EXCELLENCE is saying “Thank you” for something “small.”

Or not.

EXCELLENCE is the next time you shoulder responsibility and apologize.

Or not.

EXCELLENCE is waaay over-reacting to a screw-up.

Or not.

EXCELLENCE is the flowers you brought to work today.

Or not.

EXCELLENCE is lending a hand to an “outsider” who’s fallen behind schedule.

Or not.

EXCELLENCE is bothering to learn the way folks in finance [or IS or HR] think.

Or not.

EXCELLENCE is waaay “over”-preparing for a 3-minute presentation.

Or not.

EXCELLENCE is turning “insignificant” tasks into models of ... EXCELLENCE.

Or not

Q: *“Mr. Watson* [legendary IBM CEO]*,”*
how long does it
take to become
excellent?”

A: *“One minute. That*
is how long it takes
you to decide to never
again accept
anything less than
excellence from
yourself.”

*“Excellence ...
can be obtained if you:*

*... care more than others
think is wise;*

*... risk more than others
think is safe;*

*... dream more than others
think is practical;*

*... expect more than others
think is possible.”*

The “19 Es” of EXCELLENCE

- Enthusiasm!** (Be an irresistible force of nature! *Be fire! Light fires!*)
- Exuberance!** (*Vibrate*—cause earthquakes!)
- Execution!** (Do it! Now! Get it done! Barriers are baloney! Excuses are for wimps! Accountability is gospel! Adhere to coach Bill Parcells’ doctrine: “*Blame no one!! Expect nothing!! Do something!!*”)
- Empowerment!** (Respect! Appreciation! Ask until you’re blue in the face, “*What do you think?*” Then: Listen! Liberate! 100.00% innovators!)
- Edginess!** (Perpetually dance at the frontier and a little, or a lot, beyond.)
- Enraged!** (Maintain a permanent state of mortal combat with the status-quo!)
- Engaged!** (Addicted to MBWA/Managing By Wandering Around. *In touch. Always.*)
- Electronic!** (Partner with the whole wide world 60/60/24/7 via all manner of electronic community building and entanglement. *Crowdsourcing wins!*)
- Encompassing!** (Relentlessly pursue diversity of every flavor! Diversity per se generates big returns!) (Seeking superb leaders: *Women rule!*)
- Emotion!** (The alpha! The omega! The essence of leadership! The essence of sales! The essence of design! The essence of life itself! Acknowledge it! Use it!)
- Empathy!** (*Connect! Connect! Connect!* Click with others’ reality and aspirations! “Walk in the other person’s shoes”—until the soles have holes!)
- Ears!** (Effective listening in every encounter: *Strategic Advantage No. 1!* Believe it!)
- Experience!** (Life is theater! *It’s always showtime!* Make every contact a “Wow”! Standard: “Insanely Great”/Steve Jobs; “Radically Thrilling”/BMW.)
- Eliminate!** (Keep it simple!! Furiously battle hyper-complexity and gobbledegook!!)
- Errorprone!** (Ready! Fire! Aim! Try a lot of stuff, make a lot of boo-boos. CELEBRATE the boo-boos! Try more stuff, make more boo-boos! He who makes the most mistakes wins! *Fail! Forward! Fast!*)
- Evenhanded!** (Straight as an arrow! *Fair to a fault!* Honest as Abe!)
- Expectations!** (Michelangelo: “*The greatest danger for most of us is not that our aim is too high and we miss it, but that it is too low and we hit it.*”)
- Eudaimonia!** (The essence of Aristotelian philosophy: True happiness is pursuit of the highest of human moral purpose. *Be of service! Always!*)
- EXCELLENCE!** (The only standard! Never an exception! *Start NOW!* No excuses!)

In Search of Excellence in SIX Words:

**Hard is soft.
Soft is hard.***

***The “hard” numbers and the plans are the true “soft stuff.” The “soft” relationships and commitment to Excellence and integrity-in-all-we-do are the true “hard stuff.”**

Excellence!
Now!
More Than Ever!

Excellence is the best defense.
Excellence is the best offense.
Excellence is the answer in good times.
Excellence is the answer in tough times.
Excellence is about the big things.
Excellence is about the little things.
Excellence is a design “good enough to lick”/S. Jobs.
Excellence is a relationship.
Excellence is a philosophy.
Excellence is an aspiration.
Excellence is immoderate.
Excellence is a pragmatic standard.
Excellence is execution.
Excellence is selfish.
Excellence is selfless.
Excellence keeps you awake.
Excellence lets you sleep well.
Excellence is a moving target.
Excellence knows no bounds.

The 30-Minute Speech: EXCELLENCE.

(Taken from 5X7 note cards)

1. People first, second, third, fourth ... (!!!!!!!!!!!!!!!!)
 - 1A. Customer 2nd/If you want to best serve the customer, then you must first serve those who serve the customer!
 - 1B. Acknowledgement/Respect/Appreciation.
 - 1C. No bit players!
 - 1D. First-line supervisors-as-superstars/#1 reason people leave.
 - 1E. Weird folks for weird times/ZERO “normals” in a history book.
 - 1F. Memories That Matter: The people you developed.
2. Organizations Exist to Serve. PERIOD.
3. EXECUTE/ “Don’t forget to tuck the shower curtain into the bath tub”/
Conrad Hilton’s success secret #1; Fred Malek “*Execution is strategy.*”
 - 3A. Resilience!
4. MBWA/Managing By Wandering Around/You = Calendar
 - 4A. LISTENING as profession/Doc interrupts after 18 seconds—how about you?
 - 4B. MBWA12. “What do you think?”/“How can I help?”/“What have you learned?”
 - 4C. Hang out/“You ARE what you eat.”/“You ARE who you hang out with.”
 - 4D. #1 trait successful managers/Do ... ONE thing at a time/Drucker.
 - 4E. K = R = P (*Kindness = Repeat business = Profit.*)
 - 4F. Apology Power!/3-minute calls save the day & busted relationships
5. “Little BIG Things”/Walmart big cart boosts appliance sales 50%!
 - 5A. On topic of “little,” Mittelstand Rules/SMEs rule all economies/
“Be the best. It’s the only market that’s not crowded.”
6. Design RULES: Apple > Exxon in market cap ... courtesy DESIGN.
7. “Social business”/“Everyone is part of our world.”
8. Value added/IBM/UPS/MasterCard”/“Geek squad”—BestBuy
9. My #1 “finding”/50 years//WTTMSW/Whoever Tries The Most Stuff Wins.
 - 9A. Try a lot, fail a lot/“Celebrate losses.”/“*Fail. Forward. Fast.*”
10. WOW!/“Insanely great”/“Radically thrilling”/Go for broke!
11. EXCELLENCE Always. If not EXCELLENCE, What? If not EXCELLENCE Now, When? EXCELLENCE not aspiration, but what you do (or DON’T do) in the next 5 minutes.

EXCELLENCE. In TWO Pages.

1. **People first, second, third, fourth ...** /The “business” of leaders is people: to inspire/engage/provide a trajectory of opportunity—enterprise of every size and type as “cathedral” for human development. “*When I hire someone, that’s when I go to work for them.*”—John DiJulius
 - 1A. **Customer comes 2nd** / *If you want to best “Wow!” customers then you must first Wow! those who serve the customers./“If you want staff to give great service, give great service to staff.*”—Ari Weinzweig, Zingerman’s/“*You have to treat your employees like customers.*”—Herb Kelleher, on his #1 “secret to success.”
 - 1B. Manager’s sole raison d’etre: ***Make each of my team members successful!***
 - 1C. Effective organizations: ***No bit players!***
 - 1D. **Appreciation. Acknowledgement.** “*The deepest human need is the need to be appreciated.*”—Believe it! *A few kind words are often remembered for years!*
 - 1E. **First-line supervisors. Every organization’s ... most important ... leadership cadre.** Productivity is largely determined by the caliber of the first-line boss. Selection and development of your “sergeants” must become an “obsession”—almost all do a half-assed job.
 - 1F. **Weird**/There are no “normals” in the history books!/Insure a healthy supply of oddballs/**Diversity of every flavor = Fresh perspectives! Better decisions!**
 - 1G. **Memories That Matter. And don’t.** /“People stuff” sticks with you: You’ll look back on the handful of people you developed who proceeded to change the world—and the multitude (if you’ve earned it) who say, “*I grew most when I worked with you.*” ***Ever seen a tombstone engraved with the deceased’s net worth?***
2. **You/me:** Businesses no longer coddle. You’re in charge! / **“Brand you”**—stand out for something valuable, or else; learn something new every day, or else! / ***“Distinct or Extinct!”***
3. **Organizations Exist to Serve. PERIOD.**
4. **EXECUTION** / “*Don’t forget to tuck the shower curtain into the bath tub.*”—Conrad Hilton on his “sweat the details” obsession and #1 “success secret” / ***“Execution is strategy.”***
—Fred Malek / *“Execution is the leader’s job #1.”*—Larry Bossidy
 - 4A. **“They do ... ONE BIG THING at a time.”**—Drucker on successful managers’ #1 trait.
 - 4B. **Resilience circa 2011:** Understand it. Hire for it. Promote for it. Obsess on it.
5. **MBWA/Managing By Wandering Around** / Starbucks’ Schultz visits 25 stores a week / “In touch” is “not optional” / You = Your calendar / ***Calendars never lie!***
 - 5A. **Listening per se = Candidate for Core Value #1** / Listening per se is a *profession.* / “If you don’t listen, you don’t sell anything.” / Docs interrupt patients after ... *18 seconds.* And you?
 - 5B. **“What do you think?” “How can I help?”**—MBWA 8/Eight words, repeated like a mantra while “wandering around,” that unlock engagement/success for multitudes.
 - 5C. **Innovate by “Hanging out.”** / “You are what you eat.” / “*You will become like the five people you associate with the most—a blessing or a curse.*” ***Want “cool”? Expose yourself to cool!*** / Manage “hanging out” zealously-formally—with customers, interesting outsiders, etc.
 - 5D. **K = R = P** (Kindness = Repeat business = Profit.) ***“Hard is soft. Soft is hard.”***—#1 finding *In Search of Excellence.* Kindness is “hard”—and payoff in \$\$\$\$.
 - 5E. **Apology Power**—Awesome power: 3-minute “*I’m sorry*” call heals anything—do it religiously! / “Over-the-top” response to even small boo-boo ***strengthens*** customer relationships!

6. **“Little BIG Things”/Focus on “multipliers”**: Walmart goes to big shopping cart = +50% “big stuff” sales boost!/**“Wash your Hands”**—save thousands of lives per annum in hospitals!
- 6A. **“Little BIG Things”**: **SMEs bedrock of all economies**. Nurture them. SME’s battle cry per George Whalin: **“Be the best. It’s the only market that’s not crowded.”**
7. **Apple > Exxon in market cap courtesy ... DESIGN!** /The big “Duh”: **“Cool beats un-cool!”**/Design candidate for “best way to differentiate goods-services in competitive markets.”
- 7A. **TGRs/Things Gone Right**. Wagon Wheel restaurant, Gill MA—**clean restroom with fresh flowers**.—we remember such touches more or less forever/**Manage-measure TGRs**.
- 7B. **Scintillating Experiences**. Howard Schultz on Starbucks: **“At our core, we’re a coffee company, but the opportunity we have to extend the brand is beyond coffee; it’s entertainment.”**
8. **WOMEN Buy! WOMEN Rule! WOMEN’s World!** Women buy 80% of everything—**\$28T** world market/**“Why Warren Buffett Invests Like a Girl”**—e.g., studies harder-holds longer-less frenzied buying and selling/Women’s leadership style fits 21st century less-hierarchical enterprise./Evidence is clear—**Women well on the way to 21st century economic domination!** Brazil’s President Dilma Rousseff at UN: **“the century of women.”**
9. **Web-Social Media**“Everyone becomes our valued partner, a member of our community—and watchdog”/**The Power of Co-creation**—my **“Top Biz Book for 2010”**/Social Media can be lynchpin of transformative strategy—for organizations of every shape and size!
10. **Value added via transformation from “Customer satisfaction” to “customer success”**—huge difference-opportunity! /E.g., IBM Global Services, from afterthought to \$60B/UPS Logistics/MasterCard Advisors/IDEO, help clients create “culture of innovation”/**“The Geek Squad”**—BestBuy’s #1 strategic point of differentiation.
11. **Innovation “secret” #1: “Most tries wins.”**/**“A Bias for Action”**—Excellence trait #1, **In Search of Excellence** /**“Ready. Fire! Aim.”**—Ross Perot/**“Instead of trying to figure out the best way to do something and sticking to it, just try out an approach and keep fixing it.”**—Bert Rutan
- 11A. **Try a lot = Fail a lot** /**“Fail. Forward. Fast.”**/**“Fail faster, succeed sooner.”**—David Kelley/**“Reward excellent failures, punish mediocre successes.”**/**Whoever Makes the Most Mistakes Wins**—Richard Farson
- 11B. **“You miss 100% of the shots you never take.”**—Wayne Gretzky
12. **Live WOW!**/Zappos creed ... **“WOW Customers”**/eBay 14,000 employees, Amazon 20,000 employees, Craig’s List 30 employees; regardless of issue, **Where’s your “Wild and Woolly Craig’s List Option”?**/Final point in superstar adman Kevin Roberts’ Credo: **“Avoid moderation!”**
13. **EXCELLENCE is a personal choice ... not an institutional choice!**
EXCELLENCE is not an “aspiration”—it’s the next five minutes!
- 13A. **EXCELLENCE. Always. If not EXCELLENCE, What?**
If not EXCELLENCE Now, When?

EXCELLENCE Redux

Five (or Less) Words to the Wise

- 4 most important words: **“What do you think?”**
(“Most important words in any organization.”
—Dave Wheeler)
- 4 most important words: **“How can I help?”** (Boss as CHRO/
Chief Hurdle Removal Officer.)
- 2 most important words: **“Thank you!”** (Appreciation/
Acknowledgement/Recognition.)
- 2 most important words: **“All yours.”** (“Hands-off” delegation/
Respect/Trust.)
- 3 most important words: **“I’m going out.”** (MBWA/Managing By
Wandering Around/In touch!)
- 2 most important words: **“I’m sorry.”** (Stunning power of unconditional
Apology! Marshall Goldsmith: #1 exec issue.)
- 5 most important words: **“What did you learn today?”**
(Grow or die.)
- 5 most important words: **“Did you tell the customer?”** (Over-
communicate.)
- 2 most important words: **“She says ...”** (“She” is the customer!)
- 1 most important word: **“No.”** (“To don’ts” > “To dos.”)
- 1 most important word: **“One!”** (“Best bosses do one big thing at a
time.”—Drucker)
- 1 most important word: **“Yes.”** (Anon. quote: *“The best answer is
always ‘What the hell.’”*/Wayne Gretzky: *“You
miss 100% of the shots you never take.”*)
- 3 most important words: **“Let’s do lunch!”** (“Social accelerators” =
secret to problem/opportunity #1: XFX/
cross-functional Excellence.)
- 4 most important words: **“Thank Susan in accounting.”** (Readily/
constantly/profusely acknowledge
help from other functions.)
- 2 most important words: **“After you.”** (Courtesy rules.)
- 3 most important words: **“Thanks for coming.”** (Civility. E.g., boss
acknowledges employee for coming to
her/his office.)
- 2 most important words: **“Great smile!”** (Acknowledge good attitude!)
- 1 most important word: **“Wow!”** (“Avoid moderation.”—K. Roberts)
- 1 most important word: **“EXCELLENCE!”** (Why else bother?)
- 2 most important words: Excellence. **NOW.** (The next 5 minutes.
Or not.)

ISOE In <140 Characters

In response to a Tweet, I summarized *In Search of Excellence*—and thence the last 30+ years of my professional life—in less than 140 characters.

In Search of Excellence basics in **127** characters *including* quotation marks and spaces:

***“Cherish your people.
Cuddle your customers.
Wander around. ‘Try it’
beats ‘talk about it.’ Pursue
EXCELLENCE. Tell the
truth.”***

Q.E.D.

Our Credo/A Work in Progress

We are thoughtful in all we do.

We are excellent listeners—to each other and to all members of our extended family (vendors, customers, communities, etc.).

We will make the four words “What do you think?” an automatic instinct in all of our internal and external dealings; moreover, “What do you think?” will precede the explication of our own view in 99 out of 100 instances.

We are dedicated to and measure our success to a significant degree by our unwavering commitment to the extreme personal growth of every one of our employees.

We will only be “delighted” with our managers if their employees are universally surprised by the level of their personal and professional growth.

We will be clear that we view leadership at every level as a sacred trust—and that leaders are indeed the servants of their employees just as the effective classroom teacher is servant to the lives and growth of her or his students.

We believe in the “inverted organization chart”—with the “leaders” at the “bottom” of a reverse pyramid.

We will construct leaders’ incentive schemes so that measurable progress in human development is weighed as highly as marketplace success.

We will be a leader in research and development in every aspect of our business—and we will work primarily with vendors who are also fanatical about research and development; and work to attract a set of core customers willing to play at the edge of things and become our co-developers.

We will aim to make our customer engagements adventures beyond the comfort zone, or adventures in growth to use a less intimidating phrase—we will aim to add value in novel ways that surprise and stretch our customers and ourselves.

We will use the three words “Try it! Now!” almost as often as “What do you think?”

We revere the experimental method, and believe success is mostly correlated with the number of things one tries.

We wholeheartedly acknowledge the value of analysis, but in the end swear by “Actions speak louder than words.”

We “encourage” failures; that is we acknowledge that a near-religious devotion to “Try it! Now!” necessarily invites the failures that are part and parcel of trying new things.

We will in fact look askance at those whose records include few or no failures—such a spotless record suggests an unwillingness to brave the unknown.

We will, to summarize the last few items, all view ourselves as explorers-adventurers, proceeding toward individual and collective growth by actively engaging at the edge of things; we unstintingly believe that our customers will reap enormous value from our commitment to our constant, restless exploration.

We will encourage and insist upon constant and vociferous disagreement, but be absolutely intolerant of disagreement in the form of personal attacks.

We will cut “overhead” to zero—every “department” shall aim to be best-in-class in its arena, and hence a full-scale participant in our concerted effort to add value in all we do.

We will exude integrity, individually and collectively.

We will exemplify the word transparency in all of our internal and external dealings—and bend over backwards to give new meaning and breadth to the term “information sharing.”

We will individually and collectively accept blame for our mistakes, or even our rather minor contribution to others’ mistakes—and apologize accordingly and with dispatch.

We will bring to bear overwhelming and instant and collective force to redress any customer problem, real or imagined.

We will under no circumstance badmouth a competitor.

We will aim to turn every customer contact into a memorable experience, remembering that all of life is indeed a stage.

We honor the word “design” in all we do, in every nook and every cranny of our organization; every system, every web page, every customer invoice, every employee restroom is part of our purposefully designed “signature,” and stand out and exude exceptionalism in one way or another.

We understand that difficult decisions must be made, but we will bend over backwards to implement such decisions with kindness and grace—the dignity of the individual will always be foremost in our mind.

We will not intrude into our employees’ lives, but we are committed to aggressively helping employees achieve a healthy lifestyle.

We will master the art of appreciation and be profuse in our use of the words “thank you” to honor assistance of even the most minor sort.

We will acknowledge through celebration even small successes—and always cast a wide net in our “thank yous” to include bit players, especially from other functions.

We aim for others to always be surprised by our “vibrancy” and “vitality”—we view enthusiasm as the key to success in anything, and take particular care in leader selection to ensure that every one of our leaders is a “remarkable” “carrier” of enthusiasm through thick and, especially, thin.

We will drop whatever we are doing and rush to the aid of those involved in tight-deadline activities—even if those involved caused some of their own problems.

We will be careful in our planning, but also understand that nothing ever unfolds as planned—hence we will be known for our ability to muster resources in an instant, without fuss and from everywhere, to deal with the unexpected; participating in these ad hoc response activities will not be seen as a distraction from our “real work,” but as a significant part of our “real work” and an opportunity to contribute to others and build our own skills in ways we might not have imagined.

We fully acknowledge that other units-departments-functions have other points of view than ours, but we will bend over backwards to develop social connections with those in other functions so that dealings over warring perspectives are dealings among friends.

We acknowledge that agreed upon deadlines are holy writ, and will attempt to balance requisite urgency and requisite realism in all of our commitments.

We will fight tooth and nail to minimize the complexity that “necessarily” comes with growth and the mere passage of time.

We will declare total war on our own systems to insure that they do not strangle us.

We gladly acknowledge that anyone in the organization has the duty as well as the right to challenge anyone else when he or she believes they have a valid and useful perspective to offer—this is particularly true regarding any issue that has to do with safety, quality or meeting agreed upon deadlines; such challenges may be firm but not rude.

We will be civil in all our dealings with one another.

We will bend over backwards to bring truly (not superficially) diverse views of every stripe imaginable to bear on plans and decisions of all sorts.

We will pursue “diversity” in part so that the composition of our workforce and leadership from top to bottom is a “pretty good” reflection of the demographics of the markets we serve or aim to serve.

We will use new technology tools to extend the definition of “our family” to every corner of the globe—we will welcome ideas and participation in our affairs from anyone and everyone.

We will aim for gender balance in all we do and from tippy top to bottom—for reasons commercial more than reasons moral.

We will never, in any way, compromise on the quality of our products or services—regardless of difficulties in our marketplace and economy.

We wholeheartedly acknowledge that in the short term (as well, obviously, as the long term) we must be profitable and exhibit stellar financial performance that is consistent with the audacious efforts to serve our people and our clients as described above.

We aim to be seen by others as “conservative” in our financial practices.

We shall talk about **EXCELLENCE** constantly.

We shall unfailingly aim for **EXCELLENCE** in all we do.

We shall use **EXCELLENCE** as the principal benchmark in the assessment of ourselves and our work and our community.

We shall never forget that the bedrock of **EXCELLENCE** is the unwavering commitment to growth of 100% of our employees—and in fact all of those we come in contact with.

XXVIII. Organizations Exist to Serve: Why Else Get Out of Bed in the Morning?

Organizations exist to serve. Period.

Leaders live to serve. Period.

Passionate servant leaders, determined to create a legacy of earthshaking transformation in their domain (a 600SF retail space, a 4-person training department, an urban school, a rural school, a city, a nation), create/must *necessarily* create organizations which are no less than “cathedrals” in which the full and awesome power of the Imagination and Spirit and native Entrepreneurial flair (“We are *all* entrepreneurs.”—Muhammad Yunus) of diverse individuals

(100% creative Talent—from checkout to lab, from Apple to Wegmans to Jane’s one-person accountancy in Invercargill, NZ) is unleashed in passionate pursuit of jointly perceived soaring purpose (= win a Nobel peace prize like Yunus, or at least do something worthy of bragging about 25 years from now to your grandkids) and personal and client service Excellence.

Such Talent unbound pursue Quests—rapidly and relentlessly experimenting and failing and trying again—which surprise and surpass and redefine the expectations of the individual and the servant leader alike. The collective “products” of these Quests offer the best chance of achieving rapid organizational and individual adaptation to fast-transforming environments, and provide the nutrition for continuing (and sometimes dramatic) re-imaginings which re-draw the boundaries of industries and communities and human achievement and the very conception of what is possible.

In turn, such organizations, bent upon excellence and re-imaginings based on maximizing human creativity and achievement, will *automatically* create cadres of imaginative and inspiring and determined servant leaders who stick around to take the organization to another level, and then another—or, equally or *more* important, leave to spread the virus of Freedom-Creativity-Excellence-Transforming Purpose by pathfinding new streets, highways, and alleyways which vitalize and revitalize, through creative destruction, Entrepreneurial Capitalism, which is the best hope for maximizing collective human Freedom, Happiness, Prosperity, Wellbeing—and, one prays, some measure of Peace on Earth.

Oath of Office: Managers/Servant Leaders

Our goal is to serve our customers brilliantly and profitably over the long haul.

Serving our customers brilliantly and profitably over the long haul is a product of brilliantly serving, over the long haul, the people who serve the customer.

Hence, our job as leaders—the alpha and the omega and everything in between—is abetting the sustained growth and success and engagement and enthusiasm and commitment to Excellence of those, one at a time, who directly or indirectly serve the ultimate customer.

We—leaders of every stripe—are in the “Human Growth and Development and Success and Aspiration to Excellence business.” “We” (leaders) only grow when “they” (each and every one of our colleagues) are growing.

“We” (leaders) only succeed when “they” (each and every one of our colleagues) are succeeding.

“We” (leaders) only energetically march toward Excellence when “they” (each and every one of our colleagues) are energetically marching toward Excellence.

Period.

*Organizations
exist to serve.
PERIOD.*

*Leaders live to
serve.
PERIOD.*

Business and Human Well-being: Joined at the Hip?

Just discovered Mihaly Csikszentmihalyi's book ... *Good*

Business. Business has become center of society. As such, an obligation to community is front & center. Business, per Csikszentmihalyi, as societal bedrock, has ...

RESPONSIBILITY

to increase “SUM OF
HUMAN WELL-
BEING.” (A mouthful!!!)

Business is **NOT** "part of the community." In terms of how adults collectively spend waking hours ... business **IS** the community. Should act accordingly.

Business is ... **statistically** ... responsible for the livelihood of the great majority of adults in any given community. That's a rather big deal.

Community obligations are similar for ... **all flavors of business** ... tiny to grand, private or public.

The **(REALLY)** good news:

**Community mindedness is
a great way [the BEST way?] to have
spirited/committed/
customer-centric work
force—and, ultimately,
increase [maximize?] profitability!**

Problems Revealed:
Run Up to the Great Recession,
When Is Enough ... **ENOUGH?**

“At a party given by a billionaire on Shelter Island, Kurt Vonnegut informs his pal, Joseph Heller that their host, a hedge fund manager, had made more money in a single day than Heller had earned from his wildly popular novel Catch-22 over its whole history. Heller responds ... Yes, but I have something he will never have ...

enough.”

