

Tom Peters' Compact Guide to Excellence

Authors: Tom Peters & Nancye Green

Nancye, who should read this book?

Well, I have two daughters—one in their early 30s and one in her late 20s. Every time I see something that I think will inspire my daughters to some kind of greatness, to find that within them—I send it to them, and they're very used to this, I've sent them so many books. And this is the kind of thing I would send them, and say to them, "You know, just take a read. Just- you know, put it next to your bed, put it in your bathroom, put it in your living room, and pick it up from time to time, and just take a look." Because I do think that we all need these moments of inspiration. And I pick it up from time to time and just open it up to see what lands. And I would love to give that to people I love for the same reason.