—John Bogle, ***Enough:** The Measures of Money, Business, and Life*
(Bogle is founder of the Vanguard Mutual Fund Group)

*“Too Much Cost,
Not Enough Value”*

*“Too Much Speculation,
Not Enough Investment”*

*“Too Much Complexity,
Not Enough Simplicity”*

*“Too Much Counting,
Not Enough Trust”*

*“Too Much Business Conduct,
Not Enough Professional Conduct”*

*“Too Much Salesmanship,
Not Enough Stewardship”*

*“Too Much Focus on Things,
Not Enough Focus on Commitment”*

*“Too Many Twenty-first Century Values,
Not Enough Eighteenth-Century Values”*

*“Too Much ‘Success,’
Not Enough Character”*

XXIX. The Shareholder Value **Myth**

“The notion that corporate law requires directors, executives, and employees to maximize shareholder wealth simply isn’t true. There is no solid legal support for the claim that directors and executives in U.S. public corporations have an enforceable legal duty to maximize shareholder wealth. The idea is fable.”

—Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

“Courts uniformly refuse to actually impose sanctions on directors or executives for failing to pursue one purpose over another. In particular, courts refuse to hold directors of public corporations legally accountable for failing to maximize shareholder wealth.” —Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

“From a legal perspective, shareholders do not, and cannot, own corporations. Corporations are independent legal entities that own themselves, just as human beings own themselves. ... Shareholders own shares of stock. A share of stock is simply a contract between the shareholder and the corporation, a contract that gives the shareholder very limited rights under limited circumstances. In this sense, stockholders are no different from bondholders, suppliers, and employees. All have contractual relationships with the corporate entity. None ‘owns’ the company itself.” —Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

“Courts uniformly refuse to actually impose sanctions on directors or executives for failing to pursue one purpose over another. In particular, courts refuse to hold directors of public corporations legally accountable for failing to maximize shareholder wealth.” —Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

“ [a corporation] can be formed to conduct or promote any lawful business or purpose”

—from Delaware corporate code (no mandate for shareholder primacy), per Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

“What about shareholders’ rights to sue corporate officers and directors for breach of fiduciary duty if they fail to maximize shareholder wealth? Such a right turns out to be illusory. Executives and directors’ duty of loyalty to the corporation bars them from using their corporate positions to enrich themselves at the firm’s expense, but unconflicted directors remain legally free to pursue almost any other goal.”

—Lynn Stout, *The Shareholder Value Myth: How Putting Shareholders First Harms Investors, Corporations, and the Public*

*“On the face of it,
shareholder value is the
dumbest idea in the world.
Shareholder value is a
result, not a strategy. ...
Your main are your
employees, your customers
and your products.”*

—Jack Welch (Yes, THAT Jack Welch, long time primo
vociferous promoter of shareholder primacy/*FT*, 0313.09/p. 1)

*“I told my board that if they want to get the share price up
50% in 12-18 months, I can do it without raising a sweat.
But it will destroy the longterm prospects of the
company—and they’ll have to do it without me.”*

—CEO, large (\$10B+) electronic components company

someone,
that's when I
go to work for
them.”*

—John DiJulius,

What's the Secret to Providing a World-class Customer Experience

“An organization can only become the-best-version-of-itself to the extent that the people who drive that organization are striving to become better-versions-of-themselves.” *“A company’s purpose is to become the-best-version-of-itself. The question is: What is an employee’s purpose? Most would say, ‘to help the company achieve its purpose’—but they would be wrong. That is certainly part of the employee’s role, but an employee’s primary purpose is to become the-best-version-of-himself or –herself. ...*

“When a company forgets that it exists to serve customers, it quickly goes out of business. Our employees are our first customers, and our most important customers.”

—Matthew Kelly, The Dream Manager

“The path to a hostmanship culture paradoxically does not go through the guest. In fact it wouldn’t be totally wrong to say that the guest has nothing to do with it. True hostmanship leaders focus on their employees. What drives exceptionalism is finding the right people and getting them to love their work and see it as a passion. ... The guest comes into the picture only when you are ready

to ask, ‘Would you prefer to stay at a hotel where the staff love their work or where management has made customers its highest priority?’”

“We went through the hotel and made a ... ‘consideration renovation.’ Instead of redoing bathrooms, dining rooms, and guest rooms, we gave employees new uniforms, bought flowers and fruit, and changed colors. Our focus was totally on the staff. They were the ones we wanted to make happy. We wanted them to wake up every morning excited about a new day at work.” —Jan Gunnarsson and Olle Blohm,
Hostmanship: The Art of Making People Feel Welcome.

“We are a ‘Life Success’ Company.”

—Dave Liniger, founder, RE/MAX (*“The organization would ultimately win not because it gave agents more money, but because it gave them a chance for better lives.”* —Phil Harkins & Keith Hollihan, *Everybody Wins*, the story of RE/MAX)

“Some of our people spend their entire working lives in our agency. We do our damndest to make it a happy experience. I put this first, believing that superior service to our clients, and profits for our stockholders, depend on it.”

—David Ogilvy, on Ogilvy & Mather’s corporate culture

“No matter what the situation, [the great manager’s] first response is always to think about the individual concerned and how things can be arranged to help that individual experience success.”

—Marcus Buckingham, *The One Thing You Need to Know*

“The key difference between checkers and chess is that in checkers the pieces all move the same way, whereas in chess all the pieces move differently. ... Discover what is unique about each person and capitalize on it.” —Marcus Buckingham

“I can’t tell you how many times we passed up hotshots for guys we thought were better people and watched our guys do a lot better than the big names, not just in the classroom, but on the field—and, naturally, after they graduated, too. Again and again, the blue chips faded out, and our little up-and-comers clawed their way to all-conference and All-America teams.” —Coach Bo Schembechler (& John Bacon), “Recruit for Character,” *Bo’s Lasting Lessons*

*“The one piece of advice which will contribute to making you a better leader, will provide you with greater happiness, and will advance your career more than any other advice... and it doesn't call for a special personality or any certain chemistry...and anyone can do it, and it's this: **You must care.**”*

—LTGEN Melvin Zais

“We are ladies and gentlemen serving ladies and gentlemen.” —Ritz-Carlton Credo (In the hotel business, members of front line staff have historically been treated more like cannon fodder than “ladies and gentlemen:”—e.g., turnover >> 100% per annum.)

“The role of the Director is to create a space where the actors and actresses can become more than they’ve ever been before, more than they’ve dreamed of being.”

—Robert Altman, Oscar acceptance speech

“Groups become great only when everyone in them, leaders and members alike, is free to do his or her absolute best. ... The best thing a leader can do for a Great Group is to allow its members to discover their greatness.”

—Warren Bennis and Patricia Ward Biederman, *Organizing Genius*

“I have always believed that the purpose of the corporation is to be a blessing to the employees.”

—Boyd Clarke, former CEO, The Tom Peters Company

“To be an effective leader, you have to first have a desire and a commitment to helping people.”

—Harry Rhoads, Co-founder and CEO, Washington Speakers Bureau

**Cited in particular, “The Good Jobs Strategy,” by M.I.T. professor Zeynep Ton.

Oath of Office: Managers/Servant Leaders

Our goal is to serve our customers brilliantly and profitably over the long haul.

Serving our customers brilliantly and profitably over the long haul is a product of brilliantly serving, over the long haul, the people who serve the customer.

Hence, our job as leaders—the alpha and the omega and everything in between—is abetting the sustained growth and success and engagement and enthusiasm and commitment to Excellence of those, one at a time, who directly or indirectly serve the ultimate customer.

We—leaders of every stripe—are in the “Human Growth and Development and Success and Aspiration to Excellence business.”

“We” (leaders) only grow when “they” (each and every one of our colleagues) are growing.

“We” (leaders) only succeed when “they” (each and every one of our colleagues) are succeeding.

“We” (leaders) only energetically march toward Excellence when “they” (each and every one of our colleagues) are energetically marching toward Excellence.

Period.

TJP/TIB* #1: *Your principal moral obligation as a leader is to develop the skillset, “soft” and “hard,” of every one of the people in your charge (temporary as well as semi-permanent) to the maximum extent of your abilities. The good news: This is also the #1 mid- to long-term ... profit maximization strategy!*

* This I Believe (The “TIB List” idea courtesy architect Bill Caudill.)

Imagine looking back **5 years** from now on the prior

5 years: **What will you be**

able to say [*in exacting detail*]

about your ...

PEOPLE

DEVELOPMENT

SCORECARD?*

*It's the "people development stuff" you'll remember most—and assess yourself on most—when you look back, at age 70, on your career as a leader: "I gave Ellen Smith the boost that launched her magnificent career." (Etc.)

FYI:

**Your LEGACY
= TWO Promotion
Decisions/Year* ****

**On average, a senior manager makes two important promotion decisions/year.*

***A top promotion decision, given its lasting impact, deserves as much care as an acquisition decision!*

(They are, de facto, the same thing.)

Excellent organizations: **CATHEDRALS IN WHICH THE FULL AND AWESOME POWER OF THE IMAGINATION AND SPIRIT AND NATIVE ENTREPRENEURIAL FLAIR OF DIVERSE INDIVIDUALS IS UNLEASHED IN PASSIONATE PURSUIT OF ... EXCELLENCE.**

“I start with the premise that the function of leadership is to produce more leaders, not more followers.”

—Ralph Nader

WPP: Our Mission*

***TO DEVELOP AND MANAGE TALENT;
TO APPLY THAT TALENT,
THROUGHOUT THE WORLD,
FOR THE BENEFIT OF CLIENTS;
TO DO SO IN PARTNERSHIP;
TO DO SO WITH PROFIT.***

*STARTS with/emerges from TALENT. Profit important but ...

DERIVATIVE!

7 Steps to Sustaining Success*

You take care of the people.

The people take care of the service.

The service takes care of the customer.

The customer takes care of the profit.

*The profit takes care of the
re-investment.*

*The re-investment takes care of the
re-invention.*

*The re-invention takes care of
the future.*

*(And at every step the only measure is
EXCELLENCE.)*

*To underscore the obvious, it all starts with: **“You ...**
take care of the people!

“In a world where customers wake up every morning asking, ‘What’s new, what’s different, what’s amazing?’ success depends on a company’s ability to unleash initiative, imagination and passion of employees at all levels—and this can only happen if all those folks are connected heart and soul to their work [their ‘calling’], their company and their mission.” —John Mackey and Raj Sisoda, *Conscious Capitalism: Liberating the Heroic Spirit of Business*

"Leadership is a gift. It's given by those who follow. You have to be worthy of it."—General Mark Welsh, Commander, U.S. Air Forces Europe

15 Point Human Capital Development Manifesto

**“Reframing Capitalism”:
A 15 Point Human
Capital Development
Manifesto/HCDM
at the Enterprise &
National Government Level**

Tom Peters

14 June 2012

World Strategy Forum

The New Rules: Reframing Capitalism

Seoul, Korea

“Reframing Capitalism”: A 15-Point Human Capital Development Manifesto/HCDM at the Enterprise and National Government Level

“In some sense you can argue that the science fiction scenario is already starting to happen. The computers are in control. We just live in their world.”—Danny Hillis

“Human creativity is the ultimate economic resource.”—Richard Florida

“Every child is born an artist. The trick is to remain an artist.”—Picasso

“Knowledge becomes obsolete incredibly fast. The continuing professional education of adults is the No. 1 industry in the next 30 years.”—Peter Drucker

“If you want staff to give great service, give great service to staff.”—Ari Weinzweig

In mid-June 2012 I spoke at a major event in Seoul, Korea, World Strategy Forum/ The New Rules: Reframing Capitalism. Predictably the discussion focused on global financial infrastructure. To ignore that would have been insanity. On the other hand, I believe that employment/unemployment is even more affected by the changing nature of work—and the wildly accelerating effectiveness of technology, such as artificial intelligence, in encompassing activities that employ tens of millions of people, especially in the OECD nations. I believe this is, in the mid- to long-term, our #1 problem—and #1 opportunity. Confronting the nature and extent of future employment is required for reasons of economic survival and growth—and for reasons of social and political stability. Having created here in a single paragraph the oceanic basis for what follows, I must admit that it was a mundane question (Question #1) in an interview before my speech that triggered this “manifesto.” Namely: “Dr. Peters, how would you define the perhaps changing nature of corporate social responsibility in these uncertain times?” Herewith, in effect my response—which, quite honestly, came as a surprise to me:

1. “Corporate social responsibility” starts at home—i.e., inside the enterprise!

MAXIMIZING GDD/Gross Domestic Development of the workforce is the primary source of mid-term and beyond growth and profitability—and maximizes national productivity and wealth. (The profitability axiom: If you want to serve the customer with uniform Excellence, then you must FIRST effectively and faithfully serve those who serve the customer—i.e. our employees, via maximizing tools and professional development.)

2. Regardless of the transient external situation, development of “human capital” is *always* the #1 priority. This is true in general, in particular in difficult times which demand resilience—and uniquely true in this age in which IMAGINATIVE brainwork is *de facto* the only plausible survival strategy for higher wage nations. (Generic “brainwork,” traditional and dominant “white-collar activities, is increasingly being performed by exponentially enhanced artificial intelligence. Please see Appendix ONE.)

3. Three-star generals and admirals (and symphony conductors and sports coaches and police chiefs and fire chiefs) OBSESS about training. Why is it an almost dead certainty that in a random 30-minute interview you are unlikely to hear a CEO touch upon this topic? (I would hazard a guess that most CEOs see IT investments as a “strategic necessity,” but see training expenses as “a necessary evil.”)

4. Proposition/axiom: The CTO/Chief TRAINING Officer is arguably the #1 staff job in the enterprise, at least on a par with, say, the CFO or CIO or head of R&D. (Again, external circumstances—see immediately above—are forcing our hand.)

5. The training budget takes precedence over the capital budget. PERIOD. It’s easier and more satisfying to get your picture taken next to a new machine. But how do you get a photo of a new and much improved attitude in a key distribution center? The catch: The odds are 25:1 that the new attitude will add more to the bottom line than will the glorious state-of-the-art machine.

In the 3rd quarter of 2011 manufacturing output went up 4.7 percent—one heck of an accomplishment. But there was a catch, and a big one. Gross hours worked in manufacturing went down 0.6 percent. Such ratios are becoming commonplace—and in services as much or more than in manufacturing. As we automate damn near everything and as that trend accelerates (been in an auto plant lately—where are the people?), output is dramatically outstripping labor usage. Great for productivity, borderline terrifying for workers. This “manifesto” is written with such numbers in mind—not only does that not mean that it’s neo-Luddite, but in fact the opposite. Timid strategies will not address the employment issue. Education and job content must be turned upside down—in short order.

6. Human capital development should routinely sit atop any agenda or document associated with enterprise strategy. Most any initiative you undertake should formally address implications for and contributions to human capital asset development.

7. Every individual on the payroll should have a benchmarked professional growth strategy. Every leader at every level should be evaluated in no small measure on the collective effectiveness of individual growth strategies—that is, each individual’s absolute growth is of direct relevance to every leader’s assessed performance.

8. Given that we ceaselessly lament the “leadership deficit,” it is imperative, and just plain vanilla common sense, that we maximize the rate of development of women leaders at every level—little if anything has a higher priority. (It is an outrage that this has not been the case until now—and is still not the case in far too many institutions.) (And, while there are no guarantees, women are more likely dispositionally to take a shine to the imperative of maximizing human asset development.)

9. Maximum utilization of and continued development of “older workers” (to age 70—or even beyond?) is a source of immense organizational and national growth and wealth. The rapidly aging population, with oldies far more healthy and vital than ever, ought to be an opportunity rather than a pain-in-the-butt to deal with.

I was intimidated by the conference title “Reframing capitalism”—and the fact that a passel of Nobel laureates in economics would be addressing the issue. Then it occurred to me that the mid- to long-term “reframing” was more about recasting the nature of work/jobs in, for example, the face of 2020’s artificial intelligence than about whether the Spanish bailout is \$100 billion or \$400 billion—as nontrivial as the latter is. I.e., what the hell will the world’s four billion or so workers be doing, say, 10 years from now? I’m not sure that sophisticated econometric analyses will be all that helpful in determining an answer.

10. The practical key to all human asset development activities is the 1st-line manager. (“Sergeants run the Army” is an accurate, commonplace observation—supported by immense development resources.) Hence development of the full cadre of 1st-line managers is an urgent—and invariably underplayed—strategic imperative. Arguably, the collective quality and development trajectory of 1st-line leaders is an organization’s #1 human asset development priority. (Consistent with all the above, the 1st-line leader’s skill at “people development” is her or his top priority—for which she or he must be rigorously and continually trained.)

11. The national education infrastructure—from kindergarten through continuing adult education—may well be National Priority #1. Moreover, the educational infrastructure must be altered radically to underpin support for the creative jobs that will be more or less the sole basis of future employment and national growth and wealth creation.

12. Associated with the accelerated priority of the national education infrastructure is a dramatically enhanced and appreciated and compensated role for our teachers—this status enhancement must necessarily be accompanied by rigorous accountability. There is no doubt that “teaching” (instilling) insatiable curiosity, say, which is the #1 attribute of a creative person, is no easy task; however, there is no way that it can be ducked if one looks at future definitions of employability.

13. The majority of us work in small enterprises; hence national growth objectives based upon human capital development MUST necessarily extend “downward” to even 1-person enterprises. Collective productivity improvement through human capital development among small businesses has an unimaginably large—and undervalued—payoff. While many small businesses appreciate the notion, they are unprepared to take the steps necessary to engage their, say, dozen employees in seeking quantum leaps in creative work content and productivity improvements.

14. Needless to say, the activities imagined here will only be possible if abetted by a peerless National Information and Communication Infrastructure. Indeed, the work referred to here is being done—and the need is appreciated and reasonably well funded. The effort must not falter; the new information-based tools and accompanying infrastructure are the coin of the realm.

15. Associated with the above is a RADICAL reorientation of leadership education and development—throughout the enterprise/education/continuing education establishment. (E.g., Among other things, the MBA and executive education will require open-heart surgery—aimed at shifting focus from finance and marketing to human resource development.) To deal with the most likely future employment scenarios, leaders will need to be masters of the liberal arts—said arts are, again, the determinant of responding to the emerging world.

The agenda implied by the above “manifesto” is bold—and its moorings are a long way from where we are today. But this or something rather like it fall into a category labeled—not optional.

XXXI. Overdoing “Strategy” Per Se/Dealing (in the Real World) With Strategic Disruption

“Amateurs talk about strategy. Professionals talk about logistics.”—General Omar Bradley

Great 12/28/13 *Financial Times* book review: *Britain Against Napoleon: The Organization of Victory*. Chalk up the win as due to superior management/logistics.

Former McKinsey MD to team, on over-emphasizing strategy: ***“Don’t forget the implementation part, boys. It’s that all-important ‘last 99%.’”***

Jack Welch on “strategy”: “Pick a general direction and then implement like hell.”

TP: Could we call it WTFWUT* rather than “strategy”? [*WhatThe F*** We’re Up To] Strategy is too grand a word for me.

Glen Taylor: “Like sports—your competitors already know your strategy Success = focus on execution needed to win.”

Clay Christensen [and his obsession with disruption] be damned; message for you and me: **FIRST**, get so frigging good at something that you have reason to worry about being disrupted.

If you spend your life worrying about disruption, you won’t have time to get good enough at anything to be disrupted.

*“Amateurs
talk about
strategy.
Professionals
talk about
logistics.”*

—General Omar Bradley

Conrad Hilton, at a gala celebrating his career, was called to the podium and asked, *“What were the most important lessons you learned in your long and distinguished career?”*

His answer (**in full!**) ...

*“Remember to tuck the shower curtain inside the bathtub.”**

*You get 'em in the door with “location, location, location.” You keep 'em coming back with the tucked in shower curtain. (NB: Profit rarely comes from visit/transaction #1; it is a byproduct of coming back/transaction #2, #3, #4 ... #44.)

(FYI: I usually start **ALL** my presentations with Mr. Hilton and the shower curtain—and the abiding centrality of execution.)

“In real life, strategy is actually very straightforward. Pick a general direction ... and implement like hell.” —Jack Welch

(“When assessing candidates, the first thing I looked for was energy and enthusiasm for execution. Does she talk about the thrill of getting things done, the obstacles overcome, the role her people played —or does she keep wandering back to strategy or philosophy?” —Larry Bossidy)

*“Costco figured out
the big, simple things
... and
executed with
total
fanaticism.”*

—Charles Munger, Berkshire Hathaway

XXXII. Only One Can Be the Cheapest

*“Only one company can be the cheapest. All others must use ...**design**.”*

—Rodney Fitch, Fitch & Co.

(Source: Insights, definitions of design, the Design Council [UK])

Design RULES: **APPLE**

market cap *surpasses*

Exxon Mobil! (August 2011)

Q.E.D. (Even if it doesn't last—it didn't, it's been on and off—it is an irrevocable—

STAGGERING —demonstration of DESIGN POWER.)

“With its carefully conceived mix of colors and textures, aromas and music, Starbucks is more indicative of our era than the iMac. **STARBUCKS** is to the Age of Aesthetics what McDonald’s was to the Age of Convenience or Ford was to the Age of Mass Production—the touchstone success story, the exemplar of ... the aesthetic imperative. ... ‘Every Starbucks store is carefully designed to enhance the quality of everything the customers see, touch, hear, smell or taste,’ writes CEO Howard Schultz.”

—Virginia Postrel, *The Substance of Style: How the Rise of Aesthetic Value Is Remaking Commerce, Culture and Consciousness*

Hypothesis:

DESIGN is the principal difference

between **LOVE** and **HATE**

Design is ... **NEVER**

NEUTRAL. (It’s 99% about emotional response.)

“You know a design is good when you want to lick it.”

—Steve Jobs (*Design: Intelligence Made Visible*, Stephen Bayley & Terence Conran)

Ann Landers, advice columnist, as management-DESIGN guru/
Three criteria for products, projects, a communication etc.:

Good.

True.

Helpful.

*“Businesspeople don’t need
to ‘understand designers
better.’ Businesspeople need
to be designers.”*

—Roger Martin/Rotman Mgt School/University of Toronto

Design: **The Words We Use:**

“If you can’t write your movie idea on the back of a business card, you ain’t got a movie.” —Samuel Goldwyn

“I make all the launch teams tell me what the magazine’s about in five words or less. You can’t run alongside millions of consumers and explain what you mean. It forces some discipline on you.” —Ann Moore, CEO, Time Inc., on new mags

*“If you can’t state your position in eight words or less, you don’t have a position.”
—Seth Godin*

“The difference between the right word and the almost right word is the difference between lightning and the lightning bug.” —Mark Twain
(Design truly is ubiquitous—and thinking about it as design per se is paramount.)

Charles Handy on design: *“One bank is currently claiming to ... **‘leverage its global footprint to provide effective financial solutions for its customers by providing a gateway to diverse markets.’**”*

*“I assume that it is just saying that it is there to ... **‘help its customers wherever they are.’**”*

Design & Packaging ...

Packages ... are about containing and labeling and informing and celebrating. They are about power and flattery and trying to win people's trust. They are about beauty and craftsmanship and comfort. They are about color, protection, survival.”

Even in a small enterprise, consider
designating a ...

CXO*

*Chief e**X**perience Officer [And *think*
like a “CXO” even in a 1-person
professional services firm!]

XXXIIB. Systems Design/Systems That Sing: Passing the “Elegance Test”

Systems are an organization’s life blood. **PERIOD.**

Systems must “work.” **PERIOD.**

Systems must “get the job done.” **PERIOD.**

But in a way that’s the least of it—or, more accurately, far less than the whole story.

In mathematics, “solving the conundrum” is arguably less than half the story. The mathematics community **INFORMALLY** demands that A proof, in order to become part of the canon, be marked by “elegance.”

“Elegance.”

What a marvelous word. And a word/standard—I firmly believe—by which any and every system should be judged in order to be proclaimed “effective.” Using the system, like a Steve Jobs product, should be a joy in and of itself.

Why not?

Or, rather: Why the hell not?

Actually, some years ago I created my own systems effectiveness measures. Four, to be exact. I argued then—and far more so today—that every system be judged on four design-driven criteria:

Beauty.

Grace.

Clarity.

Simplicity.

Why not?

We don't just want clients to "use" our new system. We want them to be **"startled"** by what a joy it is to maneuver through, to be **"stunned"** by how much the system helps them, and in fact causes them re-conceive their work overall. Or some such.

I am arguing here—in no uncertain terms—that: *Great—beautiful, graceful, clear, simple, elegant—systems are as important as the products and services they are designed to support.*

(Addendum: And while we're at it, we also need a ... formally designated ...

CGRO/Chief Grunge Removal Officer.

That is, all systems grow more complex over time. This a fact of life. One big reason smaller concerns outperform larger firms is that the smaller outfits' systems are not yet grunge victims. We need to deal with "grunge drift" in a formal fashion—some form of CGRO.)

XXXIII. KaBoom\$\$\$\$\$!

In effort to be "with it," don't overlook fact that ...

10,000 boomers turn 65

EVERY DAY

'til **2030**. Many/most have Big D:
discretionary income.

**Is your marketing to/product-
services for age 65/65+folk as
imaginative as that aimed at 30 and
under ???**

Attribute #1 of large share of 65/65+ crowd? Holy Grail:

DISCRETIONARY INCOME!

“In 2009, households headed by adults ages 65 and older ...

*had **47 times** as much net wealth as the typical household headed by someone under 35 years of age. In 1984, this had been a less lopsided 10-to-1 ratio.”—Pew Research*

*“The New Customer Majority is the ... **only** ... adult market with realistic prospects for significant sales growth in dozens of product lines for thousands of companies.”*

—David Wolfe & Robert Snyder, Ageless Marketing

Barbara Cochlin: **“So if U want 2
surf the Waves of a
Serious MegaTrend,
find a Boomer Niche
& KaBoom!! :) ”**

TP: Bloody brilliant!

“People turning 50 today have

more than
half of their adult life ahead

of them.”* —Bill Novelli, *50+: Igniting a Revolution to Reinvent America*

(*This absurdly simple comment hit me right between the eyes. In fact, it was single-handedly my motivation for jacking this topic waaaaaaay up my priority. Think about it: Marketers are more or less done with us at 35. But in the real world, the over 50s—there are almost 80 million boomers, for example—are in fact

only half done. WOW !)

*“Marketers’ attempts at reaching those over 50 have been miserably unsuccessful. **No market’s motivations and needs are so poorly understood.**”*

—Peter Francese, publisher, *American Demographics*

*“Fifty-four years of age has been the highest cutoff point for any marketing initiative I’ve ever been involved in. **Which is pretty weird when you consider age 50 is right about when people who have worked all their lives start to have some money to spend.**”* —Marti Barletta, *PrimeTime Women*

“Baby-boomer Women: *The Sweetest of Sweet Spots for Marketers*”

—David Wolfe and Robert Snyder, *Ageless Marketing*

“Older people have an image problem. As a culture, we’re conditioned toward youth. ... When we think of youth, we think ‘energetic and colorful;’ when we think of middle age or ‘mature,’ we think ‘tired and washed out.’ and when we think of ‘old’ or ‘senior,’ we think either ‘exhausted and gray’ or, more

*likely, we just don’t think. ... **The financial numbers are absolutely inarguable—the Mature Market has the money.** Yet advertisers remain astonishingly indifferent to them. ...”*

—Marti Barletta, *PrimeTime Women*

XXXIV. **Radical** Personal Development

This riff took place @ 9AM on ... **1 January 2014:**

Accelerating tech changes/etc. = Middle class in tank; good jobs falling to algorithmic automation and offshoring. **ONLY** answer/**ONLY** chance: Determined/intensive commitment to personal growth. Start date: 1/1/14.

Public policy is largely irrelevant. Revolutionary econ structural change is here-to-stay. Only defense is personal development. **NOW!**

You totally misunderstand overall econ context if you choose not to start today on

RPD */Radical Personal*

Development.

If Reps & Dems were all geniuses & worked together, econ tsunami would still thunder in. Answer is RPD/Radical Personal Development. **PERIOD.**

Remember: An excellent “Brand You” portfolio is about self-LESS-ness, not self-ISH-ness. You are as good (or bad) as the network you develop-nurture. PERIOD.

Beating the econ revolution: Invest in your network (help/share). Hit the books (study). Work your ass off. **WOW-ify** every project. Start: **TODAY.**

(I like RPD. Just bought ... <http://RadicalPersonalDevelopment.com>.)

Beating the
economic/tech
revolution: Invest in
your network (share).
Hit the books (study).
Work your ass off.
WOW-ify every
project. Start:
TODAY.*

*The **ONLY** way to win/thrive.

Circa 2014+:
Multiple Choice Examination

You will you lose your job to ... choose one:

Offshore contractor?
Advanced high-speed algorithm?
Robot?
A re-tooled value-added “Brand You”?

Source: Inspired by Dan Pink

leadership is to
produce more
leaders, not more
followers.”* —Ralph Nader*

*This is a “terrific quote.” BUT ... please pause: **WHAT DOES IT
MEAN TO YOU? RIGHT NOW?**
(PLEASE ... STOP & CONSIDER.)

XXXV. FUNDAMENTALLY ...

We **Are** Ready!

*All human
beings are
entrepreneurs.*

When we were in the caves we were all self-employed ... finding our food, feeding ourselves. That's where human history began. ... As civilization came we suppressed it. We became labor because they stamped us, 'You are labor.' We forgot that we are entrepreneurs." —Muhammad Yunus

(I do not wish in any way to make light of the new sense—partially real, partially perceived—of job insecurity brought about by the likes of the financial crisis, globalization and automation. Many thought they were getting one sort of deal—e.g., college degree is ironclad lifelong job assurance—and it turns out they weren't.

But ...

Let's take on board Yunus' comment.

For example, I live in rural Vermont. When work needs doing, I have a long list of plumbers and carpenters and electricians and others who will respond to my needs. *Poste haste*. And exhibiting **EXCELLENCE** in their craft. Some may have degrees. Many don't.

But one thing is sure: *None have an iota of conventional job security*. They depend on their wits, their skill, their community reputation.

In the very best sense of the word, they are “normal”—the guy or gal next door. And they are—every one of them—**ENTREPRENEURS** in the sense intended by Mr. Yunus' quote above.

No, this “entrepreneurial thing,” or “entrepreneurial flair,” is **NOT** some weird genetic set carried only by a handful of us. It is, to the contrary, imbedded in just about all of us.

Ready for ignition ...)

(“We are in no danger of running out of new combinations to try. Even if technology froze today, we have more possible ways of configuring the different applications, machines, tasks, and distribution channels to create new processes and products than we could ever exhaust.” —Erik Brynjolfsson and Andrew McAfee, *Race Against The Machine: How the Digital Revolution Is Accelerating Innovation, Driving Productivity, and Irreversibly Transforming Employment and the Economy*)

XXXVI. Benchmarking, Problems Therewith

Benchmarking Rule #1: *“Best practices” are to be learned from, **NOT** mimicked/treated as law. “Best practices” must **ALWAYS** be adapted to local conditions!*

Benchmarking Rule #2: *When pursuing “best practices,” **DON’T** benchmark.*

***FUTUREMARK.** Tomorrow’s stars are already out there. Find ’em!*

Benchmarking Rule #3: ***DON’T** benchmark.*

***OTHERMARK.** Tech company can adopt “**WOW**” service practice from, say, a local restaurant or car dealer.*

Benchmarking Rule #4: *Make benchmarking*

EVERYONE**’s biz. Ask all to collect best practices from “everyday life.” Share **WEEKLY.

Corporate governance (Twitter I.D.): “Healthcare’s service standard shouldn’t be other HC providers. It should be Zappos.”

One of VA’s biggest breakthroughs apparently started with a nurse’s observation from the local Burger King. (Use of barcoding.)

Adam Jacoby: *“Examples of excellence are everywhere. The art is in customization & execution. Don’t settle for others’ best.”*

The setting need not be grand! We can also learn powerful tidbits—or more—from the corner store! (If our eyes are always open.) (My book The Little BIG Things opens with the sparkling restroom in a small restaurant in Gill, Massachusetts.)

Lots of small biz owners are refugees from big business—trying to right “worst practices” they were muzzled by.

Corporate governance: Yes, and I discovered my corner shop owner was a PhD in economics and an MBA. Talked for full hour on service!

Sandy Maxey: “As currently used, benchmarking is a tool of self-reinforcing smug complacency—not about innovation.”

TP: Alas, I have no choice but to agree.

*“Best practices” are
to be learned from,*

***NOT** mimicked/
treated as dogma.*

“Best Practices”

*must **ALWAYS***

be adapted to

LOCAL

conditions!

XXXVII. W-A-A-Y Overemphasizing Big Stuff
(And other issues concerning small businesses and growth businesses)

Why is “the business literature” overwhelmingly about giant corporations or self-help for individuals? Where’s stuff on 2-50 person company—where the large majority of us work?

It’s partially because “gurus” like me historically get off on interviewing the Jack Welches of the world.

Frankly, I think the “gurus” or academics disdain or ignore these 2-50 companies.

There is no time that is bad for a start-up ... if you are passionate about something and can beg, borrow, or steal a few bucks. (And it often *can* be just “a few” bucks.)

My focus here is *not* on entrepreneurs and start-ups. I’m thinking more about an existing 2-50 person company that someone’s aiming to make supercool.

My real target is a 17-person company that someone wants to guide to product or service excellence, stellar productivity—and also make it a “best place to work.”

Comment: Isn't focus on "scalability" (growth & replication)?

Response: If I never hear the term "scalable" my life will be immeasurably happier.

Comment: Isn't every company into growth? Using giants as benchmarks?

Response: What about a local auto dealership or community bank—not aiming for \$10B in assets or \$250M in sales?

My favorite book on non-monsters: Bo Burlingham's *Small Giants: Companies That Choose to Be Great Instead of Big*

My #2 fav on non-monsters: George Whalin's *Retail Superstars: The Best 25 Independent Stores in America*

Comment re fighting perils of size: Richard Branson used to say automatically break a unit up when it gets to 50 employees. *Jack Welch used to say he wanted every piece of GE to be run like an excellent small biz.*

Robert Cook: "I worked in one of Jack Welch's businesses; always pushing team to understand their customers but run your own business or else."

In a way we tried to de facto focus on the "working size" bits in *In Search of Excellence*. Avoided CEOs. Aimed to extract lessons from the person running a \$50M division.

New aim: I want my bit "Tingleworthy." Wow-ify that little sucker 'til it's Tingleworthy! Okay?

Glen Taylor: *"Yes, like a great rock band's growth comes when you make ravenous fans of what you do. If it's not tingleworthy, who gives a sh*t."*

TP: Beautiful, brother! Beautifully beautiful!

Woody Zuill: *"I am fully in alignment on this. If Not Tingle Now, When?"*

Adam Jacoby: *"In my last biz we called it creating a 'World of Wow.'"*

TP: Love it!

*Wow-ify that
little sucker
'til it's
Tingleworthy!
(What else?)*

Jerry Garcia: “We don’t want to be the ‘best of the best.’ We want to be the only ones who do what we do.”

Per my 1999 PSF Model: *A small business is also a 25-person logistics department in a \$250M business unit.* (PSF = Professional Services Firm.)

Small biz: *Training Inc., a 14-person unit in a 50-person HR dept. in a \$200M biz unit in a \$3B corp.*

Comment: Training unit is different from small business.

NO. Excellence for that 14-person training dept. dittos the 14-person retailer in my book. Shoot for Tingleworthiness or bust.

Carlo Navato: “And that’s what matters right? Authentic, original, visceral, bang!”

FYI: Start-ups are not particularly a young person’s affair: In fact, in the U.S. most start-ups are older folks, many many 50+/50++.

Comment: Aversion to scalability cannot hold for tech/Web.

Response: Rubbish. There is no “tech.” There are 23,000,000 different flavors thereof. Minimum.

I venture to say that if you are focused on “scalability” from the start, you are doomed.

To aspire to be Facebook is arrogance beyond measure. To use FB as a model is insane.

I admire boldness. But the fact that there exist a handful of bazillion-\$\$ companies is of no use whatsoever to a start-up.

Protagonist: “Scale this sucker and monetize it and sell it.”

TP: Let’s do seriously/embarrassingly cool shit! And ... ENJOY THE RIDE!

Small (entrepreneurial) biz: ***Training Inc., a 14-person unit* in a 50-person HR department in a \$200M biz unit in a \$3B corporation—aiming for Excellence & WOW!***

***PSF** /Professional Service Firm

(See my Professional Service Firm 50: Fifty Ways to Transform Your “Department” Into A Professional Service Firm Whose Trademarks Are Passion and Innovation.)

Comment: “FB focused their product to make it great by scaling slowly, college by college. That’s what a great biz does.”

TP: Agree. Most of the Web successes I know come from a superb niche idea; if it begins to gain traction, then worry about growth/replication/“scaling.”

Personally, I’d rather have \$2M in venture money than \$12M; in the latter case I’d be perpetually pushed to do “good enough” work and grow (“scale”) as fast as I can.

(Parallel: To the amazement of one and almost all, I negotiated a *low* advance for my book #2 so I wouldn’t be forced to try to quickly copy #1/*In Search of Excellence* while it was “hot.” I never regretted that decision for as much as a nanosecond.)

Protagonist: *“It’s ‘good enough’; so scale it, monetize it, and sell it.”*

Me: *“Let’s do seriously cool shit. Now!”*

B-I-G: Over-rated? !

“I am often asked by would-be entrepreneurs seeking escape from life within huge corporate structures, ‘How do I build a small firm for

*myself?’ The answer seems obvious: **Buy a very large one and just wait.”***

—Paul Ormerod, *Why Most Things Fail: Evolution, Extinction, and Economics*

“Mr. Foster and his McKinsey colleagues collected detailed performance data stretching back 40 years for 1,000 [large] U.S. companies. They found that

NONE of the long-term survivors managed to

outperform the market. Worse, the longer companies had been in the database, the worse they did.”—*Financial Times*

“Data drawn from the real world attest to a fact that is beyond our control: Everything in existence tends to deteriorate.”

—Norberto Odebrecht, *Education through Work*

“Not a single company that qualified as having made a sustained transformation ignited its leap with a big acquisition or merger.

Moreover, comparison companies—those that failed to make a leap or, if they did, failed to sustain it—often tried to make themselves great with a big acquisition or merger. They failed to grasp the simple truth that while you can buy your way to growth, you cannot buy your way to greatness.”

—Jim Collins/*Time*

Retail Superstars:

Inside the 25 Best Independent Stores in America

by George Whalin

Jungle Jim's International Market, Fairfield, Ohio: “An adventure in ‘shoppertainment,’ as Jungle Jim’s calls it, begins

in the parking lot and goes on to **1,600** cheeses and, yes,

1,400 varieties of hot sauce—not to mention

12,000 wines priced from \$8 to \$8,000 a bottle; all this is brought to you by 4,000 vendors. Customers come from every corner of the globe.”

Bronner's Christmas Wonderland, Frankenmuth, Michigan, pop 5,000: 98,000-square-foot “shop” features

the likes of **6,000** Christmas ornaments,

50,000 trims, and anything else you can name if it pertains to Christmas.

(I *love* these folks. I hand the book out to accountants and engineers and purchasing officers. These stores are 25 matchless examples of for-profit imagination-without-brakes.

We can *all* learn from them!)

1,600 cheeses.

1,400 varieties of hot sauce.

12,000 wines priced from \$8 to \$8,000 a bottle.

6,000 Christmas ornaments.

50,000 trims.

PASSION.

Small Giants:
Companies That Choose to Be Great Instead of Big
by Bo Burlingham

“They cultivated exceptionally intimate relationships with customers and suppliers, based on personal contact, one-on-one interaction, and mutual commitment to delivering on promises.

“Each company had an extraordinarily intimate relationship with the local city, town, or county in which it did business—a relationship that went well beyond the usual concept of giving back.

“The companies had what struck me as unusually intimate workplaces.

“I noticed the passion that the leaders brought to what the company did. They loved the subject matter, whether it be music, safety lighting, food, special effects, constant torque hinges, beer, records storage, construction, dining, or fashion.”

*“... agile
creatures
darting
between the
legs of the
multinational
monsters ...”*

—*Bloomberg BusinessWeek* on the peerless, economy-driving

German **MITTELSTAND***

(*Until very recently, year after year the world's #1 exporter was neither the USA nor Japan nor China. It was ... Germany. [China is now #1, Germany #2.]Why? In a word:

MITTELSTAND. That is, Germany's mid-sized superstars. The top tier is typically shockingly sophisticated high-end niche

players or, more accurately ... **NICHE**

DOMINATORS. Fact is—I think—I was the 1st American to study them close up. My colleagues and I did a PBS show on the Mittelstand in 1991—and I wrote about them in *Liberation Management* in 1992. I fell head-over-heels in love with these firms. I believe the likes of them can be the bedrock of most any economy—as they are in Germany. Who needs to depend on the giants? Nurture your Mittelstanders—that's my insistent message.)

ANYTHING! ANYWHERE! EVERYWHERE!

The (Mittelstand) Magicians of Motueka*

(*A wee town at the top of New Zealand's South Island)

W.A. Coppins Ltd.

(Coppins Sea Anchors/PSA/para sea anchors)

Coppins started in textiles in 1898; progressed into sophisticated sea anchors in 1976.

Thrive on ...

“wicked problems”*

(*Classic Mittelstand.)

For example (“wicked” as it gets), 2013 contract with a (VERY) tough customer, the U.S. Navy, for sea anchor for STLVASt/Small To Large Vehicle At Sea Transfer.

U.S. Navy's STLVASt Sea Anchor: A Mittelstand Trifecta*

Specialty nylon, Dyneema, from DSM/Netherlands.

Custom fabric from W. Wiggins Ltd./Wellington, NZ.

Final product from Coppins.

*These sorts of “MITTELSTAND Superstars” can be born and raised anywhere, thrive, and be the bedrock of a thriving national economy, a big one at that—e.g., Germany. Literally: As goes the Mittelstand, so goes Germany. (See above.)

XXXVIII. Judgment: Questionable Quality Thereof

Docs over-rely on clinical evidence—a handful of distorted memories about old cases. There are a jillion research studies on that.

(I mis-spoke on “jillion” studies re faulty clinical judgment. Number is probably a few thousand.)

I’ve been studying faulty judgment for **41** years. And research waaaaaay predates me.

Turns out most professionals are shitty decision makers. They over-rely on “clinical” experience—i.e., very low “n”/sample size.

Require as basic text in med school: **Daniel**

Kahneman’s Thinking,
Fast & Slow.

“Clinical judgment” is in general laughable.

Clinicians (a) are dealing with a small sample of data; and (b) their judgment is overwhelmed by a tiny sample-within-the-small-sample which is the extreme events they actually recall.

My friends and I laugh hysterically after close study of Kahneman. **ALL** professionals tend to be pathetic/horrid/wretched decision makers.

The power of “clinical” judgment? Most-all fund managers suck over even the mid-term, let alone the long-term. Try a Vanguard PURE Index fund if you want results. (THIS IS NOT A RECOMMENDATION.)

Re clinical judgment: HR “experts” are being made to look like, um, non-geniuses re hiring, etc., by Big Data/algorithms.

Re judgment: *The “funny thing” is how relatively simple the algorithm can be that tops “professional” human judgment.*

The research, alas, snickers at common sense, too. Common sense is more or less a synonym for faulty judgment.

Mr. Gladwell gave us *Blink*. Research is clear: Intuition is laughably bad in most cases.

Kahneman’s data suggest “thinking out of the box” is the supreme enemy of sound decision making.

CDC uses Big Data VERY accurately to predict the path of a flu outbreak. Odd correlations are better predictors than local disease data.

The days of sampling are coming to an end. Big Data often deals with population data.

NYC software start-up looks forward to the day when “data studs” will make more or less 100% of medical “clinical” “judgments.” (I do not exaggerate—may or may not be true; but even the fact that it’s thinkable enough to attract big venture money is telling.)

Tom Asaker: “Your judgment is probably decent. Unfortunately, your desires overrule it most of the time.”

Tom, I think there’s truth to that—but my confidence wanes by the hour. It’s more fundamental than emotional roadblocks. We are *always* dealing with small samples.

“The first principle is that you must not fool yourself, and you are the easiest person to fool.”—Richard Feynman (courtesy Tim Fargo)

This tweetstream constitutes bitter medicine. And the Big Data, etc., etc., road has a million twists & turns ahead. There is only one sin: Keeping one’s head in the sand.

Hence: **STUDY. STUDY.
STUDY.**

*Ain't it a bitch to
learn definitively that
your "judgment"
sucks? * I'm joking
but I'm not. And: I
sure as hell ain't
exempting myself!*

*For a definitive list of **159** cognitive biases, see ...

http://en.wikipedia.org/wiki/List_of_cognitive_biases; a summary listing follows.

DECISION-MAKING, BELIEF, BEHAVIORAL, SOCIAL, AND MEMORY BIASES

- 1. Actor-observer bias**
- 2. Ambiguity effect**
- 3. Anchoring or focalism**
- 4. Attentional bias**
- 5. Availability heuristic**
- 6. Availability cascade**
- 7. Backfire effect**
- 8. Bandwagon effect**
- 9. Base rate fallacy or base rate neglect**
- 10. Belief bias**
- 11. Bias blind spot**
- 12. Bizarreness effect**
- 13. Change bias**
- 14. Cheerleader effect**
- 15. Childhood amnesia**
- 16. Choice-supportive bias**
- 17. Clustering illusion**
- 18. Confirmation bias**
- 19. Congruence bias**

I have spent a lot of time in the last 12 months in denial concerning this stuff. I'm still in denial—but a lot less so than a year ago. I have now reached the point of being genuinely ...

OPEN-MINDED.

New World Order: FOUR MINUTES after your [Stefan Stern's] tweet [about Julian Birkinshaw's book *Becoming a Better Boss*], I COMPLETED downloading it onto my iPad.

Stefan Stern: "HNY." [Happy New Year.]

Tim Fargo: "The consistent problem is, even with 'data': It often gets shaped to support our prior opinion or discarded if not in agreement. Humans!!!"

Usually we shoehorn new data [from info that is inconsistent with our extant beliefs] into our prior model; our beliefs are untainted by the new contradictory evidence.

Cindy Potts: "Maybe excessive comfort in your judgment is a sign you've stopped growing/learning."

TP: Uncomfortable discussion [for many]. Losing followers. Cool.

*“The first principle is that you must not fool yourself, and you are the easiest person to fool.”**

—Richard Feynman (courtesy Tim Fargo)

***Repeat: I do not view this tweetstream as negative. We simply need to educate ourselves and strip off the rose-colored glasses—better judgments, or at least less-bad judgments, may well ensue. But:**

Blinders NEVER pay!

XXXIX. Culture Comes ... FIRST

WSJ/0910.13: *“What matters most to a company over time? Strategy or culture?”*

Dominic Barton,* MD, McKinsey & Co.: *“Culture.”*

Bill Walsh,* NFL Hall of Fame Coach: *“Culture precedes positive results. It doesn’t get tacked on as an afterthought on the way to the victory stand.”*

Lou Gerstner,* former CEO, IBM: *“If I could have chosen not to tackle the IBM culture head-on, I probably wouldn’t have. My bias coming in was toward strategy, analysis, and measurement. In comparison, changing the attitude and behaviors of hundreds of thousands of people is very, very hard. Yet I came to see in my time at IBM that culture isn’t just one aspect of the game—IT IS THE GAME.”*

*Note that all three of these CEOs are/were charter members of the **Hard-ass School of Management**. This was a realization that emerged for each one over time, but is stated here—UNEQUIVOCALLY.

*Yet I came to see in
my time at IBM that
culture isn't just one
aspect of the game—*

**IT IS THE
GAME.**

Hard is soft! *Soft is hard!**

*People. Customers. Values. Corporate “culture.” Some—most?—call these “variables” “soft.” Instead they say with a near sneer: “Show me the numbers and the plans!”

Surely there is room (and need!) for the numbers and a plan. But *they* are the real “soft stuff”—malleable and manipulable. (As we saw/continue to see time and again during the 2007+ economic crisis.)

The truly “hard stuff” cannot be faked or exaggerated: The relationships with our customers and our own people and our communities. The spirit and grit of the enterprise. Integrity. A willingness to laugh at good tries that go awry—the heart of innovation success. And so on.

“Hard” is soft. “Soft” is hard.

In Search of EXCELLENCE ... in just SIX words!

Culture With a ... **100X** **BANG**

*“I am ... **hundreds**
of times ... better here
[than in my prior hospital
assignment] because of the support
system. It’s like you are working in
an organism; you are not a single
cell when you are out there
practicing.”* —Dr. Nina Schwenk, Mayo Clinic*

*One of the two core values instilled by Dr. William Mayo (Mayo Clinic) in

1910 was, effectively, practicing team medicine. Designing the practice around the patient, or “patient-centered care,” as some call its rare manifestation today, was the other core value. At Mayo, upon occasion prominent M.D.s have been asked to leave because of their inability to fully grasp the team-practice concept.

Culture ... **UNVARNISHED**

There is a ton of high falutin' stuff written about "corporate culture"—hey, I've written some of it. But the unvarnished flavors appeal most to me. Former Burger King CEO Barry Gibbons is a pal. He orchestrated a magical turnaround at a troubled firm at a tough time. And the heart of the matter, which he largely achieved, is described—UNVARNISHED—here:

“I didn't have a 'mission statement' at Burger King. I had a dream. Very simple. It was something like,

***'Burger King is**
250,000 people, every
one of whom gives a
shit.’* Every one. Accounting.

Systems. Not just the drive-through. Everyone is 'in the brand.' That's what we're talking about, nothing less.”

Culture ... **Give-A-Shit-ism**

Forget “culture”/“vision”/“stories”/“narratives.” Skip the pseudo-technical language. Don’t call the consultants or “coaches.” Inspired by ex-BK chief Barry Gibbons, how about ...

Plain-Vanilla-Insanely-Important-Self-Managed-Give-A-Shit-ism? Give-A-Shit ... about each other, about the work, about the community.

Give-A-Shit-ism Attribute **#1**: A desperate need

(desperate, not urgent; need, not desire) to help others grow.

Mike Brown: “Commit to your people’s growth or don’t come at all.”

Respect is by far the most powerful motivator of them all.

Philip Hopewell on respect: *“Lean forward and listen.”*

TP: That “simple” tweet must be read carefully to have the impact it deserves.

More, subtle but not subtle, adapted from a tweet by Trevor Gay: It’s *“Thank you”* for the ordinary, not the extraordinary, that matters most. That’s the true sign of your awareness!

Culture ... **ADDENDUM**

My life's work (redux): "Hard is soft. Soft is hard." Hence, I am adding an **APPENDIX** on "Culture" to this treatise, "Excellence. NO EXCUSES." It is an updated version of a paper I drafted in 2012: **"Systems Have Their Place: SECOND Place."**

The foreword thereto:

There is no doubt whatsoever about the importance of systems—even in a 1-person business. For most of us, the "to do" list—a system if ever there were one—is an imperative aid to making it through the day. On the other hand, there is an other hand. That "to do" list is utterly worthless without the will and discipline to follow up with execution—i.e., actually doing the "to dos." And if that execution and doing involves others' help, as it usually does, then our attitude will differentiate between success and failure.

Fact is, we could get by without the system—the "to do" list per se. But we could not get by or get anything done without the "culture"—the discipline to follow up and attitude required to effectively work with others.

*Hence, the title of this essay: "Systems Have Their Place: **SECOND** Place." Herein are 10 cases—from the U.S. Air Force to Mayo Clinic to Toyota—in which systems, though of the utmost importance, were toothless without the "right" "organizational culture" to abet and sustain performance excellence.*

(If you're interested, as noted, the entire paper is added at the end as an Appendix.)

XL. Women **BUY!** Women **RULE!**

This Will Be the Women's Century

“I speak to you with a feminine voice. It’s the voice of democracy, of equality. I am certain, ladies and gentlemen, that

... this will be the women’s century.

In the Portuguese language, words such as life, soul, and hope are of the feminine gender, as are other words like courage and sincerity.”—President Dilma Rousseff of Brazil, first woman to keynote the United Nations General Assembly

*“Forget China, India and the Internet: Economic Growth Is Driven by Women.” [Headline.] “Even today in the modern, developed world, surveys show that parents still prefer to have a boy rather than a girl. One longstanding reason boys have been seen as a greater blessing has been that they are expected to become better economic providers for their parents’ old age. Yet it is time for parents to think again. **Girls may now be a better investment.** Girls get better grades in school than boys, and in most developed countries more women than men go to university. **Women will thus be better equipped for the new jobs of the 21st century, in which brains count a lot more than brawn. ... And women are more likely to provide sound advice on investing their parents’ nest egg—e.g.: surveys show that women consistently achieve higher financial returns than men do.** Furthermore, the increase in female employment in the rich world has been the main driving force of growth in the last couple of decades. *Those women have contributed more to global GDP growth than have either new technology or the new giants, India and China.*”*

Source: *Economist*

$$W > 2X (C + I)*$$

**“Women now drive the global economy. Globally, they control about \$20 trillion in consumer spending, and that figure could climb as high as \$28 trillion in the next five years. Their \$13 trillion in total yearly earnings could reach \$18 trillion in the same period. In aggregate, women represent a growth market bigger than China and India combined—more than twice as big in fact. Given those numbers, it would be foolish to ignore or underestimate the female consumer. And yet many companies do just that—even ones that are confident that they have a winning strategy when it comes to women. ...”*

Health Care ... 80%

**In the USA women hold > 50% managerial positions including > 50% purchasing officer positions; hence women also make the majority of commercial purchasing decisions. (Martha Barletta/TrendSight Group)*

“Women **ARE** the majority market.”

—Fara Warner/*The Power of the Purse*

“Female users are the unsung heroines behind the most engaging, fastest growing, and valuable consumer internet and e-commerce companies. Especially when it comes to social and shopping, women rule the Internet. In e-commerce, female purchasing power is clear. Sites like Zappos, Groupon, Gilt Groupe, Etsy, and Diapers are all driven by a majority of female customers. According to Gilt Groupe, women are 70% of the customers and 74% of revenue. ... But what’s different now is an exciting new crop of e-commerce companies. One King’s Lane, Plum District, Stella & Dot, Rent the Runway, Modcloth, BirchBox, Shoedazzle, Zazzle, and Shopkick are just a few examples of companies leveraging ‘girl power.’ The majority of these companies were also founded by women, which is also an exciting trend. And take a look at four of the new ‘horsemen’ of the consumer web—Facebook, Zynga, Groupon, and Twitter. The majority of all four properties’ users are female. Make that ‘horsewomen.’”

“So, if you’re at a consumer web company, how can this insight help you? Would you like to lower your cost of customer acquisition? Or grow revenue faster? Maybe you would benefit from having a larger base of female customers. Do you do enough product and user interface testing with female users? Have you figured out how to truly unleash the shopping and social power of women? You could also take a look at your team. Do you have women in key positions?”

—Aileen Lee, Kleiner Perkins Caufield & Byers (05.06.2011)

“One thing is certain: Women’s rise to power, which is linked to the increase in wealth per capita, is happening in all domains and at all levels of society. Women are no longer content to provide efficient labor or to be consumers with rising budgets and more autonomy to spend. ... This is just the beginning. The phenomenon will only grow as girls prove to be more successful than boys in the school system. *For a number of observers, we have already entered the age of ‘womenomics,’ the economy as thought out and practiced by a woman.*”

“TAKE THIS QUICK QUIZ: Who manages more things at once? Who puts more effort into their appearance? Who usually takes care of the details? Who finds it easier to meet new people? Who asks more questions in a conversation? Who is a better listener? Who has more interest in communication skills? Who is more inclined to get involved? Who encourages harmony and agreement? Who has better intuition? Who works with a longer ‘to do’ list? Who enjoys a recap to the day’s events? Who is better at keeping in touch with others?”

Source/back cover: ***Selling Is a Woman’s Game: 15 Powerful Reasons Why Women Can Outsell Men***, Nicki Joy & Susan Kane-Benson

“Women Beat Men at Art of Investing” —Headline, *Miami Herald*, reporting on a study by Profs. Terrance Odean and Brad Barber, UC Davis (Cause: Guys are “in and out” of stocks more often; women choose carefully and hold on for the long term.)

Portrait of a Female Investor

1. Trade less than men do
2. Exhibit less overconfidence—more likely to know what they don't know
3. Shun risk more than male investors do
4. Less optimistic, more realistic than their male counterparts
5. Put in more time and effort researching possible investments—consider details and alternate points of view
6. More immune to peer pressure—tend to make decisions the same way regardless of who's watching
7. Learn from their mistakes
8. Have less testosterone than men do, making them less willing to take extreme risks, which, in turn could lead to less extreme market cycles

Invests Like a
Girl: And
Why You
Should, Too*

—Book by Louann Lofton

“Girls are the new boys.”—*The Daily Mail*, 0425.2007, “Why today’s women want a girl”

“Boys Falling Seven Years Behind Girls at GCSE Level”—headline, *Weekly Telegraph*, UK, 10.25.06

“THE NEW GENDER GAP: From kindergarten to grad school, boys are becoming the second sex”—Cover story, *BusinessWeek*

Women < 30 in big USA cities (as of 2005)*: Earnings > Male counterparts. (117%)—Paco Underhill, *What Women Want*

“Investment in girls’ education may well be the highest-return investment available in the developing world.”

—Larry Summers (as chief economist at the World Bank)

“There are countless reasons rescuing girls is the right thing to do. It’s also the smart thing to do. Consider the virtuous circle: An extra year of primary school boosts girls’ eventual wages by 10-20%. An extra year of secondary school adds 15-25%. Girls who stay in school for seven or more years marry four years later and have two fewer children than girls who drop out. Fewer dependents per worker allows for greater economic growth. ... When girls and women earn income, they re-invest 90% in their families. They buy books, medicine, bed nets. For men the figure is more like 30-40%. ‘Investment in girls’ education may well be the highest-return investment available in the developing world,’ Larry Summers wrote when he was chief economist at the World Bank. The benefits are so obvious, you wonder why we haven’t paid attention. Less than two cents of every development dollar goes to girls—and that is a victory compared to a few years ago when it was something like one-half cent. Roughly 9 of 10 youth programs are aimed at boys. ...”

—Nancy Gibbs, “The Best Investment: If you really want to fight poverty, fuel growth and combat extremism, try girl power,” *TIME* (0214.2011)

“Progress is achieved through women.”—Bernard Kouchner, founder, Doctors Without Borders (and French foreign minister)

This Will Be the Women's Century: State of Women in USA Business/Spring 2012

50%+ Percentage of women in non-farm USA workforce.

50%+ Female 1st-line managers; also 50%+ women purchasing managers—i.e., women buy over half of commercial goods, as well as 80%+ consumer goods. (Guys, the likelihood of your next boss being a woman are over 50%! Get used to it. Get over it!! Prepare for it!) (Several recent studies suggest women rank as far better managers than men; also rated as better negotiators than men.)

80% Estimated percentage of female middle managers by 2020. (# of female Fortune500 chiefs appallingly low, but the tsunami approaches; within a decade of women “taking over” the mid ranks—and taking over the economy as a whole, see below—they will necessarily, I believe, effectively assault the top of the pyramid.)

9 out of top 10 Ratio of the predicted future leading job-growth categories that are currently dominated by women.

10 million++ Women-owned businesses USA. Employ > Fortune500 domestic payrolls. Revenues/USA women-owned businesses > German GDP. Women-owned businesses' revenue growth rate > revenue growth rate in same-age male-owned start-ups. Women launching far more businesses than men—% of all businesses that are women-owned leapt from 25% to roughly 40% in recent years. (When assessing women-and-business, I believe we must question our Fortune500 obsession. Giant USA companies employ << 10% of us. Giant company performance wretched: 0 of biggest 1,000 USA enterprises in 1965 outperformed the stockmarket over the next 40 years, through 2005.)

63% Increase in women's average wage, 1970-2000; same period, men's average wage +0.6%. Men's income, age 30-50 with jobs, dropped by 27% from 1969-2009. Urban USA women, age 23-30, out-earn their male cohort by 17%—greatest difference in Atlanta. (*Bloomberg* article: “The Slow Decline of the American Working Man.”)

55%+ Percentage of under-graduate and graduate degrees being granted to USA women. (Boys educational attainment, at end of secondary school, lagging girls by over 5 years in UK; close to same situation elsewhere.) (To my mind, these gaping and accelerating disparities are a bit un-nerving in terms of long-term social stability.)

\$28 TRILLION Estimated women's annual global purchasing power; more than 2X combined GDPs of China and India. USA alone: Women's purchasing power > Japanese GDP. (*Economist* headline: “Forget China, India and the Internet! Economic Growth Is Driven By Women.”)

Women better investors than men. Bushel of hard stats support this. And then there's Louann Lofton's *Warren Buffett Invests Like a Girl: And Why You Should Too*. (Women's share of wealth already very high—and will soar as Baby Boomers inherit \$8 trillion and as boomer men die off, as we do, before their spouses.)

“This will be the women's century.” Dilma Rousseff, President of Brazil, keynote (1st woman keynoter) to UN General Assembly 2011.

(Sources: Numerous/prepared by Tom Peters/27 April 2012/for Bentley Center for Women and Business)

XLI. The **THREE** Rules* **

(*With which I am in *full* agreement.)

(**And then three MORE with which I am in full agreement.)

From Michael Raynor and Mumtaz Ahmed's ...

THE THREE RULES: How Exceptional Companies Think:***

- 1. Better before cheaper.**
- 2. Revenue before cost.**
- 3. There are no other rules.**

***From a database of over 25,000 companies from hundreds of industries covering 45 years, they uncovered 344 companies that qualified as statistically “exceptional.”

**“The Economy Is Scary ...
But Smart Companies Can Dominate”**

“They manage for value—not for EPS.

“They keep developing human capital.

“They get radically customer-centric.”

XLV. *The Second Machine Age*

by Erik Brynjolfsson and Andrew McAfee

“The greatest shortcoming of the human race is our inability to understand the exponential function.”—Albert A. Bartlett (from Erik Brynjolfsson and Andrew McAfee, *The Second Machine Age*, “Moore’s Law and the Second Half of the Chessboard”)

The issue, circa 2014, is not “big change,” it is

ACCELERATING Big Change. Time to adapt is evaporating!

“[Some argue] that the true work of innovation is not coming up with something big and new, but instead recombining things that already exist. And the more closely we look, the more this recombinant view makes sense.”

TP: Creativity that matters is not predominantly of the “gee whiz” variety. Creativity is the ability to integrate stuff, a very different kettle of fish.

“Organizational Coinvention” [coinvention of organization and technology]: “While a one-for-one substitution of machines sometimes occurs, a broader reorganization in business culture may have been an even more important path for skill-based change. ... [In some industries], each dollar of computer capital was often the catalyst for more than ten dollars of complimentary investments in ‘organization capital.’”

TP: The new stuff is only part of the point. Complete re-invention of organizations and networks of organizations is the real payoff!

*“The greatest
shortcoming of the
human race is our
inability to
understand the
exponential
function.”*

—Albert A. Bartlett (from Erik

Brynjolfsson and Andrew McAfee, *The Second Machine Age*, “Moore’s Law and the Second Half of the Chessboard”)

(1) Person interviewed by the authors re TurboTax: “No way. I don’t use an H&R Block tax preparer any more. I’ve switched to TurboTax software. It’s only \$49 and much quicker and more accurate.” Brynjolfsson and McAfee: “The creators of TurboTax are better off—but tens of thousands of tax preparers now find their jobs and incomes threatened.”

(2) CEO interviewed by the authors says he installed new infotech equipment before the Great Recession, but did not cut payroll when profits were soaring. And then: “When the recession came, business as usual was obviously not sustainable, which made it easier to implement a round of painful streamlining and layoffs. As the recession ended and profits and demand returned, the jobs doing routine work were not restored.”

(3) “For most of the nineteenth and twentieth centuries, employment usually rebounded after each recession, but since the 1990s employment didn’t recover briskly after recessions. It’s not coincidence that as the computerization of the economy advanced, post-recession hiring patterns changed.”

TP: *These three quotes are the heart of the matter.*

“Every digital app developer, no matter how humble its offices or how few its staff,

almost automatically becomes a **micro-**
multinational,
reaching global audiences.”

“The Gross National Product does not include the beauty of our poetry or the intelligence of our public debate. It measures neither our wit nor our courage, neither our wisdom nor our learning, neither our compassion nor our devotion. It measures everything, in short, except that which makes life worthwhile.” —RFK

TP: GDP is an important measure. PERIOD. But it ain't the whole ball game—not by a long shot!

Race AGAINST The Machine:
How the Digital Revolution Is Accelerating
Innovation, Driving Productivity, and Irreversibly
Transforming Employment and the Economy
by Erik Brynjolfsson and Andrew McAfee

*“The root of our problem is not that we’re in a Great Recession or a Great Stagnation, but rather that we are in the early throes of a **Great Restructuring**. Our technologies are racing ahead, but our skills and organizations are lagging behind.”*

“The median worker is losing the race against the machine.”—Erik Brynjolfsson and Andrew McAfee, *Race Against the Machine*

“... breakage of the historic link between value creation and job creation ...”/Great Recession: “... lack of hiring rather than increase in layoffs ...”

40 Years: Median inflation-adjusted wages, men 30-50 with jobs, 1969-2009: \$33K, **-27%**—“The Slow Disappearance of the American Working Man,” *Bloomberg Businessweek*/08.11.13

The “U-shaped Curve” Phenomenon:

High-skilled: **Waaaaay Up!!!**

Low-skilled: **Stable/Up.**

Middle: **Down/Down/Down.**

TP: **Yikes.**

XLVI. So I Missed By 5-10 Years. **SO WHAT?** Thrive Through “WOW. NOW.” Or else. (Not Pretty.)

I SAID 2015.

It looks more like it'll be 2020, maybe 2025.

Self-congratulatory remarks are to be avoided like the plague. Nonetheless, I must acknowledge that I began the 22 May 2000 *Time* cover story I authored (“What Will We Do For Work?”) with this: *“I believe that ninety percent of white-collar jobs in the U.S. will be either destroyed or altered beyond recognition in the next 10 to 15 years.”* The three causes I enumerated were “destructive” (game-changing) competition, technology/artificial intelligence (algorithmic substitution), and globalization/outsourcing.

The prior year, 1999, I had published a three-book set, jointly called “The Work Matters.” The three:

The Project50: Fifty Ways to Transform Every “Task” into a Project That Matters!

The Brand You50: Fifty Ways to Transform Yourself from an “Employee” into a Brand That Shouts Distinction, Commitment, and Passion!

The Professional Service Firm50: Fifty Ways to Transform Your “Department” into a Professional Service Firm Whose Trademarks Are Passion and Innovation!

In 2014, this 3-pronged revolution has not progressed as much as I supposed. But there is little doubt that the acceleration of change will more or less bring it to its (frightening) apex in the next 5-10 years.

But why oh why oh why must it be “frightening”? Why not ...

Liberating?

Fun?

Exciting?

Wall-To-Wall/Floor-To-Ceiling WOW?

Though a word would be changed here and there if the pub date was 2014 instead of 1999, the logic would not have changed one dollop. There was a quote I used in 1999: “A bureaucrat is an expensive microchip.”

Indeed. (Or: WHOOPS.)

And the answer? Or, rather ... **THE** ... answer is ... in my (not so) humble opinion ... scintillating portfolios of High Value Added/WOW Projects. Those projects would be manned (and womaned) by free-spirited, imaginative people, who I label Brand Yous. And the configuration of these groups would mimic, in my (not so) humble opinion, something not so new; namely professional service firms.

To use my shorthand:

WOW Projects +

Brand You(s) =

Supercalifragilisticexpialidocious PSFs.

I will go a step further in this space and provide the three “50 Lists.” I’ll just use the item titles, which will at times be a bit too shorthand-ish. But I’m sure you’ll get the drift:

The Project 50: **ALL** Work Becomes “WOW Projects”

I. Create!

What's with this so-called “inventing”/“finding” a WOW! Project? You get an assignment, right?

1. Reframe: Never ... Ever! ... Accept a project/assignment as given!

2. Translate your daily experiences into cool stuff to do.

2A. Become a Benchmarking Fanatic: Look at every-small-thing-that-happens-to-you as a Golden Learning Opportunity.

3. Improve your vocabulary! **Learn to love “WOW!”** Use “the word.” WOW!

4. There are no “small” projects: In every “little” form or procedure, in every “little” problem there usually lurks a B-I-G Project!

4A. Convert today’s annoying “chore” into a WOW! Project. The B-I-G Idea: There’s no such thing as a “GIVEN.”

5. Put on the brakes! **Don’t betray WOW!**

6. Love makes the world go ’round!

7. Will it—the project, our baby—be beautiful? Yes ... beautiful!

8. Design-Is-It. I.e.: One of the single most powerful forces in the whole bloody universe.

9. Is the project revolutionary? (Are you sure?)

10. Is the Web factored into the project? In a B-I-G way?

11. Impact. Henry James asked this, as his ultimate question, of an artist’s work: **“Was it worth doing?”**

11A. Made anybody(s) angry lately?

12. Raving Fans!

12A. Women-as-Raving Fans. Women take to products/services—and, thence, “project deliverables”—for (very) different reasons than men.

13. **Pirates-on-the-high-seas.** “We” are on a Mission/Crusade. We plan to upset the applecart (convention wisdom) Big Time ... and Make a Damn Difference.

14. If you can (hint: you can!), create a “place.” That is ... pirates need ships at sea and caves on land. (“Safe houses” in spy-speak.)

15. Put it in your resume. Now! Picture yourself crossing the finish line.

16. Think RAINBOW!

17. Think ... or rethink ... or reframe ... your concept ... Into a “business plan.”

18. Think/obsess ... D-E-A-D-L-I-N-E. Be ridiculously/absurdly/insanely demanding of yourself/your little band of renegades.

19. Find a Wise Friend. WOW Projects Ain’t Easy! They Stretch You, Stress You, and Often Vex You. And the Organization.

20. Find—and then nurture—a few (very few) co-conspirators.

20A. Find at least one user/co-conspirator. NOW. Think user from the start.

21. Consider carrying around a little card that reads:

WOW!
BEAUTIFUL!
REVOLUTIONARY!
IMPACT!
RAVING FANS!

II. Sell!

Who ever heard of a “sales” chapter in a “project management” book?

“Damn few” is the answer. (None?) And therein lies the problem. WOW! Projects must be sold ... to team members, higher-ups, freaky first-users, and ultimately customers-at-large. Learning to s-e-l-l is a hefty part of the battle; it forces clarity, focus, drive, faith.

22. Be S-U-C-C-I-N-C-T. Describe your project (its benefits and its WOW!) in T-H-R-E-E minutes.

22A. Metaphor time! The “pitch”—and every aspect of the project—works best if there is a compelling theme/image/hook that makes the whole thing cohere, resonate, and vibrate with life.

23. **Sales means selling ... Everyone!**

24. Hey: WOW! Project Life = Sales. Right? So ... work consciously on BUZZ. Get visible and stay visible.

25. Do your “Community Work.” Start to Expand the Network! A.S.A.P.

26. Last is as good as first. If they support you ... they are your friends.

27. Preach to the choir! Never forget your friends!

28. Don't try to convert your enemies. Don't waste time on them.

29. Create an A-Team Advisory Board.

30. Become a Master Bootstrapper. You heard it here first: Too much initial money ... kills!

31. Think B-E-T-A! As in ... Beta Site(s). **You need customer-partners ... as safe-haven testing grounds for rough prototypes.**

III. Implement!

Implementation means a detailed plan. Right? Right! Clear assignments of responsibility? Right again! But ... again ... that's little more than the least of it.

32. Chunk! Chunk! Chunk! We've gotta break “it”—our project, now on the move—down into tidbit/do-it-today/do-it-in-the-next-four-hours pieces.

33. Live ... Eat ... Sleep ... Breathe: Prototype! I.e.: Become an unabashed Prototyping Fanatic.

33A. Teach prototyping. Prototyping is a “corporate culture” issue. I.e.: Work to create a Culture of Prototyping.

34. Play! Find playmates!

35. Scrunch the Feedback Loops!

36. Blow it up! Play ... and Destruction ... are handmaidens.

37. Keep recruiting! Iron Law: WOW Projects call for WOW! People. Never stop recruiting!

37A. Wanted: Court Jester.

38. Make a B-I-G binder! This is the Project Bible. It’s the Master Document ... the macro-map.

39. List mania. Ye shall make lists ... and the lists shall make ye omniscient. (No joke.)

40. Think (live/sleep/eat/breathe) Timeline/ Milestones.

40A. Wanted: Ms. Last Two Percent!

41. Master the 15-Minute Meeting. You can change (or at least organize) the world in 15 minutes!

42. C-E-L-E-B-R-A-T-E!

42A. Celebrate failures!

43. Station break! The keynote here is action. Exactly right! But: Don’t allow the action fanaticism to steer you off course re WOW!/Beauty/Revolution/Impact!/Raving Fans.

44. A project has an Identity. It’s alive. Project = Life ... Spirit ... Personality.

45. Cast the net a little/lot farther afield.

46. It's the U-S-E-R, stupid! Never lose sight of the user community.

47. Concoct a B.M.P./Buzz-Management Program. Marketing is Implementation.

IV. Exit!

A time to each and every thing!

48. **SELL OUT! It's been "us" against "them" ... and one heck of a ride. But now the time has come to dance with the suits ... if we really want full impact.**

48A. Recruit a Mr. Follow-up ... who is as passionate as you are! (And L-O-V-E-S Administration.)

49. Seed your freaks into the mainstream ... where they can become mutant viruses for your (quirky) Point of View!

50. Write up the project history. **Throw a Grand Celebratory Bash!**

The Brand You50 "Distinct" or ... "Extinct"

Or: Fifty ways to transform yourself from an "employee" into a brand that shouts distinction, commitment, and passion!

1. It's up to you ... and you alone. Coping rests on your shoulders. Forget "they." This is your life. Period.

1A. When was the last time you asked: *What do I want to be?*

2. You've gotta! Finally: It's the White Collar Revolution! You have no option:
The White Collar Revolution is about to swallow me/you/us!

3. Answer (my best) (my only????) to the "White Collar Revolution": Brand yourself.

3A. Holy Toledo! Brand You magnified. What if we each had personal "Market Cap"?

4. Start now: Use some subset of these four—very practical!—Brand You assessment tools:

One: Make a Personal Brand Equity Evaluation.
Two: Develop a one-eighth (or one-quarter) page Yellow Pages ad for Brand You/Me & Co.
Three: Create an eight-word Personal Positioning Statement.
Four: How about a bumper sticker that describes your essence?

4A. We need a snapshot!

5. Forget "job." Forget "tasks."

5A. Commit yourself wholeheartedly to ... the Project Life.

6. Package yourself. Axiom: You (Me!) are a package!

7. "INC." yourself.

8. **Brand You/Me Inc. is about what you value.**

9. Brand You/Me Inc. requires a rich portfolio of attributes and skills.

9A. The big hat rack! Another take: Brand You warriors must wear lots of hats.

10. Ready to play the great game of business?

11. Give the world a clear picture of who you are.

12. Think job title!

13. You are what you do.

14. Message to Brand You wannabe: Embrace real-world politics of implementation.

15. Turn crappy “little tasks” into gold. **(VCJ: Volunteer for Crummy Jobs.)**

15A. Work with what you’ve got! (Damn it!)(And make it special.) (Damn it!)

16. Master bootstrapping.

17. The Brand You nub: A sterling portfolio of WOW! Projects.

17A. **You are the “WOW!-ness” of every project.**

18. Focus. Clutter kills WOW.

19. You **Are** Your Clients I: Think Client.

20. You **Are** Your Clients II: Obsess on Clients.

21. Competence. You (Me!) have got to be noticeably good at S-O-M-E-T-H-I-N-G.

22. You Are Your Rolodex I. Manage the hell out of your community/network!
Brand You is personal. But it’s not a loner’s world.

22A. Loyalty. New loyalty. Not “logo loyalty.” But Rolodex loyalty. Network loyalty.
Community loyalty. Extended family loyalty.

23. You Are ... Your Rolodex II. You are as broad/wise as your collection of freaks!

24. Design matters! The Big Idea: You (as in Brand You) are a designer. Period.

25. Become a “line extension” master.

26. You are your “Big Ideas.”

27. To steer Me Inc. through the white water of change is to dare. **Daily.**

28. Submit to the performance.

(29. B-o-s-s-e-s: Brand You should be your cup of tea!)

30. Identity!

31. Remember: **a brand is a “trust mark.”**

32. Obsess on your calling cards! It all starts when/where it starts.

33. Build a website that wows. (Period.)

34. **Join Toastmasters.** You are your own P.R. “Agency.”

35. How about learned optimism? **Spreaders of gloom are rarely—never!?!—successful Brand Yous.**

36. Renew! Renew! Renew! Renewal = Job 1 For Brand You. Period.

37. **Invest in yourself. A formal Renewal Investment Plan (R.I.P.) is a must!**

38. **Whet your appetite. Again. Again. And yet again. Learn from ... anyone. Anywhere. Any time. BECOME A SPONGE ... for Cool Stuff. (Work on exposing yourself to Cool Stuff.)**

A 50LIST WITHIN A 50LIST: THE RENEWAL50

1. *Go to the nearest magazine shop.* Now. Spend 20 minutes. Pick up 20—twenty!—magazines. None should be ones you normally read. Spend the better part of a day perusing them. Tear stuff out. Make notes. Create files. Goal: Stretch! Repeat ... monthly ... or at least bimonthly.

2. *Go to the Web.* Now. Relax. Follow your bliss! Visit at least 15 sites you haven't visited before. Follow any chain that is even a little intriguing. Bookmark a few of the best. Repeat ... at least once a week.

3. *Take off this Wednesday afternoon.* Wander the closest mall ... for two hours. Note the stuff you like. (And hate.) Products, merchandising, whatever. Repeat ... bimonthly.

4. *Buy a packet of 3 x 5-inch note cards.* Carry them around with you. Always. Record cool stuff. Awful stuff. Daily. Review your card pack every Sunday. (*Obsess on this!*)

5. *Going the same place for vacation next year? Why not someplace new? Why not one of those university-sponsored 12-day trips to explore some weird phenomenon?*
6. *Project stuck in a rut? Look through your Rolodex. Who's the oddest duck in there? Call her/him. Invite her/him to lunch. Pick her/his brain for a couple of hours about your project.*
7. *Create a new habit: Visit your Rolodex. Once a month. Pick a name of someone interesting you've lost touch with. Take her/him to lunch ... next week.*
8. *New habit: You're in a meeting. Someone you don't know makes an interesting contribution. Invite him/her to lunch ... in the next two weeks.*
9. *You run across somebody interesting. As a matter of course, ask her (him) what's the best thing she/he's read in the last 90 days. Order it from Amazon.com ... this afternoon.*
10. *Take tomorrow afternoon off. Rain or shine. Wander a corner of the city you've never explored before.*
11. *Go to the local Rite Aid. Buy a \$2 notebook. Title it *Observations I*. Start recording. Now. Anything and everything. (Now = Now.)*
12. *Going out this Saturday night? Go some place new.*
13. *Having a dinner party next Sunday? Invite somebody—interesting—you've never invited before. (Odds are, he/she won't accept. So what? Go for it. It's just like selling encyclopedias. No ring doorbell = No sale.)*
14. *Go past a kiosk advertising local Community College Courses for this fall. (Or one of the Learning Annex catalogues.) Grab a copy. Look it over this evening. Pick a couple of interesting courses and topics you've always wanted to know more about. Call the professor (with a little detective work, you can find her). If you're intrigued, sign up and ... at least ... go to the orientation session.*
15. *Read a provocative article in a business journal. Triggers a thought? Email the author. So what if you never hear back? (The odds are actually pretty high that you will. Trust me.)*
16. *At church this Sunday, the pastor announces a new fund drive. Sure you're busy. (Who isn't?) Go to the organizing meeting after services. Sign up!*
17. *You're working with your 13-year-old on his science project. You find you're having fun. Go to school with him tomorrow ... and volunteer to talk to the class about the topic.*
18. *A crummy little assignment comes along. But it would give you a chance to work with a group of people you've never worked with before. Take the assignment.*
19. *You're really pissed off at what's going on in your kid's school. So run for the school board.*
20. *You aren't really interested in changing jobs. But there's a neat job fair in the next town this weekend. Go.*
21. *An old college pal of yours invites you to go on a long weekend by the lake. You never do things like that. Go.*
22. *A really cool job opening overseas comes up. It fits your skill set. You couldn't possibly consider it. You've got a nine-year-old and your husband is content with his job. At least call someone ... and find out more about it.*

23. *You're on the fast track. But a fascinating job opens up ... far away. It looks like a detour. But you could learn something really new. Really cool. Go talk to the guy/gal about it. (Now.)*
24. *The eighth grade teacher is looking for chaperones for the trip to the natural history museum. You're a law firm partner, for God's sake, making \$350,000 a year. Volunteer.*
25. *You love taking pictures. You pick up a brochure advertising a four-day photography workshop in Maine next summer. Go to the workshop.*
26. *A friend of yours, a small-business owner, is going to Thailand on a sourcing trip. She invites you to join her. Go.*
27. *There's a great ball game on ESPN in an hour. Forget it. Go on that walk you love ... that you haven't taken for a year.*
28. *I'm not much on planning. But how about sitting down with your spouse/significant other and making a list of three or four things you've "been meaning to do" that are novel ... then coming up with a scheme for doing at least one of them in the next nine months?*
29. *You've a-l-w-a-y-s wanted to go to the Yucatan. So at least call a travel agent ... this week. (How about right now?)*
30. *You know "the action is at the front line." Spend a month (two days a week) on a self-styled training program that rotates you through all the front-line jobs in the hotel/distribution center/whatever.*
31. *Ask a first-line supervisor who the most motivated clerk in the store is. Take him/her to lunch ... in the next three weeks.*
32. *You spot a Cool Article in the division newsletter. Call the person involved. Take her/him to lunch. Tomorrow. Learn more. (Repeat.) (Regularly.)*
33. *You and your spouse go to a great play this Saturday. On Monday, call the director and ask him/her if you can come by and chat some time in the next two weeks. (If the chat goes well, ask her/him to come in and address your 18 colleagues in the Accounting Dept. at a Brown Bag Lunch Session later this month.)*
34. *Institute a monthly Brown Bag Lunch Session. Encourage all your colleagues to nominate interesting people to be invited. Criterion: "I wouldn't have expected us to invite ____."*
35. *Volunteer to take charge of recruiting for the next year/six months. Seek out input/applications from places the unit has never approached before.*
36. *Consider a ... four-month sabbatical.*
37. *Get up from your desk. Now. Take a two-hour walk on the beach. In the hills. Whatever. Repeat ... once every couple of weeks. (Weekly?)*
38. *Seriously consider approaching your boss about working a day a week at home.*
39. *Take the door off your office.*
40. *You've got a couple of pals who are readers. Start a Reading Group that gets together every third Thursday. Include stuff that's pretty far out. (Invite a noteworthy local author to talk to your group now and again.)*

41. *Join Toastmasters. (I know it's a repeat. It's important!)*
42. *Pen an article for the division newsletter.*
43. *In the quarterly alumni magazine, you read about a pal who's chosen to do something offbeat with her life. Call her. Tomorrow. (Or today.)*
44. *Buy that surprisingly colorful outfit you saw yesterday. Wear it to work. Tomorrow.*
45. *Develop a set of probing questions to use at meetings. "Will this really make a difference?" "Will anybody remember what we're doing here two years from now?" "Can we brag to our spouse/kids about this project?"*
46. *Assess every project you propose by the "WOW!"/"Is it Worth Doing?" criteria.*
47. *Call the Principal Client for your last project. Ask her to lunch. Within the next two weeks. Conduct a no-holds-barred debriefing on how you and your team did ... and might have done. Now.*
48. *Call the wisest person you know. (A fabulous professor you had 15 years ago?) Ask her/him to lunch. Ask her/him if he or she would be willing to sit with you for a couple of hours every quarter to talk about what you've done/where you're going. (Try it. It can't hurt.)*
49. *Become a Cub Scout/Brownie troop leader. Or direct your kid's play at school. The idea: Spend more time around children ... they're fascinating ... spontaneous ... and wise.*
50. *Build a great sandcastle!*

38A. Love the plateau. Learning—the essence of Brand You—is not a smooth ride. (You get stuck at times.)

39. **Me Inc. needs a great board of directors.**
40. **Brand You/Me Inc. needs a front line university to call your own.**
41. **Never neglect the Talent Scout Mode ... even if you are a junior individual contributor.**
42. **Make our/my/your "organization"—Me & Co., Brand You—special from the get-go!**
43. **Brand Yous lead! At all ages!**
44. **Become a "power freak."**
45. **What's your formal word-of-mouth marketing plan?**
- 45A. **P-l-e-a-s-e answer: Do I r-e-a-l-l-y have a "product"?**

46. One woman/man global powerhouse is not an oxymoron in the new millennium.
47. Sell!
48. **Are you a “closer”?** Brand You's have got to “ask for the business.”
49. Brand You's are dis-loyal! (To a particular corporate logo.)
50. Welcome to Free Agent Nation.

**PSF50:
The Professional Service Firm Is Exclusively
Devoted to High Value Added Work
(A Sparkling Collection of WOW! Projects)**

I. PSF = Inc. + Clients + WOW Projects!

1. **Think “Inc.”**

It all starts in your head. Imagine: **You are no longer “HR Director.” You are Managing Partner/Managing Director of HR Inc. ... a wholly owned subsidiary of the “ABC Division” of the “XYZ Corp.”**

1A. Commit “Cool.”

2. Think (*eat ... sleep ... breathe ... talk up*) C-L-I-E-N-T. Period. Client service is *the* name of *the* game.

3. Select Clients very carefully. It's axiomatic: You're as good—or as bad—as the character of your Client List. In a very real sense, you *are* your Client List!

3A. Seek out Clients who are Leaders.

3B. F-I-R-E Clients ... upon occasion.

4. Turn e-v-e-r-y “task” into a ... Project. **PSF = Client. PSF = Project.**

4A. The Work Matters!

5. Become a Catalyst for Revolution. (Why not?) (What else?)

II. Portfolio Quality!

6. Visit every client. Initiate a “deep” and ongoing dialogue with ... *every* ... client.

7. Create an immodest Current Projects List. **You—Dept. head turned Managing Partner of HR Inc. (Etc.)—are your Project List.**

8. You are a Venture Capitalist. I.e.: What does your “project list”/“project portfolio” *add up to*? Is it exciting? (How exciting?) Is it bland?

9. Conduct a weekly—or a more frequent—formal Current Projects Review. The project-list-is-us. So ... now we’ve got to start managing the Hell out of it.

9A. Words ... matter. E.g.: “Engagement.”

III. Impact!

10. Transform every “Job” into a WOW! Project.

11. Never EVER Compromise Your Identity.

12. Pursue ... P-A-S-S-I-O-N.

13. **MEASURE: Did we make an impact?**

14. Tom’s Epithet No.1: “Thoroughly professional ... but not provocative.” The pressing question: Was it far enough out? Was it—our work—as “crazy” as these (clearly) crazy times demand?

15. L-E-A-D your Client!

16. Another-flavor-of-WOW: Politics. PSF mantra: **We are *not* scornful of the grubby “politics of getting things done.” We embrace them as the *sine qua non* of effective implementation.**

17. PSF success boils down to ... the fine art of balance.

18. Accounting (etc.) is a performing art.

19. Speaking of accounting ... remember the bottom line: **“Business-ing.”**

20. Got any quirky projects on the list? If you want some “great stuff” to happen ... well ... you have absolutely no alternative: Your portfolio has to include some Truly Freaky Stuff.

21. Think ... LEGACY. Question to ask yourself: “What—if anything—will my three years as Managing Partner of Purchasing Inc. be remembered for?”

22. Pitch in ... or bail out!

22A. Practice serial monogamy. Or: “One” is a beautiful word!

23. PSFs need Vision Statements. Period.

23A. **We help people!**

IV. Live With 'Em!

24. Make Clients an integral part of every project team.

24A. Cohabit with the Client!

24B. Turn the Client into an expert! Openly, purposefully share your knowledge and wisdom.

24C. Engage Clients in a measured “risk progression” process.

25. Insist ... that Clients submit a formal evaluation of “your people” (and “their people”) at the end of each project.

25A. Think external. Think independent.

26. Client-centric = PSF Imperative. Period. But don't lose your independent voice. Think Client. AND: Stay autonomous.

27. **Bring in wild and wooly outsiders. E-x-p-a-n-d the box.**

V. A Culture of Urgency!

28. Create a “sense of urgency”/“excitement”/“vibrancy”/“buzz.”

29. Hot Teams thrive in Hot Spaces!

30. **Celebrate ... constantly. Celebrate any success.**

30A. Projects-worth-doing are bumpy. There are bad days at the office. Dealing with the emotional roller coaster called PSF-on-a-Holy-Mission takes thoughtful effort!

30B. You need a clown!

31. Love thy “support staff.”

32. **You need a rabid scheduler! Project(s) Life = Deadline Life. Each project—in the unit as a whole/the PSF—needs a “deadlines/scheduling/milestones freak.”**

32A. We're in this for the money! WOW is the Point. But ... big “but” ... it must be Work Worth Paying For. So ... charge appropriately.

33. Pay attention to the “hard stuff” ... e.g.: methodology.

34. Embrace marketing.

VI. Knowledge-Is-Us!

35. **Become a Research & Development Evangelist.**

35A. Devote a sizable share of effort/revenues to Knowledge Development.

36. Turn your current portfolio of projects into a ... Research & Development playground/gold mine.

37. Think ... **DESIGN**. Are “beauty”/“grace”/“elegance” operative words ... relative to every project?

38. Evaluate the possible bases of PSF Competitive advantage. Nobody—and no PSF—is “great at everything.” The essence of PSF market strategy and positioning is “Know thy strengths.” (And weaknesses.)

VII. Talent!

39. T-H-I-N-K ... connoisseur of talent. Professional Service Firm = Talent. Period.

39A. **We want to be a Magnet for Talent.**

40. **Cherish instability! Mix up teams!**

40A. Mix redux: Encourage turnover!

41. Demand that every PSF member be known for ... something.

41A. Admiration beats affection.

42. Champion passion. Champion perfection.

43. Create stories/mythology around “project winners.”

44. T-R-A-I-N. Teach the “Professional Service Firm Basics” ... with a vengeance.

45. Provide “project management-leadership” opportunities ... A.S.A.P.

46. **Cherish great listening skills.**

47. Geeks—the antisocial, masterful diggers-of-obscure-facts—should be adored!

48. Challenge! Challenge! Challenge! Demand ... the impossible. From everyone. (Obviously: starting with yourself.)

VIII. It's Ours!

49. Think ... Dream ... Act: WOW! Beauty! Impact! Distinction!

50. We own this place! The mantra-to-end-all-mantras in PSF-land: “We are HR Inc. This is *our* joint. It is *our* life. We are in charge. Excellence is in *our* hands ... to choose ... or lose.”

XLVII. Education RE-BOOT:

Full Ste**A**m Ahead!

Science

Technology

Engineering

Mathematics

Science

Technology

Engineering

Arts

Mathematics

*“Human creativity is
the ultimate
economic resource.”*

—Richard Florida

*“Every child is born
an artist. The trick is
to remain an artist.”*

—Picasso

It is commonplace when discussing education (frequently described as the imperative—though unrealized— National Priority #1) to obsess on math proficiency and, more broadly, STEM (Science Technology Engineering Mathematics). STEM is no doubt significant to a landscape being transformed by technology. Yet I vehemently favor the formulation labeled

*STE**A**M. (President John Maeda of RISD/Rhode Island School of Design coined the new flavor.) The “A” that’s added to STEM is for the Arts. “The arts” are not merely about being “well rounded” or some such; they are to some extent “what’s left” as AI/robotics vacuum up traditional high-end “knowledge work” occupations. Consider the world’s most valuable company—Apple. While its “T” and “E” (tech/engineering) are exceptional, it is the “A” that has made all the difference—or, rather, the A ingeniously blended with S, T, E, and M.*

“Microsoft never had the humanities or liberal arts in its DNA.” —Steve Jobs

The (partial) logic behind adding an “A” to STEM:

“I believe that ninety percent of white-collar/ “knowledge-work” jobs (which are 80 percent of all jobs) in the U.S. will be either destroyed or altered beyond recognition in the next 10 to 15 years.”

—Cover story/Time/22 May 2000/Tom Peters

The **(VERY)** Best and **(VERY)** Brightest

*The very best and the very
brightest and the most
energetic and enthusiastic
and entrepreneurial and
tech-savvy of our university
graduates must—**must,**
not should—be
lured into teaching!*

Finding and educating these new-criteria teachers requires a revolution in both content and the incentive structure needed to attract the best of the best— *and to induce them to experiment boldly once aboard the education train.*

In my opinion, the impact of the new technologies is such that we need a very young teacher corps—one that has the demographics and restless mindset of Facebook or Twitter or Google new-hires.

*(I had no intention of writing anything like this [a short 3013 paper], but as I wrote I found myself almost pounding the keyboard into mush. Like it or not, complex problems call for complex solutions. Yet I am coming to see the “simple” solution of **BBFs/Best & Brightest & Feistiests**, as I am now calling them, becoming the base for a transformed teacher corps as a national necessity on a par with national security; in fact, obviously, it is an issue of national security.)*

Education Manifesto 2014*

(*Good news from a competitiveness standpoint: Nobody's got it right. **YET.**)

RADICAL curricular revision imperative.*

(*STEM/STEAM./Creativity & Entrepreneurialism encouraged rather than suppressed.)

RADICAL digital strategy.*

(*There is ... NO WAY TO OVERDO THIS.**) (**Re-read: NO WAY.***)
(***Good news: Kids doing this on their own.)

REVOLUTIONARY new approach to teacher recruitment/development.* (*BEST of the BEST [for a few years] ... or else.)

RADICAL re-assessment of tertiary education—e.g., “MOOC-ization.”* (*Four-year residential degree not centerpiece.)

RADICAL re-assessment business ed.

RADICAL role re-assessment by corporations.*
(*CORPORATIONS TAKE THE LEAD ON EDUCATION ... or else.)

FYI: I make no apology for nor do I think it is hyperbole to repeatedly use the word

“RADICAL.” **Less than RADICAL**
... “not optional.”

XLVIII. Some (Wacky-but-**VERY**-real) “Stuff”

There is no order to what follows. It is simply a collection of rather provocative quotes from my recent “new stuff” reading. Principal topics: Algorithmic determinism, Big Data, Social Business, and “gamification.”

The (**VERY**) BIG 4: GRIN*

Genetics

Robotics

Informatics

Nanotechnology

*Decision #1: GRIN and BEAR it? GRIN, get to work, and SAVOR it?

Disruptive Technologies: Advances That Will Transform Life, Business and the Global Economy

- Mobile Internet
- Automation of knowledge work
- The Internet of Things
- Cloud technology
- Advanced robotics
- Autonomous and near-autonomous vehicles
- Next-generation genomics
- Energy storage
- 3D printing
- Advanced materials
- Advanced oil and gas recovery
- Renewable energy

Source: McKinsey Global Institute/May 2013

“Human level capability has not turned out to be a special stopping point from an engineering perspective.” —Illah Reza Nourbakhsh, *Robot Futures*

“The combination of new market rules and new technology was turning the stock market into a ...
war of robots.”

—Michael Lewis, “Goldman’s Geek Tragedy” (*Vanity Fair*)

“The root of our problem is not that we’re in a Great Recession or a Great Stagnation, but rather that we are in the early throes of a Great Restructuring. Our technologies are racing ahead, but our skills and organizations are lagging behind.”

— Erik Brynjolfsson and Andrew McAfee *Race AGAINST the Machine*

***“The median
worker is
losing the
race against
the machine.”***

—Erik Brynjolfsson and Andrew McAfee, *Race Against the Machine*

“A bureaucrat is an expensive microchip.”

—Dan Sullivan, *consultant and executive coach*

***“Meet Your Next Surgeon: Dr.
Robot”***

—*Fortune*/15 JAN 2013/on Intuitive Surgical’s da Vinci /multiple
bypass heart-surgery robot

*“Automation has become so sophisticated that on a typical passenger flight ... **a human pilot holds the controls for a grand total of ... 3 minutes.***

[Pilots] have become, it’s not much of an exaggeration to say, computer operators.”

—Nicholas Carr, “The Great Forgetting,” *The Atlantic*, 11.13

Curing Short Attention Spans: *“My **Busy Bucket** will ship a plastic tub containing two hundred dollars worth of books, CDs, DVDs, puzzles, crafts, and toys (mostly wooden ones from Europe) to your offspring, and after twenty-one or thirty days, depending on your plan, a very nice FedEx man will make the package go bye-bye. The exact assortment of amusements is tailored to the munchkin’s age (newborn to six) and the customer-selected theme (such as dress-up, sports, superheroes, princess/fairy).”*

—Patricia Marx, “Outsource Yourself,” *the New Yorker*, 01.14.2013 (on Audrey Zardkoochi & Elizabeth Baumgarten, founders of the toy rental company Busy Bucket)

“The prospect of contracting a gofer on an a la carte basis is enticing. For instance, wouldn’t it be convenient if I could outsource someone to write a paragraph here, explaining the history of outsourcing in America? Good idea! I went ahead and commissioned just such a paragraph from Get Friday, a ‘virtual personal assistant- firm based in Bangalore. ... The paragraph arrived in my in-box ten days after I ordered it. It was 1,356 words. There is a bibliography with eleven sources. ... At \$14 an hour for seven hours of work, the cost came to \$98. ...”
—Patricia Marx, “Outsource Yourself,” *The New Yorker*, 01.14.2013 (Marx describes in detail contracting out everything associated with hosting her book club—including the provision of “witty” comments on Proust, since she hadn’t had time to read the book—excellent comments only set her back \$5; the writer/contractor turned out to be a 14-year-old girl from New Jersey.)

“Algorithms have already written symphonies as moving as those composed by Beethoven, picked through legalese with the deftness of a senior law partner, diagnosed patients with more accuracy than a doctor, written news articles with the smooth hand of a seasoned reporter, and driven vehicles on urban highways with far better control than a human driver.” —Christopher Steiner, *Automate This: How Algorithms Came to Rule the World*

Shades of Ned Ludd: ***“When Emmy [algorithm] produced orchestral pieces so impressive that some music scholars failed to identify them as the work of a machine, [Prof. David] Cope instantly created legions of enemies. ... At an academic conference in Germany, one of his peers walked up to him and whacked him on the nose. ...”***
—Christopher Steiner, *Automate This: How Algorithms Came to Rule the World*

*Automate
This: How
Algorithms
Came to Rule
the World*

—Christopher Steiner

“Customer engagement is moving from relatively isolated market transactions to deeply connected and sustained social relationships. This basic change in how we do business will make an impact on just about everything we do.”—Dion Hinchcliffe & Peter Kim, *Social Business By Design: Transformative Social Media Strategies For the Connected Company*

Social Survival Manifesto*

1. **Hiding is not an option.**
2. Face it, you are outnumbered. [“Level playing field, arrogance denied.”]
3. **You no longer control the message.**
4. Try acting like ... a human being.
5. Learn to listen, or else. [“REALLY listening to others is a must.”]
6. Admit that you don’t have all the answers.
7. Speak plainly and seek to inform.
8. Quit being a monolith. [“Your employees, speaking online as individuals, are a crucial resource ... can be managed through frameworks that ENCOURAGE participation.”]
9. Try being less evil.
10. Pay it forward, now. [“Internet culture is largely built on the principle of the Gift Economy ... give value away to your online communities.”]

*Tom Liacas; socialdisruptions.com

Winning in Marketplace 2013: An Ethos of Helping ZMOT:
ZERO Moment Of Truth/Google*

“You know what a ‘moment of truth’ is. It’s when a prospective customer decides either to take the next step in the purchase funnel, or to exit and seek other options. ... But what is a ‘zero moment of truth’? Many behaviors can serve as a zero moment of truth, but what binds them together is that the purchase is being researched and considered before the prospect even enters the classic sales funnel ... In its research, Google found that

84% *of shoppers said the new mental*

model ... **ZMOT** *... shapes their decisions. ...”*

—Jay Baer, *Youtility: Why Smart Marketing Is About Help, Not Hype*

*See www.zeromomentoftruth.com for ZMOT in booklength format

Social Business By Design: Transformative Social Media Strategies For the Connected Company (Donald Hinchcliffe & Peter Kim)

Teva Canada: Supply chain excellence achieved. Share-Point/troubleshooting/Strategy-Nets/connected to other functions; Moxie social tools, document editing, etc.

IBM: Social business tools/30 percent drop in project completion time/300K on LinkedIn, 200K on Facebook.

MillerCoors: Gender imbalance. Women of Sales peer support. Private network. Attrition plummeted.

Bloomberg: Mobi social media analytics prelude to stock performance.

Intuit: TurboTax struggling against H&R Block temp staffing/customers #1 asset/ Live Community, focused on help with transactions.

Seven Characteristics of the Social Employee

- 1. Engaged**
- 2. Expects Integration of the Personal and Professional**
- 3. Buys Into the Brand's Story**
- 4. Born Collaborator**
- 5. Listens**
- 6. Customer-Centric**
- 7. Empowered Change Agent**

Source: Cheryl Burgess & Mark Burgess, The Social Employee

Marbles, a Ball and Social Employees by IBM: *“Picture a ball and a bag of marbles side by side. The two items might have the same volume—that is, if you dropped them into a bucket, they would displace the same amount of water. The difference, however, lies in the surface area, Because a bag of marbles is comprised of several individual pieces, the combined surface area of all the marbles far outstrips the surface area of a single ball. The expanded surface area represents a social brand’s increased diversity. These surfaces connect and interact with each other in unique ways, offering customers and employees alike a variety of paths toward a myriad of solutions. If none of the paths prove to be suitable, social employees can carve out new paths on their **OWN.**”* —Ethan McCarty, Director of Enterprise Social Strategy, IBM (from Cheryl Burgess & Mark Burgess, *The Social Employee*)

IBM Social Business Markers/2005-2012

- *433,000 employees on IBM Connection**
- *26,000 individual blogs**
- *91,000 communities**
- *62,000 wikis**
- *50,000,000 IMs/day**
- *200,000 employees on Facebook**
- *295,000 employees/800,000 followers of the brand**
- *35,000 on Twitter**

Source: IBM case, in Cheryl Burgess & Mark Burgess, *The Social Employee*

Gamification: *“Gamification presents the best tools humanity has ever had to create and sustain engagement in people.”* —Gabe Zichermann & Joselin Linder, *Gamification: How Leaders Leverage Game Mechanics to Crush the Competition*

“The popularity of an unwinnable game like Tetris completely upends the stereotype that gamers are highly competitive people who care more about winning than anything else. Competition and winning are not defining traits of games—nor are they defining interests of the people who love to play them. Many gamers would rather keep playing than win. In high-feedback games, the state of being intensely engaged may ultimately be more pleasurable than the satisfaction of winning.”

—Jane McGonigal, *Reality Is Broken: Why Games Make Us Better and How They Can Change the World*

“The kind of thinking on my bedroom floor [as a boy, playing APBA, Strat-o-Matic, Statis Pro Baseball] became an everyday component of mass entertainment. [This book] is the story of how systems analysis, probability theory, pattern recognition, and – amazingly enough—old-fashioned patience became indispensable tools for anyone trying to make sense of pop culture. The truth of my solitary obsession with modeling complex simulations is now ordinary behavior for most consumers of digital-age entertainment. This kind of education is not happening in classrooms or museums; it’s happening in living rooms and basements, on PCs and television screens. This is the Sleeper Curve [from Woody Allen’s movie “Sleeper”] ...”

—Steven Johnson, *Everything Bad Is Good For You: How Today’s Popular Culture Is Actually Making Us Smarter*

It Ain't About the Ws and Ls: ***“Fun from games arises out of mastery. It arises out of comprehension. It is the act of solving puzzles that makes games fun. In other words, with games, learning is the drug.”***

—Raph Koster, *A Theory of Fun For Game Designers*

Towards Addiction to ... LEARNING: ***“When I enter a video game, I learn something about a fictitious world. And in that video game, I’m allowed to go at my own pace. I’m constantly assessed—assessment becomes my friend. I feel good when I master the next level. If you could only take that experience of a video game back into student learning, we could make learning addictive. My deep, deep desire is to find a magic formula for learning in the online age that would make it as addictive as playing video games.”*** —Sebastian Thrum, founder, Udacity, lead developer of Google Glass, etc. (*Foreign Affairs*, 11-12.13)

Work.com/Salesforce.com: ***“... suite of mobile apps that enabled people inside the organization to provide instant feedback to their co-workers for a job well done” “Facebook-style newsfeed,” “badges, leaderboards, point systems” “turned the review process into something people actually want to do”*** —Gabe Zichermann & Joselin Linder, *The Gamification Revolution: How Leaders Leverage Game Mechanics to Crush the Competition*

“Idea Street”/UK Department of Work and Pensions (28% UK budget): ***“Staff provide innovative ideas and vote for the best ones” “first nine months: \$16 million in savings” “meaning was within the game itself, not the external reward”*** —Gabe Zichermann & Joselin Linder *The Gamification Revolution: How Leaders Leverage Game Mechanics to Crush the Competition*

*“Why exactly are we competing with each other to do the dirty work? We’re playing a free online game called **Chore Wars** —and it just so happens that ridding our real-world kingdom of toilet stains is worth more experience points, or XP, than any other chore in our apartment. ... A mom in Texas describes a typical Chore Wars experience: **‘We have three kids, ages 9, 8, and 7. I sat down with the kids, showed them their characters and the adventures, and they literally jumped up and ran off to complete their chosen task. I’ve never seen my 8-year-old son make his bed. I nearly fainted when my husband cleaned out the toaster oven.’ ...**”*

*—Jane McGonigal, **Reality Is Broken: Why Games Make Us Better and How They Can Change the World***

*“When I work with experimental digital gadgets, I am always reminded of how small changes in the details of a digital design can have profound unforeseen effects on the experiences of the people who are playing with it. **The slightest change in something as seemingly trivial as the ease of use of a button can sometimes alter behavior patterns. For instance, Stanford University researcher Jeremy Bailinson has demonstrated that changing the height of one’s avatars in immersive virtual reality transforms self-esteem and social self-perception.** Technologies are extensions of ourselves, and, like the avatars in Jeremy’s lab, our identities can be shifted by the quirks of gadgets. It is impossible to work with information technology without also engaging in social engineering.”* —Jaron Lanier, *You Are Not a Gadget*

“[Michael Vassar/MetaMed founder] is creating a better information system and new class of people to manage it. ‘Almost all

healthcare people get is going to be done—
hopefully—by algorithms

within a decade or two. We used to rely on doctors to be experts, and we’ve crowded them into being something like factory workers, where their job is to see one patient every 8 to 11 minutes and implement a by-the-book solution. I’m talking about creating a new ‘expert profession’—

medical quants, almost like hedgefund managers, who could do the high-level analytical work of directing all the information that flows into the world’s hard drives. Doctors would now be aided by Vassar’s new information experts who would be aided by advanced artificial intelligence.” —New York /0624.13

“When you ask [Cloudera founder Jeffrey] Hammerbacher what he sees as the most promising field that could be hacked by people like himself, he responds with two words: ‘Medical diagnostics.’ And clearly doctors should be watching their backs, but they should be extra vigilant knowing that the smartest guys of our generation—people like Hammerbacher—are gunning for them. The targets on their [M.D.s] backs will only grow larger as their complication rates, their test results and their practices are scrutinized by the unyielding eye of algorithms built by smart engineers. Doctors aren’t going away, but those who want to ensure their employment in the future should find ways to be exceptional. Bots can handle the grunt work, the work that falls to our average practitioners.”

—Christopher Steiner, *Automate This: How Algorithms Came to Rule the World*

“[These HP] pioneers may not realize just how big a shift this practice is from a cultural standpoint. The computer is doing more than obeying the usual mechanical orders to retain facts and figures. It’s producing new information that’s so powerful, it must be handled with a new kind of care. We’re in a new world in which systems not only divine new, important information, but must carefully manage it as well.” —Eric Siegel, *Predictive Analytics: The Power to Predict Who Will Click, Buy, Lie, or Die* (based on a real case, an HP “Flight risk” PA model developed by HR, with astronomical savings potential)

“1-800-FLOWERS improved its ability to detect fraud by considering the social connections between prospective perpetrators.” —Eric Siegel, *Predictive Analytics: The Power to Predict Who Will Click, Buy, Lie, or Die*

“Aviva, a large insurance firm, has studied the idea of using credit reports and consumer-marketing data as proxies for the analysis of blood and urine samples for certain applicants. The intent is to identify those who may be at higher risk of illnesses like high blood pressure, diabetes, or depression. The method uses lifestyle data that includes hundreds of variables such as hobbies, the websites people visit, and the amount of television they watch, as well as estimates of their income. Aviva’s predictive model, developed by Deloitte Consulting, was considered successful at identifying health risks.”

—Viktor Mayer-Schonberger and Kenneth Cukier, *Big Data: A Revolution That Will Transform How We Live, Work, and Think*

*“By harnessing the ‘wisdom of crowds,’ many subjective observations taken together provide a more objective and accurate picture of an employee’s performance than a single subjective judgment. It averages out prejudice or baggage on the part of both manager and employee.” —Eric Mosley, *The Crowd Sourced Performance Review**

*“Some people rush for a deal, others think that the deal means the merchandise is subpar. Just by eliminating the persuasion styles that rub people the wrong way [as deduced from prior Web behavior patterns], [the marketer] found he could increase the effectiveness of marketing materials from **30** to **40** percent.” —Eli Pariser, *The Filter Bubble: How the New, Personalized Web Is Changing What We Read and How We Think**

*“Analytics can yield literally hundreds of millions of data points—far too many for human intuition to make any sense of the data. So in conjunction with the ability to store very big data about online behavior, researchers have developed strong tools for data mining, statistically evaluating correlations between many types and sources of data to expose hidden patterns and connections. **The patterns predict human behavior—and even hidden human motivations.**”*

*—Illah Reza Nourbakhsh, *Robot Futures**

“Predictions based on correlations lie at the heart of big data.”

—Viktor Mayer-Schonberger and Kenneth Cukier, *Big Data: A Revolution That Will Transform How We Live, Work, and Think*

“Flash forward to dystopia. You work in a chic cubicle, sucking chicken-flavor sustenance from a tube. You’re furiously maneuvering with a joystick ... Your boss stops by and gives you a look. ‘We need to talk about your loyalty to this company.’ The organization you work for has deduced that you

are considering quitting. It predicts your plans and intentions, possibly before you have even conceived them.”

—Eric Siegel,

Predictive Analytics: The Power to Predict Who Will Click, Buy, Lie, or Die (based on a real case, an HP “Flight risk” PA model developed by HR, with astronomical savings potential)

*“LinkedIn offers a career trajectory prediction by comparing your resume to other peoples’ who are in your field but further along. LinkedIn can forecast where you’ll be in five years. ... As a service to customers, it’s pretty useful. But imagine if LinkedIn offered the data to corporate clients to weed out people who are forecast to be losers. ... It seems unfair for banks to discriminate against you because your high school buddy is bad at paying his bills or because you like something that a lot of loan defaulters also like. And that points to a basic problem with induction, the logical method by which algorithms use data to make predictions.”—Eli Pariser, *The Filter Bubble: How the New, Personalized Web Is Changing What We Read and How We Think**

*“With new forms of ‘sentiment analysis’ it’s now possible to guess what mood one’s in. People use substantially more positive words when they’re up ...”—Eli Pariser, *The Filter Bubble: How the New, Personalized Web Is Changing What We Read and How We Think**

“I believe this is the quest for what a personal computer really is. It is to capture one’s entire life.” —Gordon Bell

“Internet of Things”:

“The algorithms created by Nest’s machine-learning experts—and the troves of data generated by those algorithms—are just as important as the sleek materials carefully selected by its industrial designers. By tracking its users and subtly influencing their behaviors, Nest Learning Thermostat transcends its pedestrian product category. Nest has similar hopes for what has always been a prosaic device, the smoke alarm. Yes, the Nest Protect does what every similar device does—goes off when smoke or CO reaches dangerous levels—but it does much more, by using sensors to distinguish between smoke and steam, Internet connectivity to tell you where the danger is, a calculated tone of voice to convey a personality, and warm lighting to guide you in the darkness. In other words, Nest isn’t only about beautifying the thermostat or adding features

*to the lowly smoke detector. **‘We’re about creating the conscious***

***home,’** Nest CEO Fadell .” Left unsaid is a grander vision, with even bigger implications, many devices sensing the environment, talking to one another, and doing our bidding unprompted.”—Steven Levy,*

*“Where There’s Smoke ...,” *Wired*, November 2013*

“Internet of Everything”:

“The idea of the IoE [Internet of Everything/Cisco Systems/Estimated market size, next decade: \$14.4 trillion] is a networked connection of people, processes, data and ‘things,’ which is being facilitated by technology transitions such as increased mobility, cloud computing and the importance of big data.”*

Source: “The Big Switch,” *Capital Insights*

“Robotics will drive this very innovation. Landing page tuning will bust out of the Internet and become ‘interaction tuning.’ Companies will apply their analytics engines to all interaction opportunities with people everywhere: online, in the car, in a supermarket aisle, on the sidewalk, and of course in your home.” —Illah Reza Nourbakhsh, *Robot Futures*

Summary 2013: What I've Come/Am Coming to Believe

*The power to invent (*and* execute) is switching/flipping rapidly/inexorably to the network. “Me” is transitioning to “We”—as consumers and producers. Nouns are giving way to gerunds—it’s an “ing”/shapeshifting world!

*The Internet *must* stay open and significantly unregulated to enable, among other things, the entrepreneurial spurt that will significantly underpin world economic growth.

*Entrepreneurial behavior and upstart entrepreneurial enterprises have underpinned every monster shift in the past, such as farm to factory. This time will likely be no different.

*An obsession with a “Fortune 500” of more or less stable giants dictating “the way we do things” will likely become an artifact of the past. (Though big companies/“utilities” will not disappear.)

*There is simply no limit to invention or entrepreneurial opportunities! (Please read twice.)

*The new star bosses will be “wizards”/“maestros.”

*Sources of sustained profitability will often be elusive in a “soft-services world.”

*Control and accountability will be a delicate dance. Now you see it, now you don't ...

***Trial and error, many many many trials and many many many errors very very very rapidly will be the rule; tolerance for and delight in rapid learning—and unlearning—will be a/the most valued skill.**

* “Gamers” instinctively “get” the idea of lots of trials, lots of errors, as fast as possible; for this reason among many, “the revolution” is/will be to a very significant degree led by youth.

*Women may well flourish to the point of domination in new leadership roles in these emergent/ethereal settings that dominate the landscape—power will be exercised almost entirely indirectly (routine for most women—more than for their male counterparts), and will largely/elusively inhabit the network per se.

*The “Brand You/Brand Me” idea is alive and well and getting healthier every day and is ... not optional. Fact is, we mostly all will have to behave/be entrepreneurial tapdancers to survive let alone thrive. (Again, the under-35 set already seem mostly to get this; besides, this was the norm until 90 years ago.)

*Individual performance and accountability will be more important than ever, but will be measured by one’s peers along dimensions such as reliability, trustworthiness, engagement, flexibility, willingness to spend a majority of one’s time helping others with no immediate expected return.

*AI is ripping through traditional jobs at an accelerating pace. Virtually no job, circa 2000, no matter how “high end,” will remain in a recognizable way within 15-25 years. It’s as simple—and as traumatic—as that.

*Wholesale/continuous/intense re-education (forgetting as well as learning) is a lifelong pursuit/imperative; parent Goal #1: Don’t kill the curiosity with which the child is born!

*STEM (Science-Technology-Engineering-Math) is no doubt significant to a landscape being transformed by technology, though it has severe limitations. I favor the somewhat more robust formulation labeled STEAM/steAm. The “A” is for Art, or the arts. “The arts” are to some extent “what’s left” in terms of value creation as AI/robotics vacuum up traditional high-end occupations—think Apple.

*The surprisingly good news: Education is busily re-inventing itself and leaving the ed establishment in the dust! The idea of and shape of education per se are erasing all that’s come before.

*GRIN/Genetics-Robotics-Informatics-Nanotech: Overwhelming transformation is hardly just the provenance of AI/Robotics. Change, entrepreneurial activities and early adoption in the “G”/genetics and the “N”/nanotech arenas are accelerating. In fact, our 25 year horizon may border on the unrecognizable.

*Government has a large role to play, like it or not. E.g., government-funded BASIC-research and development is a major-league necessity—which is growing rather than diminishing. Acknowledging the limits, at times severe, of markets is imperative!

*Governance: It is hard to imagine that fundamental systems of human arrangement-governance will remain unchanged.

*Downside? I have during my months of forced re-education personally moved from a position of deep pessimism to one of guarded optimism. Will “everything be different” in 10 or 25 years? Perhaps. Will we adapt individually and organizationally; history says yes, but common sense says there are no sure bets, and frightful issues (from genetics to war-and-peace) can readily be imagined. Stay tuned!

XLIX. In Search of Kiwi EXCELLENCE

I am a part-time New Zealand/Kiwi resident—2.5 months a year, during the New England winter. I was asked to address a prestigious business-government forum, called the New Zealand Initiative, in March 2014. The NZ economy is to a large extent driven by dairy exports. Fine enough. But when one is at the whim of commodities, one is in a particularly precarious position. You'll see my views from the 13 March presentation summarized here, labeled, as noted in the title, "In Search of Kiwi EXCELLENCE":

1. We are in the midst of unprecedented ("exponential") change—at once exciting and frightening. And wholly independent of geographic location.
 2. **The principal role of the state is to provide for the betterment and development of its citizens —PEOPLE FIRST.**
 3. **Businesses—small/large/one at a time—are THE engine of national human capital development. (AND must necessarily act accordingly.)** (Note: I feel this is a ... **HUGE** ... idea. Business ... **IS** ... the de facto/de jure engine of human capital investment. Thence, regardless of the whims of a particular government, business ... **MUST** ... "step up to the plate. **NO OPTION.**)
 4. **PUTTING PEOPLE FIRST ... maximizes mid- to long-term growth and financial success for businesses of every size and flavor. (PPF is NOT a "soft" idea/strategy. It is the ... ultimate "hard" idea/strategy. *In Search of Excellence*: "Hard is soft. Soft is hard.")**
 5. Putting people first means by definition that ... **SUPERB/MIND-BLOWING TRAINING & DEVELOPMENT IS INVESTMENT PRIORITY #1.**
- 5A. "Insane" commitment to training and development is effectively guaranteed (!) to mitigate if not reverse "brain drain." (Make NZ a net top-talent attractor via ... **"GUARANTEED" EXCELLENCE IN HUMAN CAPITAL DEVELOPMENT.** Why not?)

6. Education requires almost a 180-degree reversal—age 4 to 84. Creativity is long-term national resource #1—and schools (all around the world) are “excellent” at mercilessly destroying creativity and its handmaiden, entrepreneurial instinct. (NOBODY ... is “doing it right”—which in and of itself presents an enormous opportunity!)

6A. The new technologies must be unabashedly AND relentlessly AND creatively AND audaciously applied to education—age 4 to 84. (Beware the tenacity of the descendents of Ned Ludd!)

6B. A significant share of the VERY best and VERY brightest of our university graduates must be radically (BIG incentives) induced to do “national service” as teachers for a limited period of time. (Remember: “Exponential” change—youth is imperative in our teacher corps.)

7. Giant companies are long-term ... LOSERS. (The evidence is ... UNEQUIVOCAL.

7A. Which is to say UNEQUIVOCALLY: The strength of a nation in general, and the likes of NZ in particular, is its MITTELSTAND ... smallish to middle-sized specialist superstars committed to ... “OUTRAGEOUSLY HIGH VALUE ADDED.”

7B. New-tech allows locals following any path to be global to an unprecedented degree—i.e., “micro-multinationals.”

7B1. “Social business” is a buzzphrase that turns out to be “the real thing.” Radical social engagement practices are changing the definitions everything from “organizing” to “financing” to “service/customer experience” to “marketing” ... to the essence of the brand itself.

7C. There are no industry limitations to “Mittelstand-ing”: ANYTHING is fair game, not just the likes of software/bio-tech.

7D. “Commodity” is a (DISASTROUS) state of mind. With determination and an unwavering commitment to innovation and excellence ... ANYTHING can be DRAMATICALLY differentiated.

7E. Listen to Steve Jobs/BMW: Embrace terms such as “Insanely Great” and “Radically Thrilling.” (Which can apply to a supply chain system as well as a scintillating product.)

7F. Public sectorites: Dramatic improvements in support for ease-of-doing-business can be accomplished w/o legislation; government agencies are invariably their own worst enemies.

8. An effective economy, long-term, is built upon a foundation of: (1) No-holds-barred HUMAN CAPITAL DEVELOPMENT. And: (2) RELENTLESS EXPERIMENTATION. (“Ready. FIRE. Aim.” “Fail. Forward. Fast.”)

8A. Many/most “eggs in one or two baskets” (products, partners) is a perilous strategy in general and ... LITERALLY INSANE ... in tumultuous times. (Hint: these are “tumultuous times” of “exponential” change.)

9. Women BUY. Women RULE. Thence: **A failure to take full advantage of the talents and energy of WOMEN is a sign of ... STAGGERING ECONOMIC IGNORANCE.**

9A. Women are the premier purchasers of ... EVERYTHING. Men are incapable of designing products for women. Women tend to be significantly more effective leaders in today’s emerging, less hierarchical world. E.g., COMPANIES WITH BALANCED F-M LEADERSHIP TEAMS PERFORM DRAMATICALLY BETTER (FINANCIALLY, ETC.) THAN M-DOMINATED INSTITUTIONS.

10. Mantra 2014: **READ. READ. READ. READ. READ. READ. READ. READ. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY. STUDY.**

11. EXCELLENCE is a state of mind. **If not EXCELLENCE ... why the hell bother to get up in the morning?**

12. “WOW” is a state of mind. **If not WOW ... why the hell bother to get up in the morning?**

13. New Zealand IS special. New Zealand IS different. Short-term economic panaceas should not stand in the way of a strategy based upon “Insanely-High-Value-Added-The-Kiwi-Way.” Timidity is a loser’s approach amidst exponential change.

The (Mittelstand) Magicians of Motueka*

(*A wee town at the top of New Zealand's South Island)

W.A. Coppins Ltd.

(Coppins Sea Anchors/PSA/para sea anchors)

Coppins started in textiles in 1898; progressed into sophisticated sea anchors in 1976.

Thrive on ...

“wicked problems”*

(*Classic Mittelstand.)

For example (“wicked” as it gets), 2013 contract with a (VERY) tough customer, the U.S. Navy, for sea anchor for STLVASt/Small To Large Vehicle At Sea Transfer.

U.S. Navy's STLVASt Sea Anchor: A [Classic] Mittelstand Trifecta*

Specialty nylon, Dyneema, from DSM/Netherlands.

Custom fabric from W. Wiggins Ltd./Wellington, NZ.

Final product from Coppins.

*These sorts of “MITTELSTAND Superstars” can be born and raised anywhere, thrive, and be the bedrock of a thriving national economy, a big one at that—e.g., Germany. Literally: As goes the Mittelstand, so goes Germany. (Germany, pop 80M, was the world's #1 exporter, ahead of the USA, for years—until recently surpassed by China.)

L. **47** Questions for Newby CEOs

A reporter asked me to think about “a couple of questions a new CEO ought to ask her/himself.” I stopped—for now—at 47:

Can you imagine your tombstone having your net worth carved in it? Of course you can't. (I hope.) So what *would* you like on the tombstone?

How would you explain what you do to your 10-year-old daughter? (Aim for 25/50 words or less.)

How would you explain your most recent major decision to your 10-year-old daughter? (Aim for 25/50 words or less.)

Did you miss half your 13-year-old daughter's soccer games this year? (I'll guarantee that if you live to be 109, you'll never forgive yourself no matter how many zeros in your net worth.)

List your Top Five active projects: How many score 8 or higher on a 10-point “WOW Scale”?

Are your training courses so damn good they make you giggle?

Can every employee, when stopped by you in the hall, describe her or his personal development strategy for 2014? (Is it radical?)

Is your CTO/Chief Training Officer on a par (e.g., pay, perks, pecking order) with your CFO/CIO/CMO?

Have you (I HOPE) read *Forbes* publisher Rich Karlgaard's superb ...

The Soft Edge?

List your Top Five active projects: *How
many score 8
or higher on a
10-point
“WOW
Scale”?* *

***TODAY.** Take ONE project. Figure out—with your team—how to move it up ONE notch on the WOW Scale. (I call this, God help me ... **“WOW-ification.”**)

Whenever you read this: Have you modeled Unadulterated Excellence in the last 30 minutes?

Do you have enough freaky customers in your portfolio, pushing you to the limit day in and day out?

If you got run over by a bus, could you guarantee that your successor is BETTER than you are?

Have you thanked 10 people for **SOMETHING** ... today?

At year's end do you call 25-50 people to thank them for their support during the prior 12 months? (Inspired by Hank Paulson)

Is EVERY meeting a Paragon of Excellence? (To a large extent, like it or not, meetings are what you do.)

Do you ever act like an asshole? (Guess what, dude, you can't get away with it—you are NOT Steve Jobs.)

Do you have an implicit bias for capital investments over people investments?

(Think **VERY** carefully about this.)

Are you a good listener? (Odds are **VERY**

high that you are not—**AND** that you're getting worse. Nothing is more important. It is a subject that can be studied and mastered.)

Are you a **PROFESIONAL** ... listener?

Are you a **PROFESIONAL** ... at hiring?

Are you a **PROFESIONAL** ... at evaluating people?

How many-off-the-charts crazy new people have you had lunch with in the last 90 days? (Inspired by FedEx CEO Fred Smith.)

Do you read enough? (10:1 says the answer is “No.”) (Inspired by one of USA’s top 10 investment bankers who said not reading enough is the number ONE failing of CEOs.)

If all of your traditional marketing programs were shut down tomorrow, would your extant Social Media programs carry the load?

Do you think the whole “social media”/“social employee”/“social business” “thing” is overblown? (It may be, but are you sure? Good chance it’s “underblown.” How do you plan to test the overblown/underblown hypothesis?) (In any event, STUDY like a maniac.)

Do you think the whole “big data” “thing” is overblown? (It may be, but are you sure? Good chance it’s “underblown.” How do you plan to test the overblown/underblown hypothesis?) (In any event, STUDY like a maniac.)

Do you make eye contact 100% of the time?

Do you practice Intense MBWA (Managing By Wandering Around) EVERY day? (Courtesy, in effect, Starbucks’ Howard Schultz, who visits a minimum of 25 shops per week.)

To what degree can you say you are honestly (regularly, intensively) in touch with folks three levels “down” in the organization—where the real work gets done?

Are you over-reliant on email, or do you still use the phone regularly?

Do you reward imaginative failures that lead to significant learning? (Courtesy a successful Aussie exec who says his philosophy is, “Reward excellent failures, punish mediocre successes.”)

How many physical visits to key customers have you made this quarter?

Do you have a rigid/near-religious routine of calling a key contact at each of your top 10 (25?) customers once a month?

Are you sure that you are not so intimidating that you cause people not to share priority problems with you early on when they are fixable? (**Hint, you think you are approachable—odds are you are alone in that assessment.**)

Women buy the lion's share of retail AND commercial goods. Does your top team reflect that? (***If it doesn't, you're an idiot.***)

Is your top team a paragon of diversity? Or did they all go to Stanford? (I went to Stanford. It is, of course, the best university in the world. But lack of top-team diversity is a huge mistake. Inspired by Billy Cox: “You will become like the five people you associate with the most; this can be either a blessing or a curse.”)

Have you read and attentively studied and widely shared Daniel Kahneman's book *Thinking, Fast and Slow*? (It will shake your confidence in your and your colleagues' judgment/decision-making skills—that's a good thing.)

Do you think your intuition is good? (I don't—and I don't even know you.)

Is **50%** of your time unscheduled? (Courtesy Intel

superstar Dov Frohman's book *Leadership the Hard Way*. Frohman says over-scheduling and failure to “daydream” are CEOs' two top failings.)

Is your full cadre of 1st-line bosses staggeringly talented and well trained/mentored/compensated? (The population of 1st-line bosses is unmistakably the #1 determinant of productivity/employee retention.)

Do you have an implicit bias toward noisy, aggressive people? (You probably do. Read the book *Quiet*—and realize that shortchanging introverts is a strategic mistake.)

Do you acknowledge that failed cross-functional communication/cooperation/synergy is the #1 cause of delays of ... EVERYTHING? (It is.) Do you work VISIBLY on this EVERY day? (Inspired by Mayo Clinic—MC fires top docs who fail to buy into team medicine.)

Do you acknowledge that there are about 500 ways to de-motivate people, and about 5 ways to motivate them—and act accordingly?

Do you quickly get tired of people who constantly say “the sky is falling”? (Well, I do, too. But sometimes it is falling. I pray you are an optimist; I pray that you have a few pessimistic pals whom you do not dismiss out of hand.)

Do you acknowledge that acquisitions rarely live up to their billing—the billing that was so gloriously touted by you? And do you acknowledge that when acquisitions blow up it is usually courtesy a “culture clash” which you didn’t look at hard enough during the vetting process? (If you don’t acknowledge that, you are wrong. PERIOD.)

In presentations you review, is there as much/more text devoted to implementation as there is to problem/opportunity analysis?

Is your strategic plan > 2 pages? (If yes ... *for shame.*) (Courtesy Larry Bossidy.)

LI. The **ONLY** Thing I've Learned
(**NO** Bull!)

1/48*

*The One & Only one thing I've learned "for sure" since 1966—48 years.

In Search of Excellence /1982

The Bedrock “Eight Basics”

- 1. A Bias for Action**
- 2. Close to the Customer**
- 3. Autonomy and Entrepreneurship**
- 4. Productivity Through People**
- 5. Hands On, Value-Driven**
- 6. Stick to the Knitting**
- 7. Simple Form, Lean Staff**
- 8. Simultaneous Loose-Tight Properties**

A Bias For Action, 1966-2014

Let me not weary you with a long tale of the work that led to *In Search of Excellence*. I will simply say that the research was done and the writing had been outlined. It included, as centerpiece, eight chapters that were the heart of the matter—the “Eight Basics of Excellence.” Well, of course, something had to come first. “People as asset #1”? “Getting close and then closer to the customer”? “Internal entrepreneurship”? Great candidates all! But we (my co-author Bob Waterman and I) chose—without any hesitation—another that we labeled

“A Bias For Action.” In our travels, we had concluded that big businesses’ # 1 problem was, to use our shorthand, **“Too much talk, too little do.”** As the norm, companies were weighed down with bureaucracy to the sinking point. (Indeed, some did sink.) But the companies we most admired—3M was a classic example—were inclined to generate an idea, test it in a flash, correct it in a flash, again and again, and then again, until it was discarded or became the basis for something new. Something had to be #1. And that characteristic, that “shut up and do now” bias for action was it.

That was some time in 1980, two years before the book was published. And here it is 2014. Fully thirty-four years later. And I *still* have not changed my mind. A lot has changed to say the least, but now, more than ever, those who get an inkling and try it in a flash and fix it in a flash are still the pick of the litter. From Google or Facebook to GE and the stores on main street in your town.

As I look back, 1966 was actual the personal launch of this paramount idea for me. After college, I went into the U.S. Navy—they’d paid my way through school. And, skipping steps, became an officer in a Seabee battalion. (Seabees stand for C.B., construction batallions—combat engineering units that by and large support U.S. Marine Corps ground units. The motto of the “Bees,” from the start in 1942 was **“Can do.”** Or: Stop the talk, start the “do.” It was embedded in a history dating to World War II and the important battle for Guadalcanal. And 24 years later I was living the legend in Danang, Vietnam. My “CO”/Commanding Officer epitomized “Can do.” And, in retrospect, directly anticipated “A Bias For Action.” I heard “Shut up and get in the field and do it—barriers are 100% irrelevant” so many times that my brain ached.

And, to essentially repeat, 48 years later, my beliefs haven’t changed one bit—except to get stronger with the passage of time. Heavens knows, in 2014 “a bias for action” has become the “age for action”—as everything moves/accelerates faster and faster.

1/48: Action Rules! The 1 Thing (Only) I've Learned (For Sure) in 48 Years!

A Bias for Action. (No. 1/"Basics of Excellence"/*In Search of Excellence*/1982)

**Ready.
Fire.
Aim.**

(H. Ross Perot on EDS; as compared to GM's "Ready. Aim. Aim. Aim. Aim. Aim. ...")

Just do it! (Nike.)

Move fast, break things. (Facebook.)

Experiment fearlessly. (Trait #1/Great innovator companies/*Bloomberg Businessweek*)

Relentless trial and error. (Corporate Survival Trait #1 in crazy times/*Wall Street Journal*)

"You miss 100% of the shots you never take." (Wayne Gretzky.)

Fail. Forward. Fast. (Tech exec/Philadelphia)

CAN YOUR BUSINESS FAIL FAST ENOUGH TO SUCCEED? (*Economist* conf. title)

Fail faster, succeed sooner. (David Kelley/IDEO.)

**No matter.
Try again.
Fail again.
Fail better.**

(Samuel Beckett)

Reward excellent failures. Punish mediocre successes. (Phil Daniels/Australian businessman)

Whoever Makes the Most Mistakes Wins. (Richard Farson/book title)

"The Silicon Valley of today is built less atop the spires of earlier triumphs than upon the rubble of earlier debacles." (Paul Saffo/tech futurist/Palo Alto)

“The secret of fast progress is *inefficiency*: fast/furious/numerous failures.” (K. Kelly)

S.A.V./Screw Around Vigorously (TP: only possible success strategy for crazy times)

Demo or die. (MIT Media Lab credo)

“Don’t ‘plan.’ Do stuff.” (David Kelley/IDEO)

“Effective prototyping may be the most valuable core competence an innovative organization can hope to have.”/“Minimize ‘mean time to prototype.’” (M. Schrage/MIT)

“This is so simple it sounds stupid. You only find oil if you drill wells.” (J. Masters/wildcatter)

“We have a ‘strategic plan.’ It’s called ‘doing things.’” (Herb Kelleher/Southwest Airlines)

“Can do!” (Motto/U.S. Navy Seabees/My starting point in 1966 in Vietnam)

“Execution *is* strategy.” (Fred Malek)

WD40 (Water Displacement, 40 tries to get it right.)

**BLAME NOBODY.
EXPECT NOTHING.
DO SOMETHING.**

(NFL coach Bill Parcells/locker-room poster)

“Quality is a probabilistic function of quantity.” (M. Gladwell/“Creation Myth”/re J.S. Bach)

“Ever notice that ‘*What the hell*’ is always the right decision?” (Anon. screenwriter)

“I think it is very important for you to do two things: act on your temporary conviction as if it was a real conviction; and when you realize that you are wrong, correct course very quickly.” (Andy Grove)

Active mutators in placid times tend to die off. They are selected against. Reluctant mutators in quickly changing times are also selected against.” (Carl Sagan & Ann Druyan, *Shadows of Forgotten Ancestors*)

If things seem under control, you’re just not going fast enough.” (Mario Andretti)

The most successful people are those who are good at plan B.” (James Yorke, mathematician)

“I’m not comfortable unless I’m uncomfortable.” (Jay Chiat)

“If it works, it’s obsolete.” (Marshall McLuhan)

“The only way to whip an army is to go out and fight it.” (Ulysses S. Grant)

“The genius of Grant’s command style lay in its simplicity. Grant never burdened his division commanders with excessive detail. ... no elaborate staff conferences, no written orders prescribing deployment. ... Grant recognized the battlefield was in flux. By not specifying movements in detail, he left his subordinate commanders free to exploit whatever opportunities developed.”—Jean Edward Smith, *GRANT*

“Execution is the job of the business leader.” (Larry Bossidy)

*Do right and damn the odds.
Stagnation is the curse of life.
The best is the cheapest.
Emotion can sway the world.
Mad things come off.
Haste in all things.
Any fool can obey orders.
History is a record of exploded ideas.
Life is phrases.*

First Sea Lord Admiral John Fiaher

W.T.T.M.S.W. /Whoever Tries The Most Stuff Wins.

WTTMSASTMSUW/ Whoever Tries The Most Stuff **And Screws The Most Stuff Up** Wins.

WTTMSASTMSUTFW/Whoever Tries The Most Stuff And Screws The Most Stuff Up

The Fastest Wins.

**“Ready.
Fire.
Aim.”**

H. Ross Perot/EDS founder, former GM board member *“The first EDSer to see a snake kills it. At GM, the first thing you do is organize a committee on snakes. Then you bring in a consultant who knows a lot about snakes. Third thing you do is talk about it for a year.”*

“We made mistakes, of course. Most of them were omissions we didn’t think of when we initially wrote the software. We fixed them by doing it over and over, again and again. We do the same today. While our competitors are still sucking their thumbs trying to make the design perfect, we’re already on prototype version #5. By the time our rivals are ready with wires and screws, we are on version #10. It gets back to planning versus acting:

*We act from
day one;
others plan
how to plan—
for months.”*

—Bloomberg by Bloomberg

“The difference between Bach and his forgotten peers isn’t necessarily that he had a better ratio of hits to misses. The difference is that the mediocre might have a dozen ideas, while Bach, in his lifetime, created more than a thousand full-fledged musical compositions. A genius is a genius, psychologist Paul Simonton maintains, because he can put together such a staggering number of insights, ideas, theories, random observations, and unexpected connections that he almost inevitably ends

up with something great. ‘Quality,’ Simonton

writes, ‘is a probabilistic function of quantity.’”

—Malcolm Gladwell, “Creation Myth,” *New Yorker*, 0516.11

*“When assessing candidates, the first thing I looked for was energy and enthusiasm for ... **execution.**”*

Does she talk about the thrill of getting things done, the obstacles overcome, the role her people played—or does she keep wandering back to strategy or philosophy?”

—Larry Bossidy, from *Execution: The Discipline of Getting Things Done*

**A man approached J.P. Morgan, held up an envelope, and said,
“Sir, in my hand I hold a guaranteed formula for success, which
I will gladly sell you for \$25,000.”**

**“Sir,” J.P. Morgan replied, “I do not know what is in the envelope,
however if you show me, and I like it, I give you my word as a gentleman
that I will pay you what you ask.”**

**The man agreed to the terms, and handed over the envelope.
J.P. Morgan opened it, and extracted a single sheet of paper.
He gave it one look, a mere glance, then handed the piece of paper back
to the gent.**

**And paid him the
agreed-upon \$25,000 ...**

The formula:

- 1. *Every morning, write a
list of the things that
need to be done that day.***

2. *Do them.*

“Can do!”

—Motto/U.S. Navy Seabees
(My starting point in 1966 in Vietnam/48 years ago)

*“Screw it.
Just do it.”*

—Richard Branson

*“Ever notice
that ‘What the
hell’ is always
the right decision?”*

—Anon. screenwriter

*“We have a
‘strategic
plan.’ It’s
called ‘doing
things.’”*

—Herb Kelleher/Southwest Airlines

*“You miss
100% of the
shots you
never take.”*

—Wayne Gretzky.

**BLAME NO ONE.
EXPECT NOTHING.
DO SOMETHING.**

—**NFL coach Bill Parcells**
(locker-room poster)

*“Intelligent people
can always come up
with intelligent
reasons ... to do
nothing.”* —Scott Simon

*"Thinking is the enemy of
creativity. It's self-conscious
and anything self-conscious
is lousy. You simply must ...
do things."* —Ray Bradbury

Demo or die.

—MIT Media Lab credo

*“Effective
prototyping may be
the most valuable
core competence an
innovative
organization can
hope to have.”*

—Michael Schrage

“The way to make a better aircraft wasn’t to sit around perfecting a design, it was to get something up in the air and see what happens, then try to fix whatever goes wrong.”

Instead of trying to figure out the best way to do something and sticking to it, just try out an approach and keep fixing it.”

—Eric Abrahamson & David Freedman, Chapter 8, “Messy Leadership,” from *A Perfect Mess: The Hidden Benefits of Disorder* (On Burt Rutan, perhaps the world’s best aircraft designer and developer)

CORNERSTONE of effective approach to “rebalancing”
company portfolios in the face of changing and uncertain global
economic conditions

LII. RADICAL Nudgery: **The Little BIG Things**

We tend to think big actions are required to induce big change. Nothing could be further from the truth. Marketers have known this—and acted upon it—for decades, perhaps centuries. Recently, the “field” of nudgery has been subject to a Renaissance.

I don’t care whether it’s new or old—or practiced by marketers or psychologists or economists. It is important and invaluable—albeit with moral downsides associated with “social engineering,” growing by orders of magnitude in the age of Web-ubiquity. (The latter, for better or for worse, is not the topic here; the power of the phenomenon per se is the limited point.)

A few (**PRETTY DAMNED AMAZING**) examples:

Glaring Eyes: **-62%**

Case: Bike theft rampant in a European city. Test: Put posters above big bike rack areas with a pair of glaring eyes; theft reduced 62% in experimental areas. (PLOS ONE/via *The Atlantic CITIES* /0429.13)

6.5 feet away = **-63%**

Case: Serving plate located 6.5 feet or more from dining room table after first helpings served. Second helpings reduced by 63% versus leaving serving plate on the table.

Slight curvature: **2X**

Case: “When [designer] Friedman slightly curved the right angle of an entrance corridor to one Las Vegas gaming] property, he was ‘amazed at the magnitude of change in pedestrians’ behavior’—the percentage who entered increased from one-third to nearly two-thirds.” (Natasha Dow Schull, *Addiction By Design: Machine Gambling in Las Vegas*)

Odor #1 vs. odor #2: **+45%**

Case: “Pleasing” odor #1 in gambling machine space vs. “pleasing” odor #2: +45% per machine revenue. Needless to say, Las Vegas sports an entire army of incredible well-trained professionals whose role in life is to attract more patrons to casinos and keep them there as long as possible—machine gambling now accounts for 85% of casino profits. (“Effects of Ambient Odors on Slot-Machine Usage in Las Vegas Casinos,” reported in Natasha Dow Schull, *Addiction By Design: Machine Gambling in Las Vegas*)

Size change = **1.5X**

Case: Walmart increases shopping cart size. Sales of big-bggish appliances increase 50%. Impact: millions upon millions of dollars to the bottom line.

Altered Bag sizes = **\$B++**

Case: Frito Lay/Pepsico, following a string of new product introduction disappointments, “merely” introduces new bag sizes (“family,” “single serve,” etc.); instead of cannibalization of prior sizes, entirely new markets are created—billions of dollars in size.

Socks = **-10,000**

Case: NHS/UK estimates that if every hospital in-patient was given compression hose to wear, as many as 10,000 lives lost to DVT/deep vein thrombosis would be saved each year.

Size alteration = **2X/100%**

Case: Change conference room table shape from oblong to round. Number of comments doubles; number of people commenting approaches 100%.

Avatar height = **+Self-Esteem**

“When I work with experimental digital gadgets, I am always reminded of how small changes in the details of a digital design can have profound unforeseen effects on the experiences of the people who are playing with it. ... For instance, Stanford University researcher Jeremy Bailinson has demonstrated that changing the height of one’s avatars in immersive virtual reality transforms self-esteem and social self-perception. Technologies are extensions of ourselves, and, like the avatars in Jeremy’s lab, our identities can be shifted by the quirks of gadgets. It is impossible to work with information technology without also engaging in social engineering.”
—Jaron Lanier, *You Are Not a Gadget*

**(PLEASE ... re-read
these cases. The results are
nothing short of ...
STAGGERING.
“Nudgery” is a hyper-
potent—and under-
applied—change tool.)**

Bottom line: This notion applies ...

EVERYWHERE.

And: The best news of all that this process can be applied ... *by*

anybody at any level in

any field at any time

*with little muss or fuss or expense and
with very little visibility associated with
the failed experiments that will
necessarily ensue in large numbers as
you work/EXPERIMENT your way
toward something with high impact.*

That is:

- (1) Amenable to rapid experimentation/
failure “free” (no bad “PR,” few \$\$)**
- (2) Quick to implement/Quick to Roll out**
- (3) Inexpensive to implement/Roll out**
- (4) Huge multiplier**
- (5) An “Attitude”***

(*This is the biggie— a “culture” of everyone “trying stuff” is harder to instill than it might first appear.)

Consider a process, perhaps like this:

- (1) Half-day session/generate 25 ideas**
- (2) One week/5 experiments**
- (3) One month/Select best 2**
- (4) 60-90 days/Roll out**

Have at it.

The rewards could well be a first-order ...

WOW!

LIII. The **LAST** Word* (*For Now)

*“Be the best.
It’s the only
market that’s
not crowded.”*

—**George Whalin** (from *Retail Superstars: Inside the 25 Best Independent Stores in America*) (Sure, it’s obvious—but that’s the point. Amidst the madness that leads us to go this way, then that way, then the other way, it’s important to remember that being bloody damn good at ... SOMETHING ... was and is and will be the immutable bedrock of everything else.) (FYI: *Retail Superstars* is a marvel—even if you are in HR or finance. It’s 25 stories/sagas/tales about the unbridled power of imagination—sagas of people who have turned the ordinary into the extraordinary with such vigor that it makes one—or me, anyway—giggle at times. FYI: In the same vein, read/ingest Bo Burlingham’s *Small Giants: Companies That Choose to Be Great Instead of Big.*)

(“We are crazy. We should do something when people say it is ‘crazy.’ If people say something is ‘good,’ it means someone else is already doing it.” —Hajime Mitarai, Canon)

(“There’s no use trying,” said Alice. ‘One cannot believe impossible things.’ ‘I daresay you haven’t had much practice,’ said the Queen. ‘When I was your age, I always did it for half an hour a day. Why, sometimes I’ve believed as many as six impossible things before breakfast.’” —Lewis Carroll)

Systems Have Their Place: **SECOND** Place

Tom Peters

01 March 2014

“If I could have chosen not to tackle the IBM culture head-on, I probably wouldn’t have. My bias coming in was toward strategy, analysis and measurement. In comparison, changing the attitude and behaviors of hundreds of thousands of people is very, very hard.[Yet] I came to see in my time at IBM that culture isn’t just one aspect of the game—it is the game.”

—Lou Gerstner, former chairman, IBM

Foreword

There is no doubt whatsoever about the importance of systems—even in a 1-person business. For most of us, the "to do" list—a system if ever there were one—is an imperative aid to making it through the day. On the other hand, there is an other hand. That "to do" list is utterly worthless without the will and discipline to follow up with execution—i.e., actually doing the "to dos." And if that execution and doing involves others' help, as it usually does, then our attitude will differentiate between success and failure.

Fact is, we could get by without the system—the "to do" list per se. But we could not get by or get anything done without the "culture"—the discipline to follow up and attitude required to effectively work with others.

*Hence, the title of this paper: "Systems Have Their Place: **SECOND** Place." Herein are 10 cases—from the U.S. Air Force to Mayo Clinic to Toyota—in which systems, though of the utmost importance, were toothless without the "right" "organizational culture" to abet and sustain performance excellence.*

Systems Have Their Place: SECOND Place

“With ISO 9000 [quality standards] you can still have terrible products. You can certify a manufacturer that makes life jackets from concrete, as long as those jackets are made according to the documented procedures and the company provides next of kin with instructions on how to complain about defects. That’s absurd.”—Richard Buetow, Motorola

“If I could have chosen not to tackle the IBM culture head-on, I probably wouldn’t have. My bias coming in was toward strategy, analysis, and measurement. In comparison, changing the attitude and behaviors of hundreds of thousands of people is very, very hard. [Yet] I came to see in my time at IBM that culture isn’t just one aspect of the game—it is the game.”—Lou Gerstner, former chairman, IBM

The research that eventually resulted in the publication of *In Search of Excellence* began in 1977. The story is rather long, but the bottom line is that American business was under frontal, and successful, assault, mainly from quality-obsessed Japanese enterprise. The problem, in my and my colleagues’ view, was largely one of misdirected priorities—namely, American managers’ overwhelming emphasis on business strategy and “the numbers first and foremost”—at the expense of people and quality and execution. Eventually, my partner Bob Waterman and I locked onto a group of American companies (subsequently labeled “the excellent companies”) that were mostly “doing it right,” also in the face of stiff competition, and had never lost their focus on what we labeled “the basics.” Our shorthand for the research results was captured in six words: “Hard is soft. Soft is hard.”

Hard is soft: The typical base of “modern management” is mechanical—emphasizing numbers and systems. Yet there is nothing easier than fudging the numbers (look at the likes of Enron and Lehman Brothers); and, alas, most systems quickly become hothouses for exponentially increasing and inevitably debilitating bureaucracy. That is, these “hard” ideas, the bread and butter of MBA programs and consultancies, are anything but “hard,” inviolable truths. Both numbers and systems are, to be sure, unquestionably imperative for running the small business as well as the giant—but they are not the bedrock.

Note: This paper indirectly stems from the current American presidential primaries. Two candidates suggested that the Department of Defense’s wasteful ways could be curbed by ordering the adoption of “6-sigma management.” Having put in two years of Pentagon duty as a naval officer (1969-1970), I was struck by the hilarity of such a notion; I’d observed the “adoption” of miracle systems before in the DOD (PPBS/Program Planning and Budgeting System, the brainchild of Robert McNamara), and watched their inevitable byproducts—*more* bureaucracy and *more* waste,. Moreover, ideas like this, and the issues associated therewith, are near the heart of my last 35 years of professional work. Hence, with some outside urging, and with no political axe to grind on this score, I prepared this brief paper.

“With ISO 9000 [quality standards] you can still have terrible products. You can certify a manufacturer that makes life jackets from concrete, as long as those jackets are made according to the documented procedures and the company provides next of kin with instructions on how to complain about defects. That’s absurd.” —Richard Buetow, Motorola

Soft is hard: We *did* discover bedrock. It came in the form of deep-seated respect for the work force; managers who were out of their offices and engaged where the work was done (“MBWA,” or Managing By Wandering Around, as Hewlett-Packard called it); an abiding emphasis on trying it (whatever “it”!) rather than talking it to death and then accepting the failures that accompany “a bias for action” as we labeled this phenomenon; keeping constantly and intimately in touch with customers; and “managing” via a small set of inviolable core values. These “soft” ideas, largely AWOL on the American management scene circa 1980, were in fact the “hard” infrastructure of excellence.

Paralleling our work, the quality “movement” took off, and enough “quality gurus” sprouted to fill a sizeable sports stadium. Without a shadow of doubt, the newfound emphasis on quality produced a raft of scintillating success stories—some of which produced extraordinary growth in profitability and market share. Yet a closer look reveals that for every quality program success there were scores of misfires—programs, often absorbing vast amounts of time and sums of money, that produced little or nothing in the way of better quality or improved financial results, and in some situations made a slumping organization even more sluggish.

Though it’s foolhardy to make such an assertion, in my view there was a singular reason for the mixed bag of results; and it was predictable from our excellence research—too much reliance on the apparently “hard” procedures of, say, six-sigma programs and not enough attention to those underlying, apparently “soft” attributes such as the respect for and engagement of the workforce and a personal commitment to excellence.

To support my point, I’ll offer up ten case studies (more accurately, snapshots) of quality programs, often in incredibly resistant environments, that did produce remarkable results. It turns out that they have two principal elements in common:

- * Passionate *local* leadership.
- * A bedrock *corporate culture* that supports (or comes to support) an ethos of superior, quality work, courtesy of an engaged and respected and appreciated workforce—and, indeed, an unwavering moment-to-moment commitment to no less than excellence.

(There is an eleventh case study, which focuses on failure—that is, the at least short-term demolition of a culture of quality that had previously consistently produced earth-shattering results.)

Herewith the cases:

- Case #1/United States Air Force Tactical Air Command/GEN Bill Creech/“Drive bys”
- Case #2/Milliken & Company/CEO Roger Milliken/the 45-minute grilling
- Case #3/Johns Hopkins/Dr. Peter Pronovost/The roots of checklist power
- Case #4/Commerce Bank/CEO Vernon Hill/The RED button commitment
- Case #5/Veterans Administration/Abrogating the “culture of hiding”
- Case #6/Mayo Clinic/Dr. William Mayo/Teamwork makes me “100 times better”
- Case #7/IBM/CEO Lou Gerstner flummoxed by ingrained beliefs

Peters & Waterman 1977-present:

“Hard” is soft!
“Soft” is hard!

Case #10/Matthew Kelly/Housekeepers' dreams
Case #11/Toyota/Growth or bust

Case #1/United States Air Force Tactical Air Command

You've doubtless seen or heard of "flyovers"—the U.S. Air Force Thunderbirds or the Navy's Blue Angels honoring some significant event with their spectacular aerobatics. But how about the "Drive by"?

General Bill Creech was the 4-star general who commanded the USAF's Tactical Air Command. He was a nut about improving the quality of everything—and wildly successful at doing just that. (He increased battle-readiness dramatically—and in the process also saved a bushel of money.) Sure, there were new systems and procedures. But they were, in fact, the least of it. For example, Creech figured that the key to quality was not the already super-motivated high-visibility USAF pilots, but, rather, the supporting cast of thousands upon thousands who stood behind them such as the brilliantly trained mechanics and technicians and logisticians. Like most supporting casts, these folks were effectively invisible, defining "un-sung" in its literal meaning. Creech moved heaven and earth to change all that. Among other things, at TAC's Langley VA headquarters, he had regular "Drive bys." The mechanics and others would polish their gear and spit shine their shoes and vehicles and, with families and friends and the brass in attendance, hold a celebratory event in which the supporting staff and equipment would parade "full dress" around the base grounds. There were a hundred things like this, quintessential "soft stuff" that added up to a matchless, "all hands" enthusiasm for and commitment to quality work—with no less than staggering results. Moreover, Creech painstakingly developed a cadre of acolytes, generals who subsequently infused this ethos into other commands.

While the new systems that supported the quality program were imperative, it was the new "culture" of all-hands engagement, quality-or-bust as only acceptable outcome, and General Creech's passionate, dogged personal engagement that made the difference.

(NB/Small world: Oddly enough, as I was writing this I ran into, on a hike in New Zealand, a retired USAF pilot. Unbidden, he got to talking about the F-16 rides he'd given to low-ranking airmen who'd performed their supporting work notably well. "*I really took those rides seriously, Tom, as seriously as a combat-training sortie,*" he said. "*We were really trying to honor the amazing work these guys were doing that kept us flying.*" At the time of his comment, he had no idea that I'd ever heard of General Creech or, for that matter, TAC!)

(NB: In this paper, I chose to use interchangeably the likes of "Six-Sigma," TQM/"Total Quality Management," "Deming Principles," Crosby's "Do It Right the First Time," and General Creech's own "Six Pillars." As a result, many readers will doubtless scream bloody murder. But my point is simple: Coherent approaches *are* vitally important! But it really doesn't matter much which one, among the tested ones, you choose—as long as the culture is "right" and the passionate-determined leadership is in place.)

Case #2/Milliken & Company

I met Bill Creech and Roger Milliken at about the same time, in the mid-80s. Roger ran Milliken & Co., the textile giant performing brilliantly against all odds in an industry under crippling assault. In dedicating my 1987 book *Thriving on Chaos* to him, I labeled Milliken & Co.'s commitment to quality the best I'd ever seen. There was indeed a "quality guru" (Phil Crosby as I recall) and new systems had been installed, damn good ones. But make no mistake, the "culture of quality" and war on de-motivating bureaucratic roadblocks that Roger Milliken installed and oversaw with unrelenting (the word was invented to describe Roger) determination made all the difference.

Consider one small, but typical example. When, say, a plant manager from afar arrived at the airport nearest to corporate headquarters, he would invariably be met by "Mr. Milliken," as the boss was called by all except his brothers, and a 45-minute ride would ensue—just the two of them and the driver. The plant manager knew what was coming—a non-stop grilling by Mr. M. on one and only one topic, progress since the last grilling on the quality program and environment thereof. It was a good idea in terms of your future welfare to have something—*45 minutes of significant somethings!*—to say on the way to Spartanburg, SC.

And now consider one *big* example. Milliken was very formal ("Mr. M) and rank-conscious to a fault. Yet when Roger decided to create the role of company president, he passed over all the long-in-line and faithfully serving top candidates and selected Tom Malone for the highly visible new slot. Malone had run a small unit—but had become ardent cheerleader-in-chief for the most successful implementation of the quality strategy and ethos in the multi-billion dollar company. The signal Tom's "deep dip" promotion sent? Very loud and very clear: Get aboard the quality culture train ... or else.

Quality guru? Yes, Milliken had one. Supporting systems? Yes, good ones! But the defining difference was sustained and unwavering leadership from the top and the development of a quality culture in the face of the industry's abiding "culture," which was, in effect, exclusively focused on competing through cost cutting.

Case #3/Johns Hopkins

Patient safety is a hot topic, as it well should be—depending on how you add up the stats, American hospitals alone kill 100K to perhaps even 500K of us per year via largely unforced errors. Near the head of the parade of crusaders for change is Johns Hopkins' Dr. Peter Pronovost, appropriately called the father of the widely touted use of "checklists" in hospitals—and said by one high and mighty source to have saved more lives than any other doctor in America over the last decade! Used appropriately, and they very slowly but somewhat surely are coming to be, checklists *can* result in mind-boggling reductions in errors—e.g., 80% or 90% or even more in places of consequence.

The key phrase, however, is "*used appropriately.*" In his book (with Eric Vohr) *Safe Patients, Smart Hospitals*, Dr. Pronovost takes us through the trials and enormous tribulations of "getting checklists right"—i.e., unleashing the full potential of this "obvious" and "simple" tool, initially at a renowned institution (Hopkins) where the traditional medical hierarchy was deeply entrenched. The key, as is invariably the case in such circumstances, was tackling and then, over time, dramatically altering "institutional culture." For one example among dozens, or hundreds, nurses must be permitted—*required!*—to immediately intervene with docs who skip a checklist step. Talk about 20-megaton "culture change" in an environment where all too many (alas, most) M.D.s treat the likes of nurses with blatant disrespect (alas, "blatant" is the appropriate adjective)!

Taking a somewhat closer look, we find that Peter Pronovost's work was to a large extent triggered by the unnecessary loss of a child, Josie King, at Johns Hopkins Hospital. (The event triggered many things at Hopkins as well as elsewhere and is chronicled in *Josie's Story: A Mother's Inspiring Crusade to Make Medical Care Safe*, by the deceased child's

“When I was in medical school, I spent hundreds of hours looking into a microscope—a skill I never needed to know or ever use. Yet I didn't have a single class that taught me communication or teamwork skills—something I need every day I walk into the hospital.” —Dr. Peter Pronovost

now-crusading mother, Sorrel King.) In his own book, Dr. Pronovost discusses Josie's care, or lack thereof, at a critical moment in the context of a wrongheaded "corporate culture":

“The nurses said they tried to voice their concerns up the chain of command—but no action was taken. The way communication was organized at Hopkins, as it is at most hospitals, did not make this easy. Nurses would have to talk to residents, who then passed the message on to chief residents or fellows, who would then talk to the attending surgeons. It is common for the opinion of lower levels of the hierarchy to be discounted and often ignored by higher-ups. ... If someone jumps rank or seeks approval from another surgeon outside of the chain or in any way circumvents this hierarchy, the penalty is often public humiliation and reprimand.”

Wow—and, sadly, no surprise whatsoever.

Dr. Pronovost examined the roots of such death-dealing behavior, as reflected in his own training regimen, “When I was in medical school, I spent hundreds of hours looking into a microscope—a skill I never needed to know or ever use. Yet I didn't have a single class that taught me communication or teamwork skills—something I need every day I walk into the hospital.” Indeed it is precisely the likes of a rare “culture of teamwork,” or the characteristic absence thereof, that makes the apparently straightforward implementation of the “simple” checklist rise or fall—and accounts for the majority of those 100K+ unnecessary hospital deaths due to preventable errors.

The importance of the “system,” that is, the checklist per se, is irrefutable! Usefulness of the checklist without culture change, however, was/is marginal or zero or even a step back. (That is, done wrong the checklist becomes another mandated bureaucratic annoyance—which may well worsen rather than improve the already lousy coordination among key actors such as doctors and nurses.)

Case #4/Commerce Bank

Commerce Bank (now part of TD Bank) created a revolution of sorts in East Coast consumer banking by creating an atmosphere that welcomed customers at a time when most banks seemed to be going out of their way to alienate their retail clientele. In this “case-lette” I’ll focus on one tiny part of one customer-friendly system. Founder Vernon Hill (with Bob Andelman), in *Fans! Not customers. How Commerce Bank Created a Super-growth Business in a No-growth Industry*, explains: “Every computer at

Commerce Bank has a special **RED KEY** on it that says, ‘Found something stupid that we are doing that interferes with our ability to service the customer? Tell us about it, and if we agree, we will give you \$50.’”

It’s a “system,” sure, but it’s 95% a transparent “culture-enhancement device”—the focus is on attitude far more than process. That is, the message is, “For God’s sake, we beg each and every one of you to please help improve the quality of the customer experience!”

Case #5/Veterans Administration

Surprising many, Veterans Administration hospitals again and again rank at the top of every list on patient safety/quality of care evaluations. One key reason is the success of the VA staff at developing an understanding of the nature and source of medical errors. That sounds obvious, but as things are, the health care system in general seems perversely designed to keep people (docs, etc.) from admitting and thence analyzing errors. The VA’s Ken Kizer calls it a “*culture of cover-up that pervades healthcare.*” It contrasts sharply with the airline industry. “When a plane crashes,” says James Bagian, M.D. and former astronaut, now working with the VA, “they ask, ‘What happened?’ In medicine they ask: ‘Whose fault was it?’” The latter, of course, is a perfect device for insuring silence.

The VA frontally attacked this pervasive and deadly “culture of cover-up”—and replaced it with a “culture” based on learning from errors. The new idea, as brilliantly reported in Phillip Longman’s *Best Care Anywhere: Why VA Healthcare Is Better Than Yours*, was “looking for solutions, not seeking to fix blame on individuals except in the most egregious cases.” The good (incredible!) news was that as the culture change around admitting errors/learning from errors was established, *and* as the process came to be seen as trustworthy, there was a resulting ***thirty-fold increase*** in the number of medical mistakes and adverse events that got reported to the “Patient Safety Event Registry.” And the exponentially greater understanding of the source and nature of errors led in turn to procedural and cultural alterations that make the VA the shining example it has become.

Once more the story is indeed one of a spectacularly useful “system” ... enabled, however, courtesy mind-boggling, “genetic”-level culture change which in turn was enabled by a grassroots-led, passionately pursued (for over a decade) revolution.

Success Key #1: Directly confronting and excising the deeply entrenched *“culture of cover-up”*** that pervades medical practice at all levels—and replacing it with a “culture of learning.”**

Case #6/Mayo Clinic

Dr. Pronovost may not have had any team training, but there are a few examples of healthcare organizations that “got it right from the start.” One of the two core values instilled by Dr. William Mayo (Mayo Clinic) in 1910 was, effectively, practicing team medicine. (Designing the practice around the patient, or “patient-centered care” as some call its rare manifestation today, was the other core value.)

The potency of Mayo’s team-based culture? Consider this from Dr. Nina Schwenk, a Mayo newcomer: *“I am hundreds of times better here [than in my prior hospital assignment] because of the support system. It’s like you are working in an organism; you are not a single cell when you are out there practicing.”* (Yes, that’s not a misprint: “hundreds of times better.”) Such a culture lends itself to the safer and more effective practice of medicine, for which Mayo may have few if any worldwide peers.

Again: To be sure there are numerous formal systems at Mayo, but the healthful elixir that matters is a peerless culture of cooperation—that dates back to William Mayo’s inspired leadership a century ago.

(NB: The Mayo examples come from Leonard Berry and Kent Seltman’s superb *Management Lessons from Mayo Clinic*. In fact, I cannot resist one more jaw-dropping “cultural” commentary from Berry and Seltman. It typically boggles the mind of healthcare professionals in my seminars, who are used to the strict separation of disciplines and hierarchies of authority and power in their own institutions. To wit: *“A Mayo surgeon recalled an incident that occurred shortly after he had joined the Mayo surgical staff. He was seeing patients in the Clinic one afternoon when he received a call from one of the most experienced and renowned surgeons on the Mayo Clinic staff. The senior surgeon stated over the phone that that he was in the operating room performing a complex procedure. He explained the findings and asked his junior colleague whether or not what he, the senior was planning seemed appropriate. The junior surgeon was dumbfounded that that he would receive a call like this. Nonetheless, a few minutes of discussion ensued, a decision was made, and the senior surgeon proceeded with the operation. ... A major consequence was that the junior surgeon learned the importance of inter-operative consultation for the patient’s benefit even among surgeons with many years of surgical experience.”* Berry and Seltman also report, another jaw-dropper, that a senior Mayo oversight team more or less routinely disciplines, or even releases, doctors, regardless of technical reputation, who repeatedly fail to practice team medicine.)

(NB: And one more, per my lights, blockbuster: The authors report that in the course of a typical Mayo hiring interview, the candidate is asked to describe a successful project she or he led. The interviewers make careful note of the frequency with which the

“We”

candidate uses
team’s activities!)

rather than “I” to describe her or his

*I am ... **hundreds**
of times ... better here
[than in my prior hospital
assignment] because of the support
system. It’s like you are working in
an organism; you are not a single
cell when you are out there
practicing.”* —Dr. Nina Schwenk, Mayo Clinic

Case #7/IBM

I first met Lou Gerstner when I was at McKinsey & Co. in the late '70s. The phrase “tough as nails” was invented for the likes of Lou. Only GE’s Jack Welch, among CEOs I’ve met, including generals who ran their nation’s armed forces, is in the same league. Gerstner was also the quintessential McKinsey proponent of “Gimme the facts, period.” He was, in short, an analyst’s analyst—and a superb one at that. My work on organization effectiveness was in its infancy, and though mandated by the Firm’s managing director (de facto CEO), Gerstner thought it was, well, crap. Too “soft” by an order of magnitude!

Time passed, I co-wrote a book about excellence with Bob Waterman (our motto, recall, was “Hard is soft. Soft is hard.”), and Gerstner after a couple of very successful stops-at-the-top, such as American Express, was called in as CEO to save (or dismantle) a staggering IBM. His success was mindboggling, and like so many CEOs in those days, he wrote about it after the fact; i.e., *Who Says Elephants Can’t Dance*. No surprise, I was completely taken by a paragraph that appeared in the introduction:

“If I could have chosen not to tackle the IBM culture head-on, I probably wouldn’t have. My bias coming in was toward strategy, analysis and measurement. In comparison, changing the attitude and behaviors of hundreds of thousands of people is very, very hard. [Yet] I came to see in my time at IBM that culture isn’t just one aspect of the game—it is the game.”

Gerstner extolling the utter inescapable necessity of whole sale culture change? You could indeed have knocked me over with the proverbial feather! Though not directly on the topic of quality, this is in many ways the crowning example in this brief set. Did Gerstner forget about the analytics during his decade-long sojourn at IBM? You gotta be kidding! His love affair with the “hard facts” was never far from the surface. And yet, he faced the hardest of all facts, namely that “soft” really is “hard.” That without tackling the bedrock (hard, eh?) culture issues, a dramatic shift in corporate performance, even survival, was not possible. Lou also came to appreciate that to make such a change he absolutely needed voluntary buy in, not merely a mandate from the top, “In the end,” he said in his book, “management doesn’t change culture. Management invites the workforce itself to change the culture.”

Lou Gerstner?

“Invite”?

Wow!

*“Yet I came to see in my time at IBM that culture isn’t just one aspect of the game—
it IS the game.”* —Lou Gerstner

Case #8/Germany's Mighty "Mittelstand"

Germany's extraordinary economic performance, particularly as high-end manufactured products exporter, is not by and large built on the backs of a few giant institutions such as Siemens or Daimler Benz. Instead the acknowledged bedrock is a stellar set of middle-sized firms—the so-called *Mittelstand*. I studied them closely and even did a PBS television special featuring several Mittelstand firms—it was more or less their first American “public” exposure.

The world of “management thinking,” at the time of my Mittelstand research, in about 1990, was as always awash in buzzphrases—none more commonplace than “empowerment.” Yet as I toured these wildly successful German firms, the spear-carriers for the nation's export excellence, I never once heard “empowerment” (in English or its German equivalent) or “continuous improvement” or their ilk. *Never = Never*. Over time I came to appreciate what I think is the key success factor—and my work over the last 20 years has reinforced that notion. In a word (or words) ... *respect/mutual appreciation*. Superior quality is more or less instinctive in German enterprise; and beneath that “instinctive,” it is a byproduct to a significant degree of the ubiquity of the apprenticeship education and development process. *That process provides a common background and cultural appreciation of superior workmanship among junior and senior workers and their junior and senior bosses—all the way to the CEO*. I observed any number of unstaged exchanges between the CEO-owner (boss of a billion dollar firm) and a 19-year-old line employee that could only be labeled as conversations among colleagues. (Most of us, to put it mildly, think of Germans as rigid and hierarchical—I was taken aback, I'll be the first to admit.) That is, there is widespread respect for and appreciation of craftsmanship and quality work and the initiative required to make it all work—and hence no need for the big boss to call in pricey HR consultants and launch an “empowerment initiative.” Could it be so simple? Of course not! On the other hand, the commonality of my experience throughout visits to a half-dozen companies, ranging from toymakers (Playmobil) to machine-tool manufacturers (Trumpf), I believe strongly supports the argument presented here.

I am hardly saying that systems and measures are not a big part of life in a Mittelstand firm. I am suggesting that they play a supporting role to an incredibly powerful and remarkably widespread national culture of quality work and

self-managed employee on-the-job performance, commitment, accountability, and growth. “Empowerment” consultants need not apply. (I’d also add that virtually all the workforce is unionized—a stereotypical image of union workers focused on “gettin’ the day behind them” is distinctly the wrong image.)

Case #9/Department of Defense Model Installations

Bob Stone was the director of Vice President Al Gore’s mostly invisible and surprisingly effective “re-inventing government” program. His approach at the White House was developed a decade before. When I first met Bob, he was Deputy Assistant Secretary of Defense for Installations, in effect responsible for the status and development of all of our military facilities. He re-defined his DOD task as a headlong effort to achieve nothing short of global excellence. His approach fascinated me—he turned his back on “programs” and “systems,” though he is as much a conservative “systems guy” as anyone I’ve met. In short, he knew from long and frustrating experience that “clever” new systems and programs launched with promises of “transformation” were invariably dead ends in government—that is, their main “products” were increased bureaucracy and constant gaming.

Stone’s extraordinarily effective approach was built around a set of what he labeled “Model Installations.” Given the size of the defense facilities establishment, he figured that there were mavericks out there already doing it right, in fact very right, despite a gazillion bureaucratic impediments; hence, rather than have “brilliant” staff analysts invent “improvement programs,” he cited and publicly honored some small number of stalwart bases as “Model Installations.” He “invited” (shades of Gerstner at IBM) others to learn from the stars’ approaches—which had invariably produced results that put their peers to shame. Stone succinctly captured the notion this way: “Some people look for things that went wrong and try to fix them. I look for things that went right, and try to build off them.” And build off them he did!

(Along the way, Stone *did* attend to the systems per se—and took gargantuan steps to de-bureaucratize them. For example, the principal DOD facilities management guidance document was reduced from 450 pages to eight pages! Stone told me he had wanted to produce the 8-page version in a pocket-size format—however higher-level DOD guidance, beyond his remit, would not permit official documents being printed and distributed in such a revolutionary format. Ah ...)

“Some people look for things that went wrong and try to fix them. I look for things that went right, and try to build off them.” —Bob Stone

Once more, I'm not, to put it mildly, describing an environment short on systems and procedures and measures—but I am describing a context in which local leadership (the model-installation commanders) and a carefully nurtured culture of mutual respect and appreciation of excellence are the dominant drivers of success.

Case #10/Housekeepers' Dreams

The single staff person who has the most face-to-face interaction with the hotel guest is the housekeeper you cross paths with in the corridor and who is responsible for “the little things” in your room that are not in the least bit “little.” We guests all know intellectually we’re sleeping in a room where a thousand others have slept or expressed unattractive habits, but we don’t want to be reminded by the work of a sloppy housekeeper. All that said, the housekeeper is typically the most lightly regarded member of staff—hence, among other things, high turnover and anything but a commitment to service and guest experience excellence. Maybe it’s the residual engineer/MBA in me, but I shy away from books with titles like *The Dream Manager*. But killing idle time in an airport will cause all sorts of odd behavior. Which is to say I aimlessly picked up Matthew Kelly’s *The Dream Manager* in the Atlanta airport—and was instantly hooked. Though written in parable form (I have trouble with that, too), it is the story of a real and outstanding (growth, profits, customer loyalty) cleaning services company—that is, a collection of thousands of de facto housekeepers! (The company chose to remain anonymous—imaging it would be seen by employees as exploitative; I was later thrilled to meet the CEO of the very real firm.)

Kelly, or, rather, the company’s leaders, made an obvious assertion (after the fact—I admit to being bowled over by the obvious time and again) that everyone—yes, including housekeepers!—has dreams. That housekeeper from God knows where is likely a single mom with two kids and three jobs who imagines another more satisfying life if only, say, she could get a community college certificate in business administration or hospitality. Though the CC certificate will not directly make her a better cleaner, it will make her a more fulfilled person—which will indeed doubtless make her a better housekeeper. (It does indeed work!) Given all this, then, the manager’s first job becomes explicitly helping front line folks achieve their dreams—hence, a “dream manager.”

Kelly brilliantly describes the guiding corporate philosophy:

“An organization can only become the-best-version-of-itself to the extent that the people who drive that organization are striving to become better-versions-of-themselves. The question, then, is: What is an employee’s purpose? Most would say, ‘to help the company achieve its purpose’—but they would be wrong. That is certainly part of the employee’s role, but an employee’s primary purpose is to become the-best-version-of-himself or—herself. ... When a company forgets that it exists to serve customers, it quickly goes out of business. Our employees are our first customers, and our most important customers.”

Perhaps you’d say, as I did at first (yes, even me, Mr. “Soft is hard”), that “dream manager” is a bit over the top. Yet it works—and has produced bottom line excellence and service excellence for years. And once more, as I talked with Kelly and then the company founder, I discovered that, of course, there are procedure manuals and time-tested systems—damn good ones, in fact. But it’s not those manuals that have produced the exceptional results—it’s a clutch of “mere” housekeepers pursuing their dreams and becoming more effective and fulfilled human beings.

*“We all have
dreams.”* —Matthew Kelly

*“We are ladies and
gentlemen serving
ladies and
gentlemen.”*

—from the Ritz-Carlton Credo

NB: The Ritz-Carlton hotels, under the inspired leadership of Horst Schulze, set a standard for hotel service quality. The organization's "credo": ***"We are ladies and gentlemen serving ladies and gentlemen."*** Sound mundane? Well, it's not. Perhaps the large majority of the front-line staff who almost singlehandedly shape the customer experience—housekeepers redux—have been treated like anything but "ladies and gentlemen." A single word ("lady" or "gentleman") does not excellence make—but it sure as hell helps! As to the idea (I'd say *profound* idea) of employees as "customers," the remarkable Herb Kelleher, Southwest Airlines founder and longtime CEO, always insisted that there was a single primary underpinning for his company's excellence in a brutally competitive environment: *"You have to treat your employees like customers."* Related favorites of mine: From health and beauty-salon chain founder John DiJulius: *"When I hire someone, that's when I go to work for them."* And Arie Weinsweig, founder of the world renowned food emporium Zingerman's: *"If you want staff to give great service, give great service to staff."* (NB: At the Ritz-Carlton, those housekeepers are permitted to spend \$1,000+ to fix a guest problem—without the approval of "management." A lot of middle-managers are not allowed that much leeway!)

Case #11/Toyota

Toyota's systems have long been the envy of the world—ensuring quality matched by none. Or so was the case for several decades. In the last few years, alas, Toyota has become a poster child for quality problems, some of which are purported to have resulted in fatalities. While it's admittedly absurd to pin a problem of this magnitude on a single variable, it seems almost certainly to be more or less the case in this instance.

Closing in on a then-stumbling GM, Toyota pulled out all the stops in a rush to become the world's largest car company in terms of sales. While the objective was achieved, it seems to have come at the expense of a proud culture of quality and excellence, which was effectively replaced by a culture of more along the lines of "growth-at-all-costs."

As a result of the ensuing quality mis-steps, which clearly dented customers' faith in the product, top leadership was revamped, apologies were made by the Toyoda family, and new family leadership was installed at the top—the results, happily, are promising.

When we speak of Japan's enterprise success, particularly in the quality and continuous improvement arena, we talk often of systems—"CI"/continuous improvement or "lean production" or the "Deming Principles." Dr. Deming's approach did work miracles in Japan, but the lessons extracted therefrom were misleading. Deming may have had a scheme, but it was based almost entirely on an enabling "corporate culture" of employee commitment to quality; moreover, in Japan, the existing national culture and approach to work were tailor-made for implementing Deming's prescriptions. Of course, as suggested in this brief example from Toyota, even the most effective of corporate cultures can be torpedoed, at least in the short term.

The most effective cultures imaginable—e.g., Toyota's—can slip, slip badly, and slip astonishingly quickly. Sustaining a culture of quality and excellence is a daily affair. And a conscious daily affair! Leaders at all levels must explicitly assess their daily performance to gauge the degree to which they have stayed true (or not) to the cultural imperatives of an organization devoted to matchless quality and an invariant standard of excellence.

Systems Have Their Place: **SECOND** Place

These eleven case studies capture the lion's share of the organizational universe. E.g.: the public as well as the private sector. Our fastest growing "industry," healthcare, as well as the poster child for embattled industries, textiles. Non-USA entities—Toyota and the German Mittelstand—as well as American institutions. The life of USAF pilots—and the life of hotel housekeepers. The stories are, obviously, intentionally repetitive. They effectively make the same point again and again: Systems and procedures are necessary but no where nearly sufficient. In fact, in the absence of fired up local leadership and a supportive organizational culture that starts with respect for the contribution of every employee, elaborate systems can readily become additional bureaucratic drag.

To an extent, this discussion is pessimistic. There are no miracle cures. There are no clever systems that will in and of themselves carry the day. If you don't have an effective culture taking the lead, you are pretty much doomed to marginal improvement, or, God help you, steps back by merely installing a system, no matter how ingenious or how highly touted it may be.

*In the end: **Hard is soft.***

***Soft is hard.** The traditionally viewed "soft" variables such as "institutional culture" and "inspired leadership" are the principal keys to success—or failure.*

Closing notes:

(1) While I have consistently indicated to the contrary, one might assume that I am giving systems short shrift. To be sure, I am emphasizing the incompleteness—and often problematic nature—of a strategy that envisions superior systems as a be all and end all. But, trained as I am, first and foremost, as an engineer, I am hardly indisposed to superior systems—organizations do indeed need to be organized, and systems are the scaffolding for effectively organized affairs. In fact, an approach to doing business that brushed off systems and effectively stopped with a culture that was, say, highly supportive of staff would also by and large be dysfunctional. In short, one needs both superb systems *and* a culture that unmistakably “puts people first” in pursuit of quality and overall excellence. The purpose of and impetus for this paper is, then, primarily is to act as a corrective to the traditional approach that, so often, emphasizes systems and de-emphasizes—or ignores!—the sort of organizational cultures described briefly in the cases above.

(2) A related point, a source of continued irritation to me: I am *not* talking about “balance”—a word I dislike! That is, the cases above are do not “balance” culture and systems—they are, de facto, cases of, if you will, “double excellence.” The systems at, say, TAC are superb—*and* the TAC culture instilled by General Creech is appropriate to maximizing the value of those systems and, hence, producing overall excellence and superior results.

**Culture first, systems imperative-but-second ...
but for sustaining excellence in quality and
productivity and performance excellence.**

You’ve gotta do both with panache
